Disciplinary Actions for Law Violations.....	11
Section III – Regional Level Data.....	21
Section IV – District Level Data	25
Section V – Summary	62

Are Kentucky schools safe? Again this year this question remains a priority in the minds of parents and educators. Strange that this question would be so ever-present in the public's mind when only ten years ago it was generally accepted that schools were safe. Then came a string of highly publicized school shootings and everything changed. At the beginning of the 2001-2002 school year, the fear that had gripped our nation following the spate of school shootings began to be put into proper perspective; however, all that changed on September 11th 2001 when a terrorist attack stung the nation and plunged the public into an environment of fear when we began to ask, "Are we, as a nation, safe?"

As we again prepare to examine board policy and law violations that occur at school, on school property, or during school-sponsored events, keep in mind that questions about school safety cannot be answered unconditionally. Many factors have to be considered as they relate to school. For example, the physical structure of the school is one factor while the school's emotional climate is something totally different. Additionally, each factor has to be considered on a continuum from safe to unsafe and all points in between. Only through a comprehensive analysis of the numerous factors of what constitutes a safe school can we come close to understanding the safety of a school. Regardless of the current climate of your school there is always room for improvement.

As this fourth Safe Schools Data report is published, we urge schools and communities to use this data in conjunction with school officials to help make our communities safer – both in school and out-of-school.

I N T R O D U C T I O N

The Kentucky Center for School Safety (KCSS) has reported discipline data from school districts since the Safe Schools Data Project began in 1998 as a pilot project. In the beginning, with partial funding from a federal grant, the Kentucky Department of Education (KDE) collaborated with the Research Triangle Institute (RTI) in North Carolina to design an electronic reporting system. Individual schools completed specific data-gathering worksheets and then entered the data into a Web database managed by RTI. After arranging and sorting the data for interpretation purposes, KCSS and KDE received the data for analysis and a report was issued. For the second year, 1999-2000, the data collection process remained essentially unchanged; however, additional attendance data were collected regarding suspensions and expulsions. KCSS contracted with R.E.A.C.H. of Louisville, Inc. to analyze, interpret, and write the project report. Three separate reports were issued organized around state, regional and district-level summaries. In the third year of the collection process as in previous years, data were entered into an electronic system operated by the Research Triangle Institute and each district confirmed electronic completion of the data. The data set was then sent to R.E.A.C.H. for entry into a statistical analysis program and then forwarded to KCSS for interpretation, analysis, and writing. The third report combined district, regional and state data into one report and was issued in March 2002.

Historical Perspective

In the fourth year of data collection, a major change occurred in the aforementioned procedures. School districts no longer enter data into the RTI system, but now electronically transport their data directly to KDE. (Jefferson County is the only district that did not use the STI software in 2001-2002, but will be using the same system as all other districts for the 2002-2003 reporting.) This change eliminates the additional chance of human error when numbers are entered into one system and then re-entered into another. Once KDE staff receives all districts' data, printouts are sent to each district for a final verification of the data's accuracy. Following a final check of the data, superintendents return a signed verification sheet to KDE.

Data Collection Year Four

As in past years, the data are first reported for all students. Data for Caucasian and African-American students are then disaggregated when the number of African-

American students in the district is large enough to allow reporting without violating the Federal Educational Rights and Privacy Act. Asian American, Hispanic American, American Indian, and other racial groups are not reported since their numbers are so small in most Kentucky counties that privacy rules will be violated.

With data definitions remaining constant and with additional training support from KDE and KCSS, data quality has significantly improved over the course of the four years. However, areas that need additional consideration include:

- 1) **Board policy violation categories**. There is still variability across districts as to how they report an incident that is not included in the current list. For example, disturbance on a bus is often coded under class disturbance since that is the closest match from the list.
- 2) **Alternative placements**. An infraction that results in a suspension may also result in a recommendation for placement in an alternative setting. Consequently, reporting of the alternative placement for the same infraction that resulted in a suspension results in double counting the infraction. Therefore, alternative placements may be better described as an intervention than a disciplinary action.
- 3) **Unique identifier**. Currently, the data are reported by incident and disciplinary action. Assigning each Kentucky student a unique number that would move with them regardless of where they were enrolled would allow the data to be analyzed more comprehensively. For example, a unique identifier would allow the disaggregation of the data by placement in special education, mobility, low socio-economic, repeat offenders, limited English proficiency, etc.

KCSS has worked diligently over the past four years to provide a report that reflects as accurately as possible a picture of student behavior in Kentucky schools. Each year our confidence has grown in our data collection procedures and this year's report is reflective of the evolutionary process that has occurred.

Section I Using this Report

The primary mission of schools is to promote learning for all students. Without a safe and orderly learning environment, however, schools cannot fulfill this mission. The major purpose of the Safe Schools Data Report is to provide educators with a powerful set of tools to promote a safe and healthy learning environment. Tracking school board policy and law violations is essential for assessing school discipline and climate needs and for monitoring the effects of reform efforts. Discipline data can be used to determine the effectiveness of discipline practices and what discipline practices need to be modified or eliminated, what effective programs or practices need to be enhanced, and what specialized behavior supports need to be developed.

The 2001 Safe Schools Data Report provided districts and schools with basic steps for analyzing data. This year we encourage districts and schools to continue to examine their data closely and we offer the following as additional ways to look at their data.

1. Use the data collected for this report as a starting point for analysis not the end point. Along with suspension, expulsion and corporal punishment numbers, compile data for other discipline responses that occurred as a result of an office discipline referral, (e.g., in-school suspension, after-school or Saturday detention, parent behavioral conferences, loss of privileges)
2. Sort the data in several ways:
 - a. By month
 - b. By location
 - c. By time
 - d. By gender and ethnicity
 - e. By type, (e.g., what can be grouped as developmental issues, as teachable issues, as warning signals)
3. Depict the data graphically or pictorially.
 - a. Bar graphs can be especially useful in differentiating among variables such as type or month of disciplinary action. Offenders can also be graphed to examine recidivism rate.
 - b. Location can be also be mapped, i.e., using a map of the school, place a letter code at the location of each incident. (Using the list of law and board violations, create a legend for infractions).
4. Now that the data are sorted and graphed, prepare to analyze the data by posing several questions:
 - a. What are the highest infractions?
 - i. Where and when are they occurring?
 - b. What are your lowest infractions?
 - i. Where and when are they occurring?
 - c. Is there a difference between where and when the highest and lowest infractions are occurring?

- d. Who are your highest offenders?
 - i. Is there a common denominator among repeat offenders, type of infraction occurring most frequently, and location and time of most infractions?
5. Sort the data into four categories of intervention:
 - a. **Structural Changes**. What can be changed regarding the physical structure of the building and grounds that will reduce infractions? For example, can large bushes or trees that allow smokers to avoid observation by staff be trimmed or removed? Can a large playground area be divided to allow closer supervision by staff?
 - b. **Organization Changes**. What can be changed regarding the school's routines and procedures that will reduce infractions? For example, how can supervision be increased in areas with high infractions? How can class release times be staggered to reduce the number of students in a small hallway during class changes?
 - c. **Rule and Policy Changes**. What can be changed regarding the school's rules and regulations that will reduce infractions? For example, how can dress code violations be addressed with other interventions besides suspensions? How can policies that mandate automatic suspension be reserved for the most serious infractions like weapons and drug possession?
 - d. **Instructional Changes**. What can be changed regarding the school's curriculum that can reduce infractions? For example, if bullying behaviors are problematic, what curriculum supports can be put in place to help prevent bullying and change school norms? What school-wide rules and policies need to be implemented or revised? How are rules taught and practiced in the classroom?
6. Create a priority list of interventions.
7. Determine professional development needs for staff relating to interventions planned.
8. Establish a short-term and long-term evaluation plan.

Data should always be reviewed in context. For example, a school experiencing a suspension increase could be experiencing any or all of the following: (1) a rising level of student misbehavior and school disorder; (2) an administrative accentuation on commission of offenses; or (3) a building with physical plant or staffing problems. The context should drive the intervention plan.

The Safe Schools Data Project collects data from all Kentucky public schools regarding the commission of law violations and board violations that result in one of five disciplinary actions.

Kentucky's total population in public schools has been over 625,000 students for the duration of the data collection. Of that total, slightly less than 8% each year are offenders, i.e., students who commit an offense that results in an expulsion (with or without services), suspension, alternative placement, or corporal punishment. Lesser disciplinary actions are not reported to the project, (e.g., parent conferences, detentions, in-school suspensions). In reviewing the upcoming data regarding commission of board and law violations, keep in mind that offenders comprise a very small percentage of the total number of students enrolled in Kentucky's public schools. To illustrate that point, **Chart 1** shows the number of offenders compared to total population.

Section II State Level Data

Chart
1

Kentucky Enrollment Compared to
Student Offenders 2001-2002

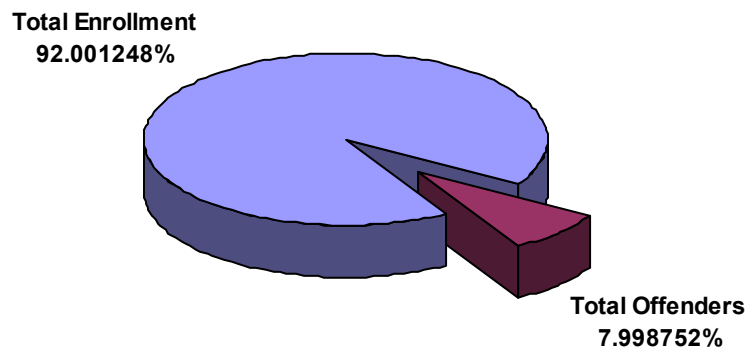

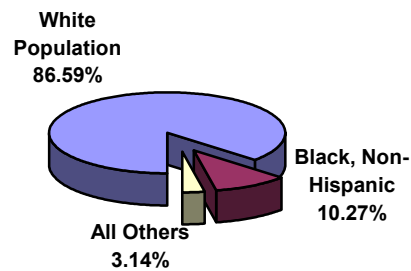

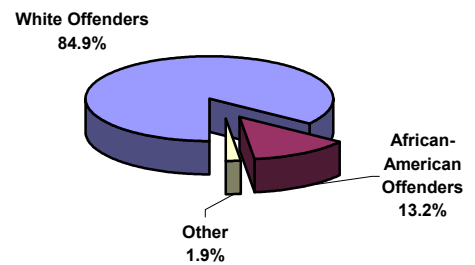

Chart 2 illustrates the percentage of offenders by population group. White offenders comprise 84.9% of offenders, African-Americans 13.2%, and all other racial groups, 1.9%. Since Kentucky's student population is approximately 10% African-American, their representation in the offender group is slightly larger than their proportion in the general student population.

**Chart
2**

Student Population by Ethnicity

Offenders by Population Group

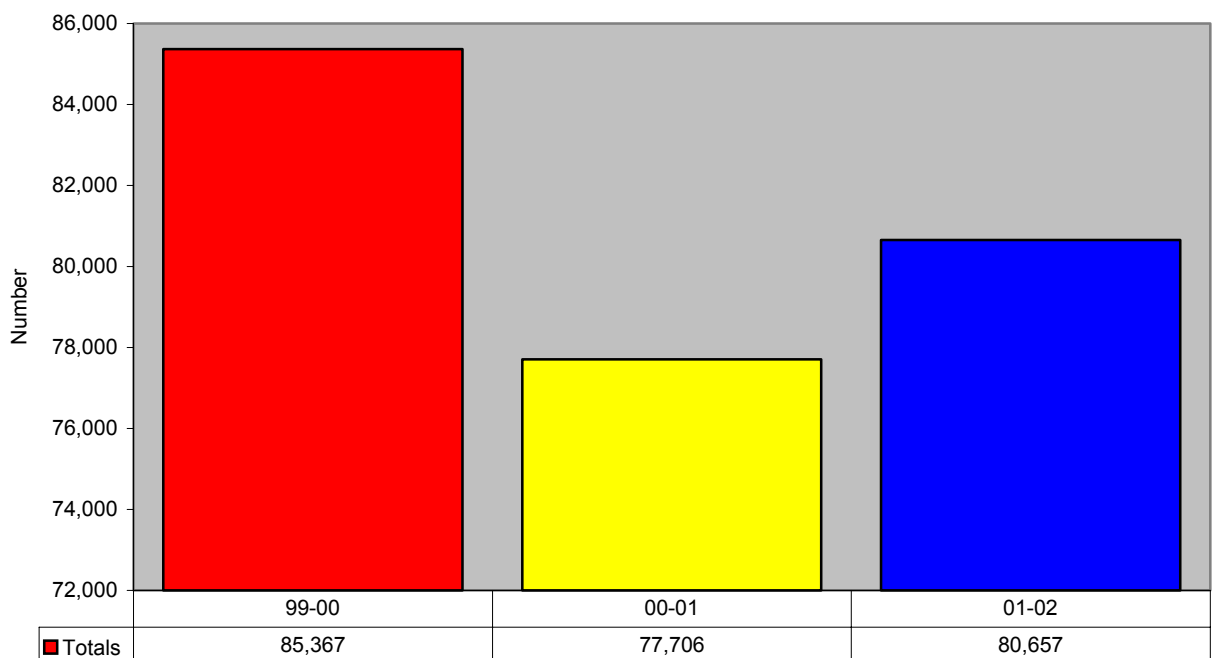

The term offender as used in Charts 1 and 2 refers to an individual student involved in committing an incident of prohibited behavior. An offender, however, may commit multiple offenses. Multiple infractions are included in disciplinary actions.

Disciplinary Actions for Violations of Board Policy

Chart 3 provides the total number of disciplinary actions for school board policy violations for the past three years. Disciplinary actions for the current year were 3.8% higher than the total for 2000-2001; however, '01-02 totals were 5.5% lower than the number reported in the '99-00 school year. While an increase does pose questions, fluctuations from year to year are not uncommon in the early stages of reporting.

**Total Disciplinary Actions for
Board Violations**

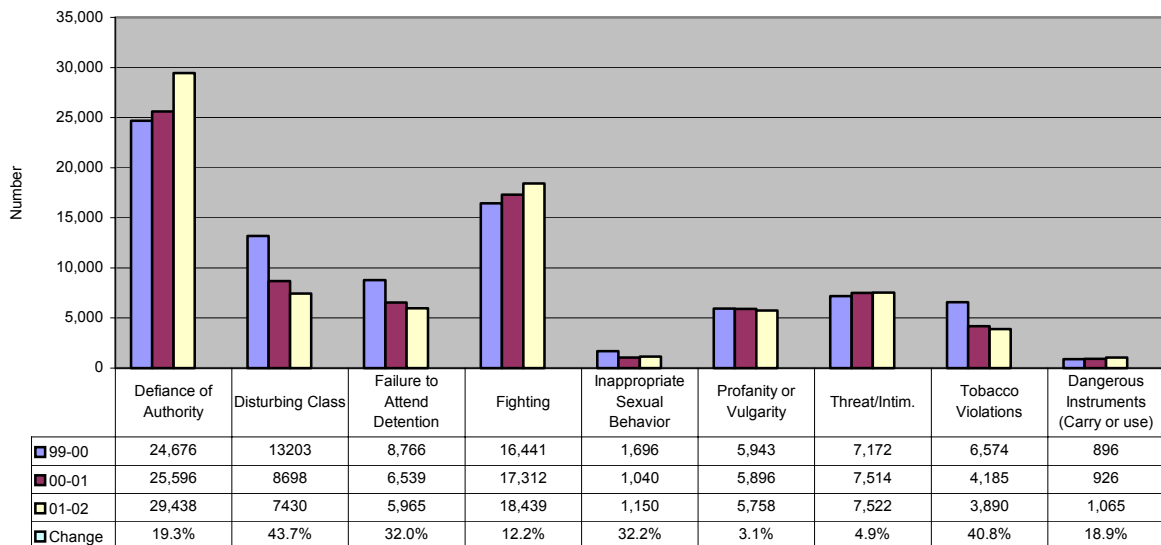

**Chart
3**

A categorical break down of disciplinary actions for board policy violations is depicted in **Chart 4**. Five of the categories have shown a decrease since the 1999-2000 year. On the other hand, a steady increase is noted in fighting (up 12.2% from 1999-2000) threat/intimidation (up 4.9%), defiance of authority (up 19.3%), and dangerous instruments (carrying or using) (up 18.9%). Since the increases are noted in the more serious board violations, this steady increase is troubling and suggests that individual schools and their districts should carefully examine factors that may be contributing to this increase. While it could be that these findings indicate that students are becoming more violent, other explanations also exist. Questions that need to be asked include: (1) Are districts less tolerant of behavior that is related to violence; (2) Are increased numbers of School Resource Officers (SROs) and/or increased supervision by staff bringing about more apprehensions for inappropriate behaviors. These are just a few of the questions that need to be examined in the discussion.

**Disciplinary Actions for
Board Violations by Category**

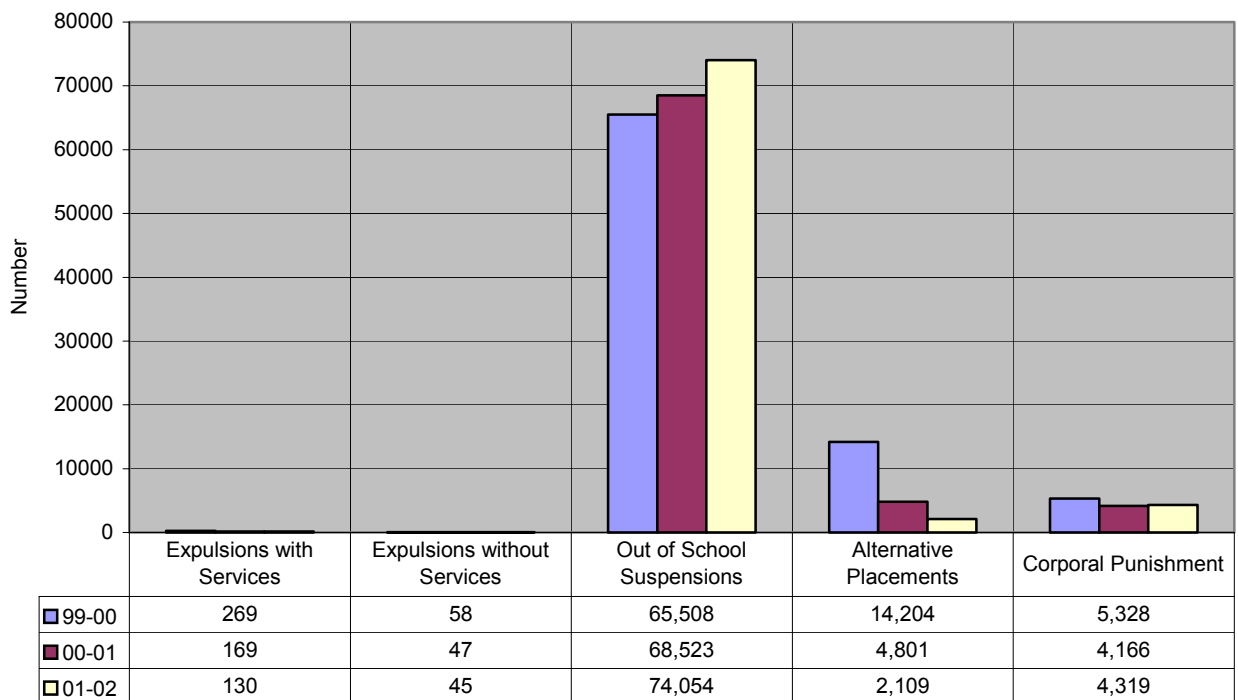

**Chart
4**

With regard to specific disciplinary actions, the results presented in **Chart 5** indicate that the number of out-of-school suspensions has increased each year of reporting. There were 13.0% more suspensions in 2001-2002 than the 1999-2000 school year. Deeper analysis into suspensions indicate that the two largest districts, Jefferson and Fayette, made substantial decreases in the number of total suspensions; thus, the increase in the state numbers are spread across the rest of the state. Expulsions, however, continued to decrease in number. The number of students expelled with services in '01-02 was less than half the number expelled in '99-00, (130 and 269 respectively). Expulsions without services continued to fall, but not as dramatically. This decrease in expulsions probably contributes partially to the increase in suspensions since infractions that may have resulted in an expulsion in earlier years are now resulting in suspensions instead. Nevertheless, it is incumbent upon schools and districts to make efforts to keep students in school as much as possible.

**Board Policy Violations
Comparison of Disciplinary Actions**

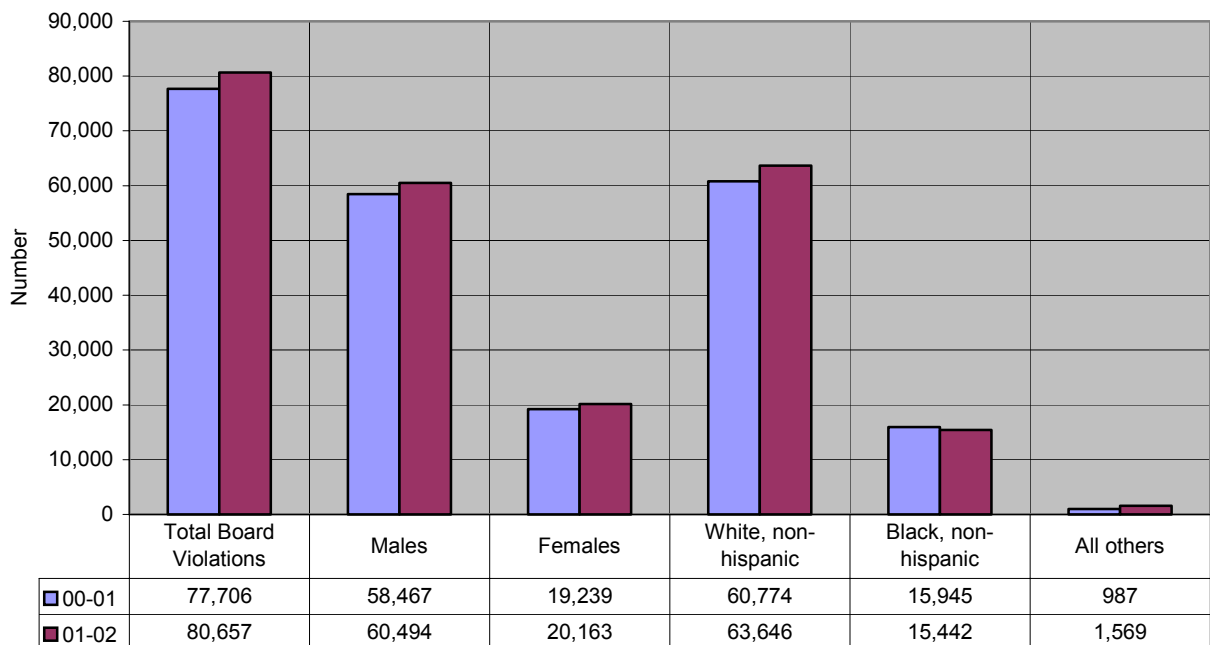

**Chart
5**

Disciplinary actions for board policy violations are disaggregated by gender and ethnicity in **Chart 6**. The results presented in **Chart 6** indicate that the number of disciplinary actions for board violations increased in 2001-2002 for males (up 3.5% from 2002-2001), females (up 4.8%), and white, non-Hispanics (up 4.7%) while the number decreased for Black, non-Hispanics (3.2%). There was also a substantial increase (59%) in violations by all other ethnic groups, although the actual increase in violations is quite small when compared to whites and blacks. The Kentucky Department of Education reports that approximately 10.3% of Kentucky's students are African-American. While the proportion of African-American disciplinary actions for board violations dropped from 20.5% in 2000-2001 to 19.1% in 2001-2002, African-Americans are still over-represented in disciplinary actions. In comparison, the proportion of disciplinary actions among white students (approximately 86.6% of the population) increased slightly (from 78.2% of total disciplinary actions for board violations in 2000-2001 to 78.9% of the total in 2001-2002). An examination of the interaction between race and gender indicates that African-American females account for 24.0% of female board violations while African American males account for 17.5% of male violations indicating over-representation of African-Americans is more pronounced with females than males. (See **Chart 12 in Appendix B.**) The proportion of African-American offenders (13.2%) as shown in Chart 2 is only slightly higher than their proportion (10.3%) in the total student population. Thus, the overrepresentation of African-Americans in disciplinary actions is related to recidivism. Schools and districts should explore alternative strategies that will reduce the overrepresentation of African-Americans in disciplinary actions.

**Total Disciplinary Actions for Board Policy
Violations by Population Group**

**Chart
6**

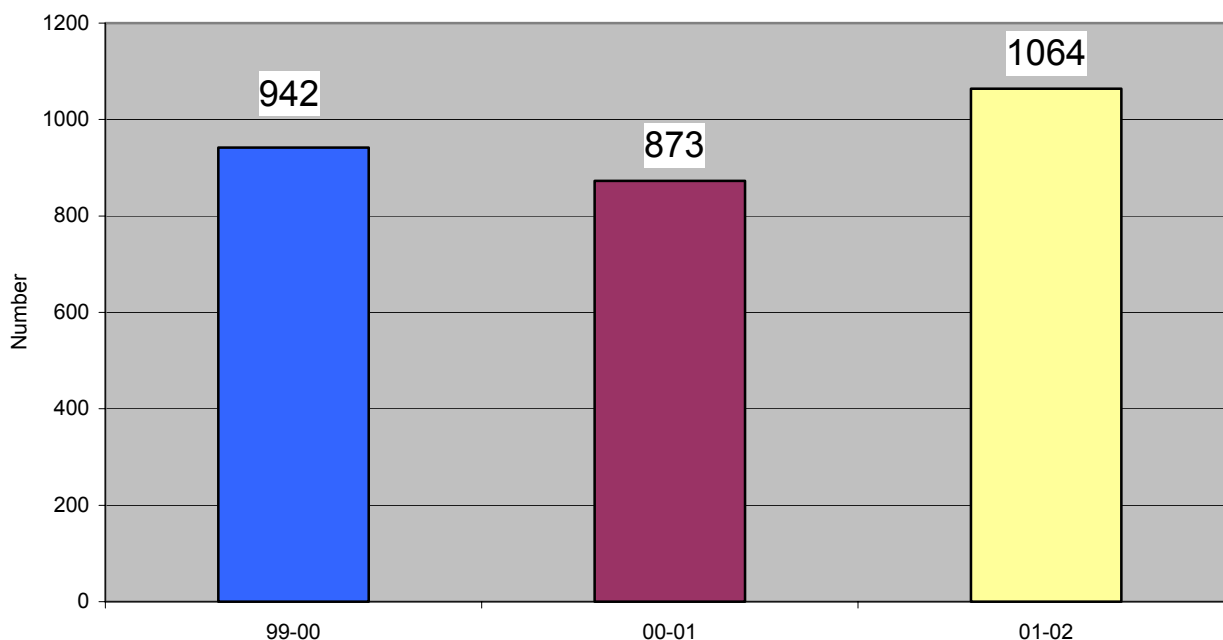

Disciplinary Actions for Law Violations in Kentucky Schools

The FBI Uniform Crime Reporting (UCR) Form was adopted at the beginning of this reporting process as a format for reporting law violations on school grounds or at school-related activities. Under this system, *Part I* crimes involve an illegal act directed against a person or property and are generally considered to be more serious offenses. *Part II* law violations may result in an arrest, but are considered less serious. Definitions of *Part I* and *Part II* crimes can be found in **Appendix A**. The following charts show the reported incidents of *Part I* and *Part II* law violations from 1999-2002.

Disciplinary actions for *Part I* law violations are depicted in **Chart 7**. Although the number of disciplinary actions for *Part I* law violations decreased between 1999-2000 and 2000-2001, the data reported for 2001-2002 reflects an increase of 22.0% over 2002-2001 and 13.0% over the 1999-2000 school year.

Total Disciplinary Actions for Part I Law Violations

Chart
7

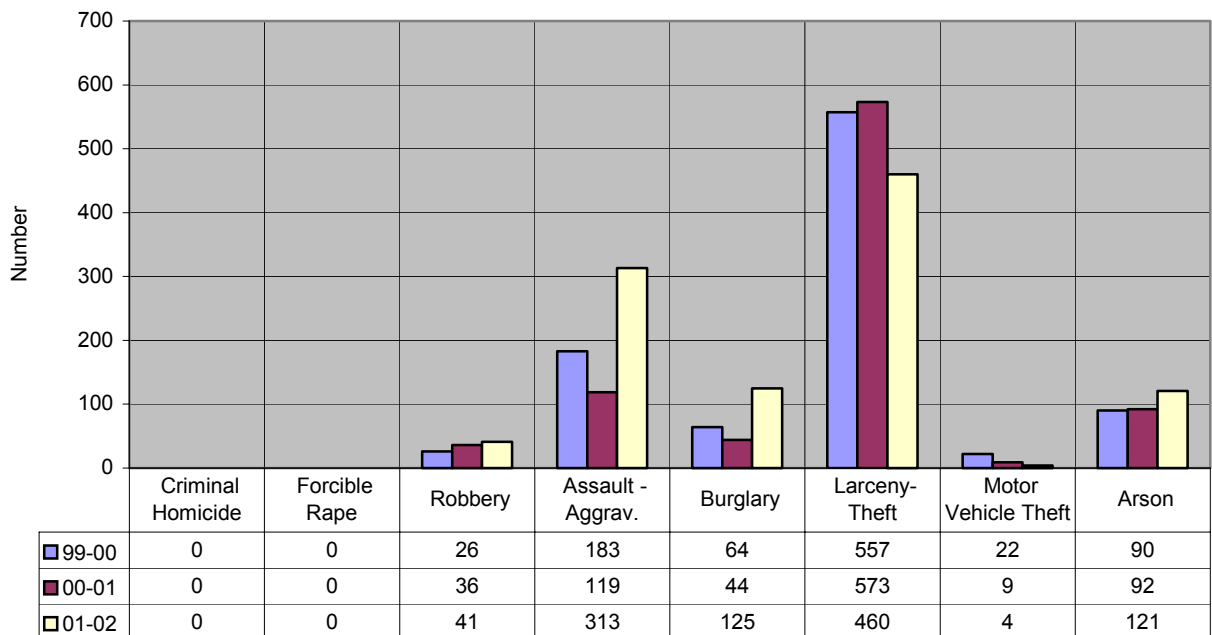

Part I law violations relate to acts against a person or property and are generally considered to be more serious offenses. Refer to Appendix A for definitions of *Part I* and *Part II* law violations.

Chart 8 shows the disciplinary actions for *Part I* law violations by category. There have been no reported incidents of homicide and forcible rape during the three years. A comparison of data from 1999-2000 and 2000-2002 reveals that larceny-theft decreased by 17.4% and motor vehicle theft decreased by 81.8% while burglary and robbery increased by 95.3% and 57.7% respectively. Arson also showed an increase of 34.4%. Disciplinary actions for aggravated assaults increased by 71% in 2001-2002 over the 1999-2000 year. Since an assault is directed towards a person not property, this increase is most troublesome and suggests a pressing need for districts to scrutinize this increase.

Disciplinary Actions for Part I
Law Violations by Category

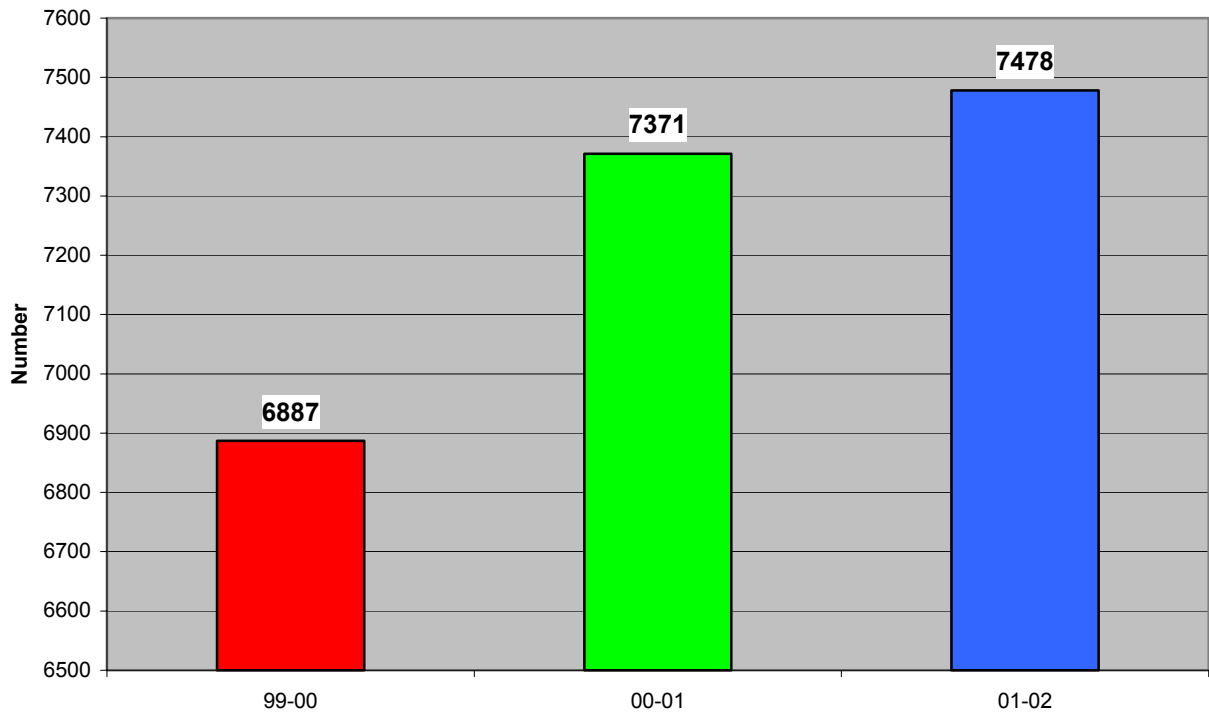

Chart
8

The results presented in **Chart 9** depict an increase of 8.6% in disciplinary actions for Part II law violations from 1999-2000 to 2001-2002. This steady increase suggests that a deeper examination of the cause of these violations is needed at the local level.

**Total Disciplinary Actions for
Part II Law Violations**

**Chart
9**

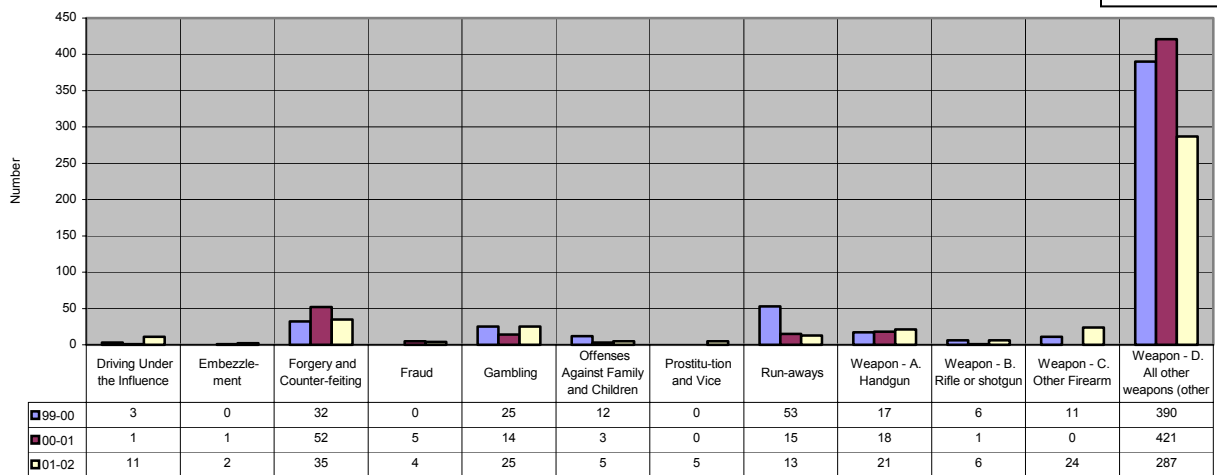

***Part II* law violations may result in an arrest, but are considered to be less serious than *Part I* crimes. Refer to Appendix A for definitions of *Part I* and *Part II* law violations.**

Disciplinary actions for *Part II* law violations by category are depicted in **Charts 10** and **11**. Although drunkenness and runaways decreased by 21.1% and 75.5% respectively, most categories have been up and down over the three years. This is particularly evident in the weapon offenses. While the number of Weapon A- handgun and Weapon-C other firearm violations increased, the number of Weapon D – all other weapons decreased. Adding all weapons together, there has been a 20.3% decrease in total weapons. This uneven pattern may indicate that there is still some inconsistency in categorization of weapons by school administrators. On the other hand, disciplinary actions for drug abuse violations have shown a steady increase with this year's data showing a 49.9% increase over 1999-2000 totals. Increased enforcement and consistency in administrative responses may partially contribute to the increase; however, this distressing inclination suggests that all educators, parents and community members need to work together to stem this tide.

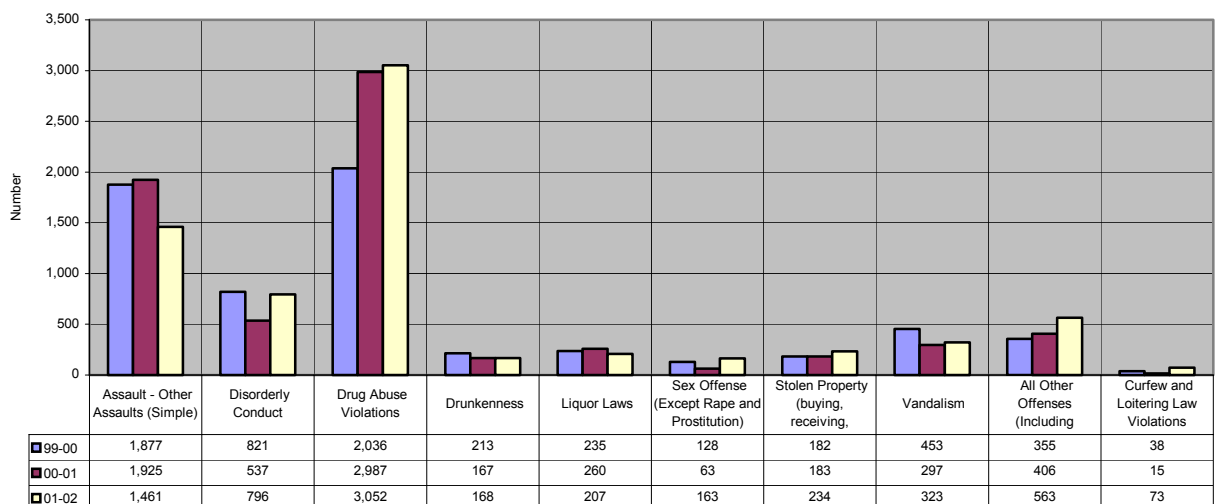

Total Disciplinary Actions for Part II Law Violations

**Chart
10**

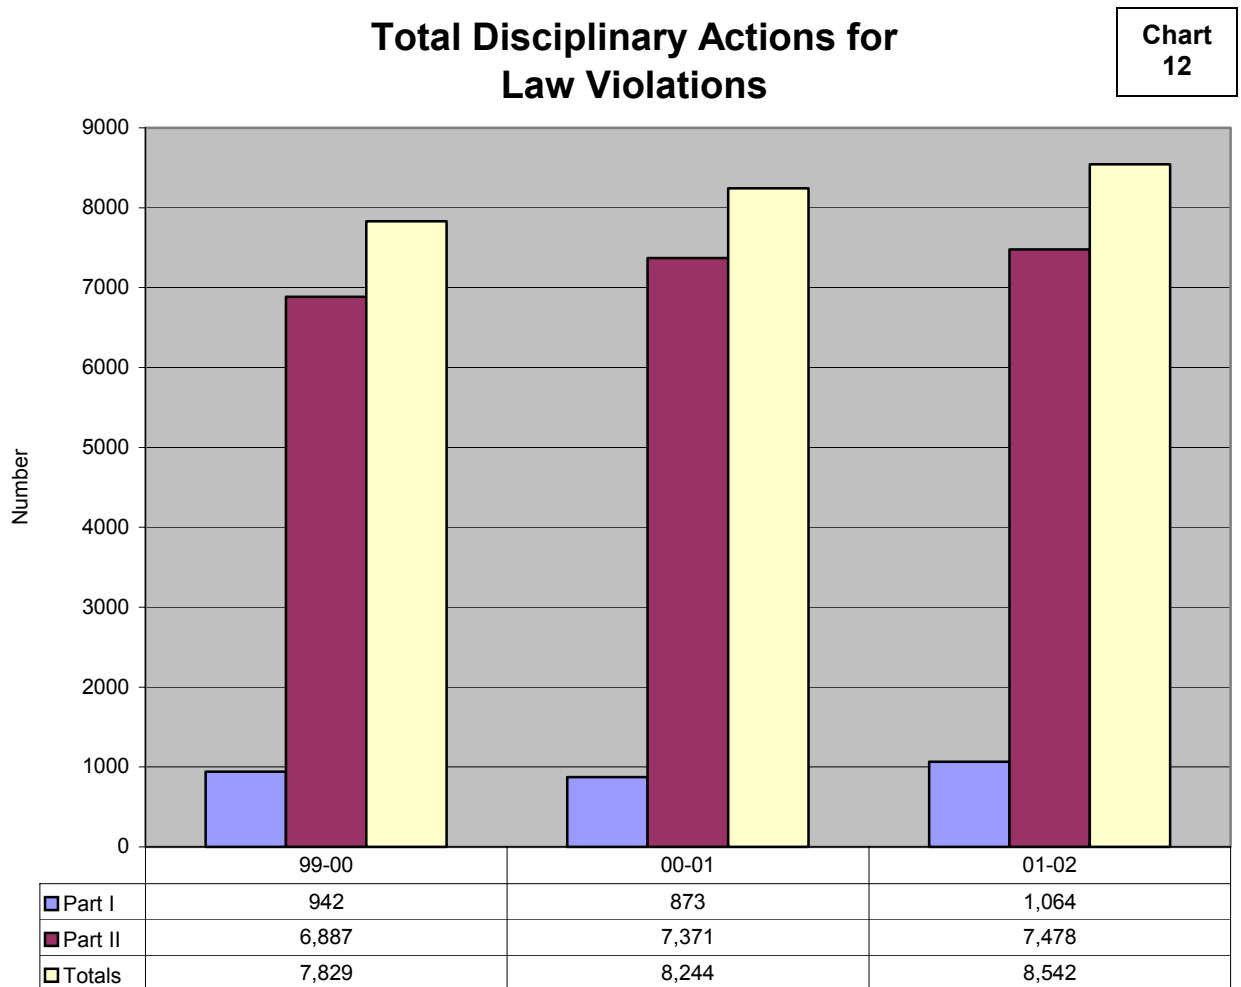

Total Disciplinary Actions for Part II Law Violations

**Chart
11**

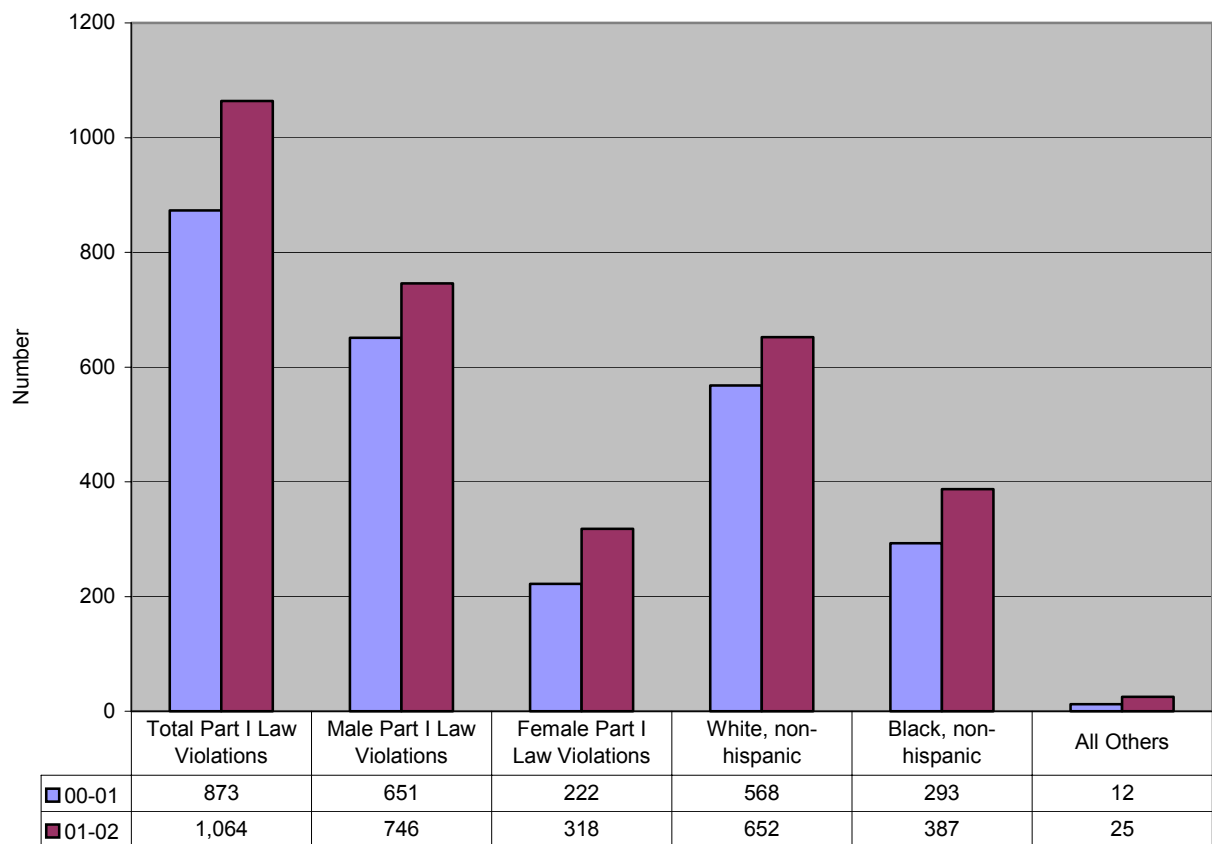

Overall, disciplinary actions relating to law violations have shown a steady increase as illustrated in **Chart 12**. From the 1999-2000 school year until the 2001-2002 school year, there was a 9.1% increase in disciplinary actions for *Part I* and *Part II* law violations combined. Can any of this be attributed to an additional alertness following the tragedy of September 11th ? Or is this the normal fluctuations incurred when data reporting is in the early stages and the process is still being honed? Additional time and analysis is necessary to determine cause and effect; however, the upward trend is still cause for additional questioning.

Disciplinary actions for *Part I* and *Part II* law violations are reported by ethnicity and gender in **Charts 13** and **14**. Here we see that representation of African-Americans in disciplinary actions for *Part I* and *Part II* law violations for 2002-2002 is 36.4% and 22.7% respectively. In Kentucky schools, African-Americans students are 10.3% of the total population. Consequently, African-Americans receive disciplinary actions for *Part I* law violations at nearly three times the rate expected from their representation in the student population and at twice the expected rate for *Part II* law violations. This trend follows national trends, as the Federal Bureau of Investigation (FBI) Crime in the United States - 2001 reveals that more than twice as many African-American juveniles are arrested as should be proportionate to the population. These findings suggest a national problem as well as a state one and suggest the need for further exploration at all levels. As noted in **Chart 2**, African-American offenders represent 13% of the total offenders. Since the offender number refers to a single count of individuals not to multiple offenses, the overrepresentation of African-Americans is related to recidivism.

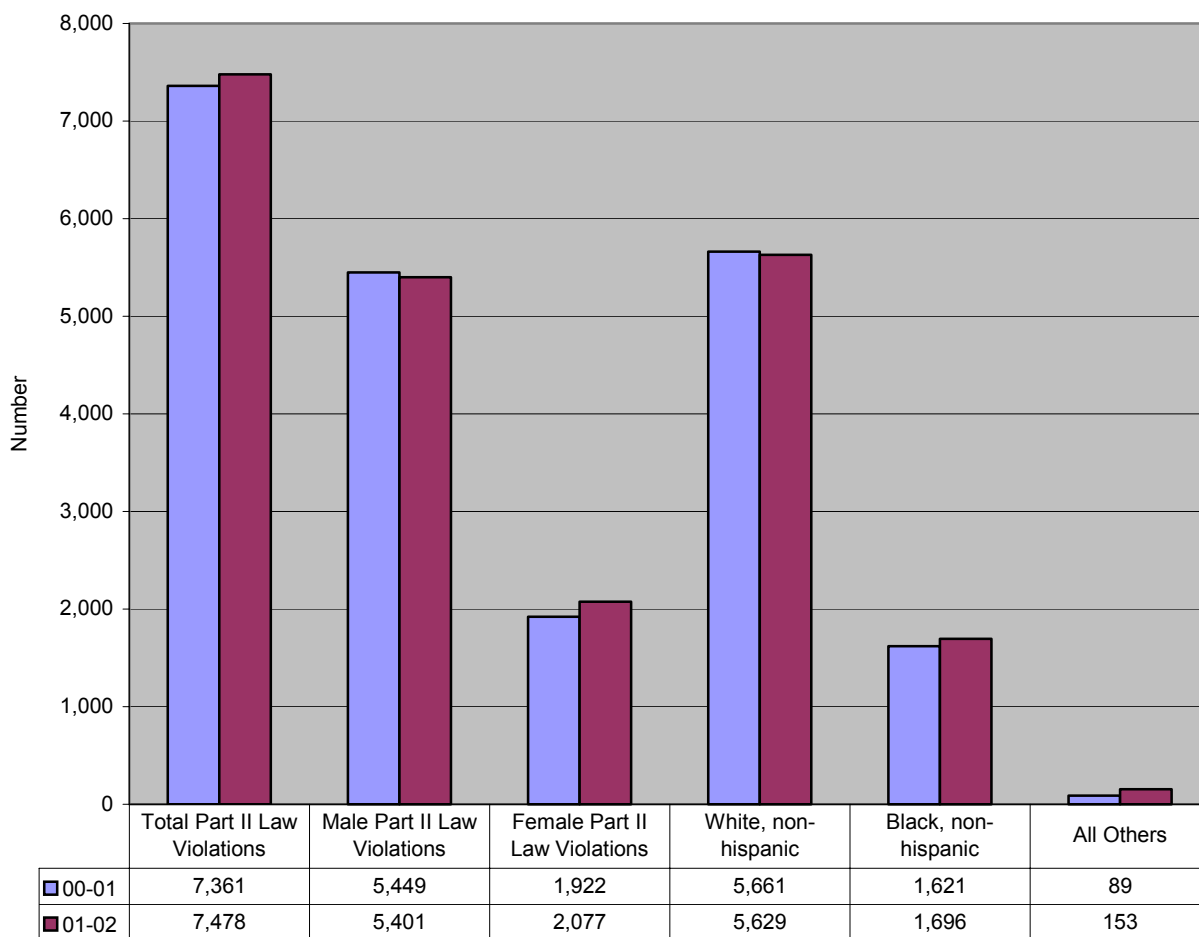

Total Disciplinary Actions for Part I Law Violations
by Gender and Ethnicity

Chart
13

Total Disciplinary Actions for Part II Law Violations by Gender and Ethnicity

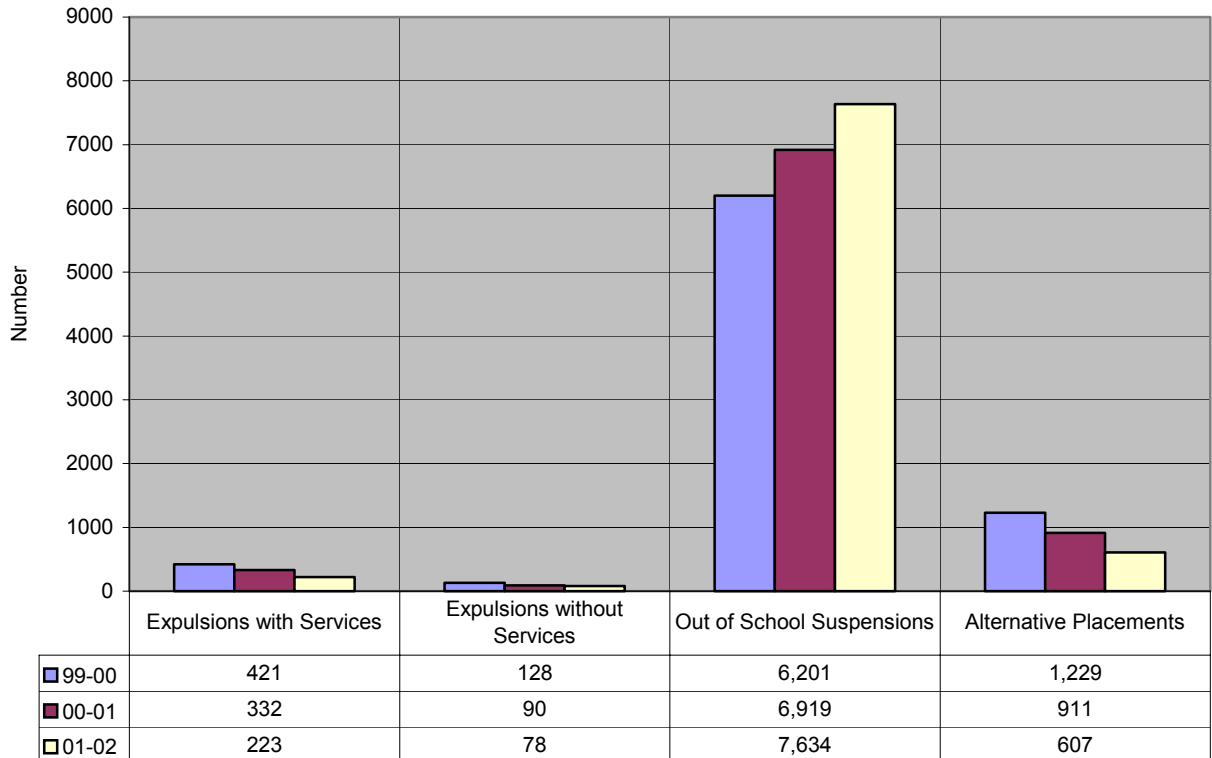

Chart
14

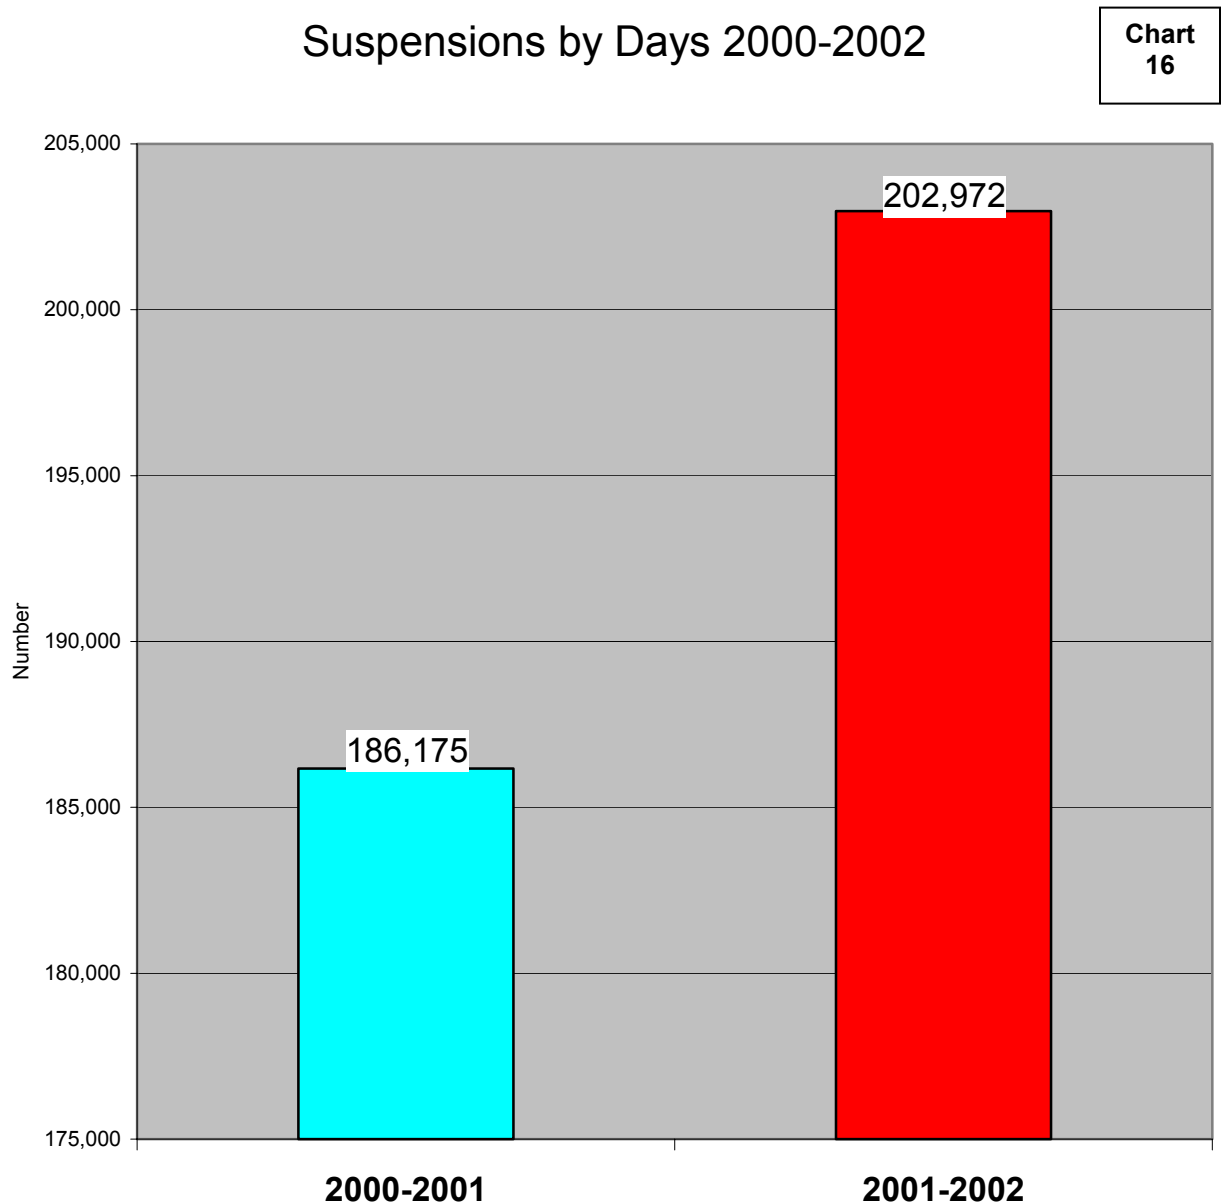

Disciplinary actions for all law violations are depicted in **Chart 15**. As seen with board violations, expulsions with and without services have declined since the 1999-2000 school year, but suspensions have seen a steady increase (23.1%) from 1999-2000 to 2001-2002.

**Law Violations
Comparison of Disciplinary Actions**

**Chart
15**

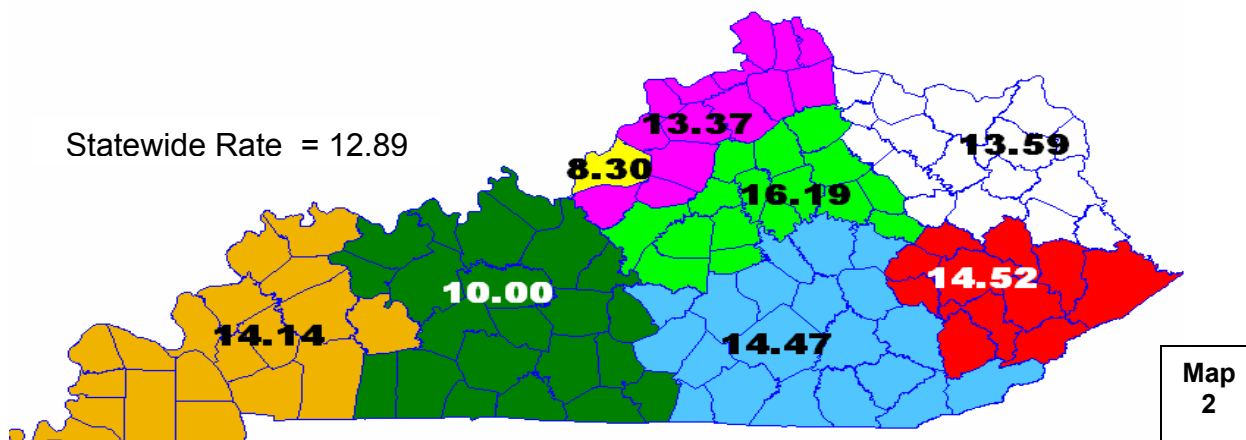

The concern over rising suspensions is magnified when considering the number of instructional days lost in the state of Kentucky to suspensions (See **Chart 16** below). The number of suspension days increased 9% in 2001-2002 over the 2000-2001 school year; however, this 9% converts to a total days lost of 16,797. With mounting concern over academic achievement, all schools must make every effort feasible to reduce the time out-of-school due to suspensions.

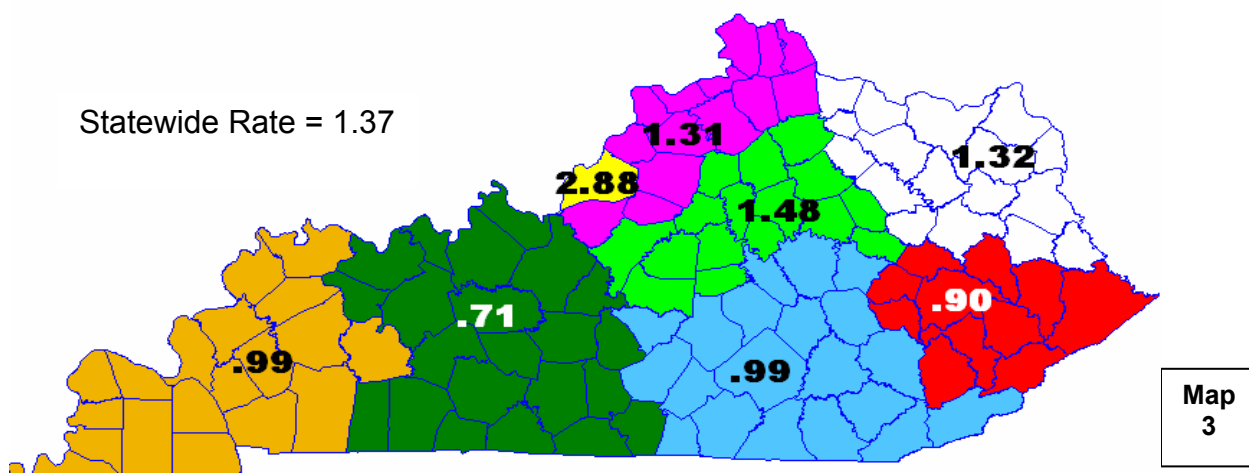

To facilitate comparisons between regions, the standardized measurement of rate per 100 is used on the following maps. The rate listed indicated how many incidents of disciplinary actions occurred in relation to every 100 students in the region.

Map 2 shows the regional rate of **disciplinary actions for board policy violations** for all students. Jefferson County reports the lowest rate, 8.30 per 100, and the central region the highest, 16.19.

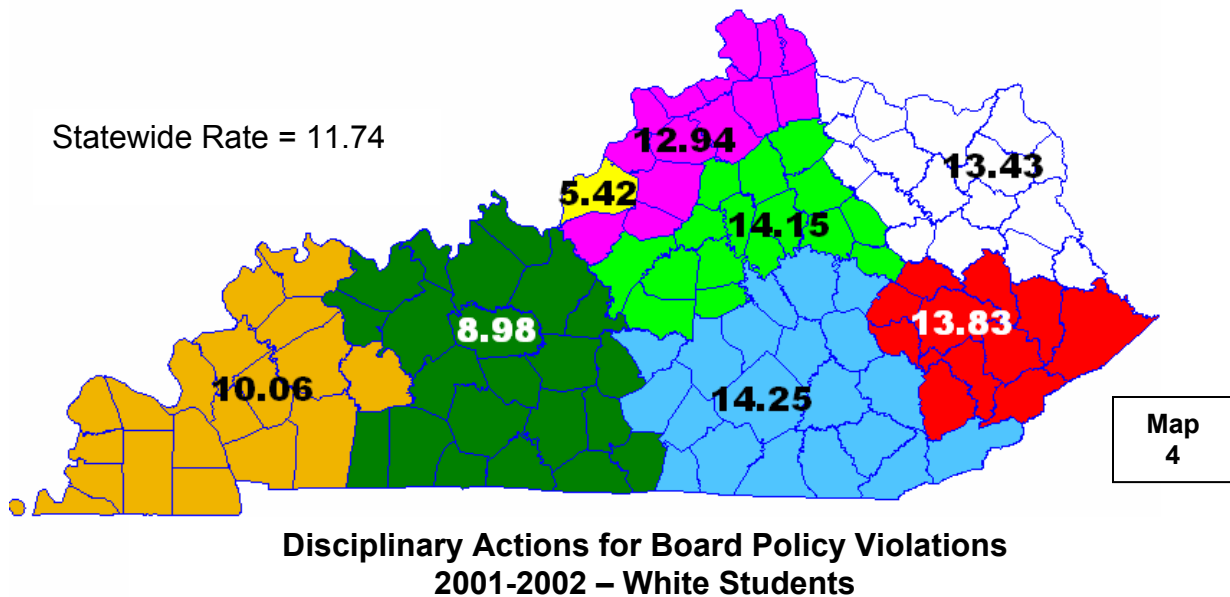

**Disciplinary Actions for Board Policy Violations
2001-2002 – All Students**

Disciplinary actions for law violations are shown on **Map 3**. The Southwest region reports the lowest rate at .71 per 100 and Jefferson County at 2.88 reports the highest rate.

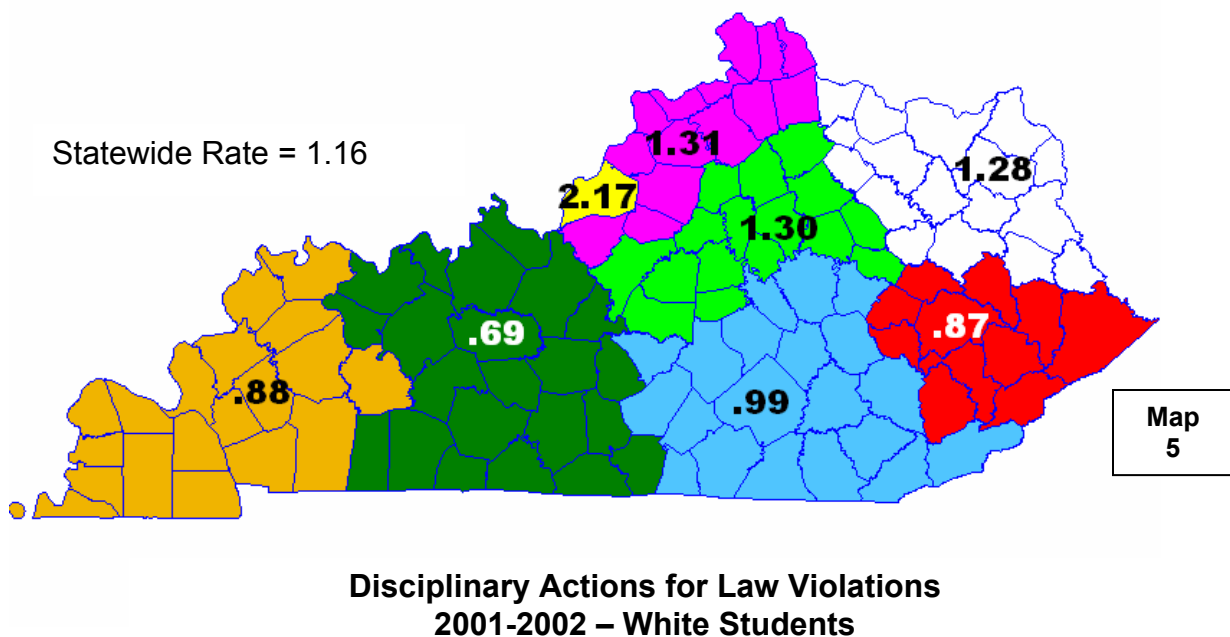

**Disciplinary Actions for Law Violations
2001-2002 – All Students**

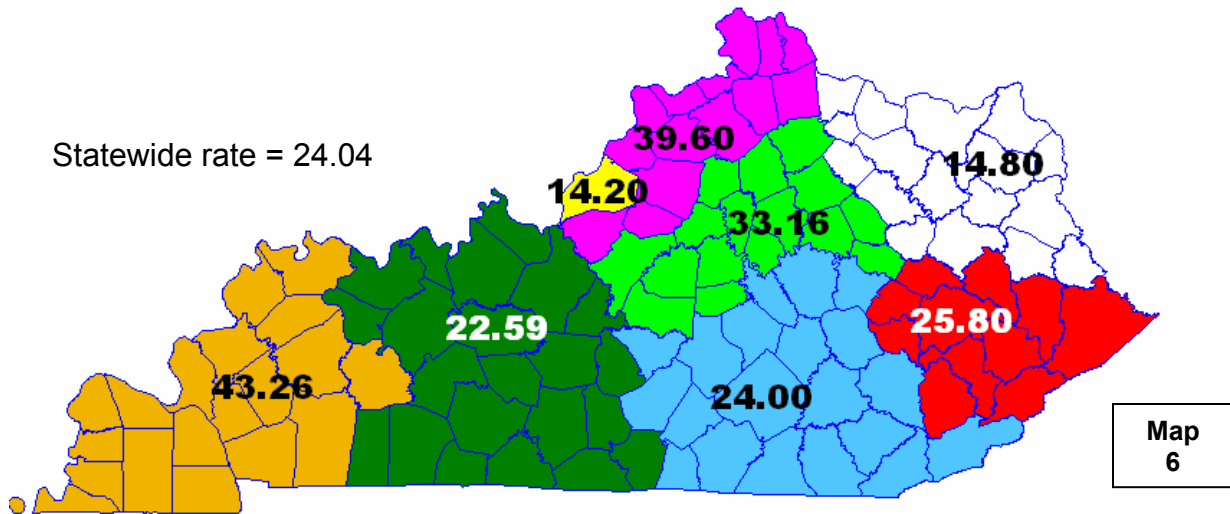

Map 4 displays the **disciplinary actions for white students for board violations**. Jefferson County reports the lowest rate, 5.42 per 100, for disciplinary actions for board violations while the south central region reports the highest rate, 14.25.

The lowest rate of **disciplinary actions of white students for law violations** (**Map 5**) is reported by the Southwest region, .69 per 100, while the highest rate is reported by Jefferson County, 2.17; however, note that the difference between the highest rate and the lowest rate is little more than one student per hundred.

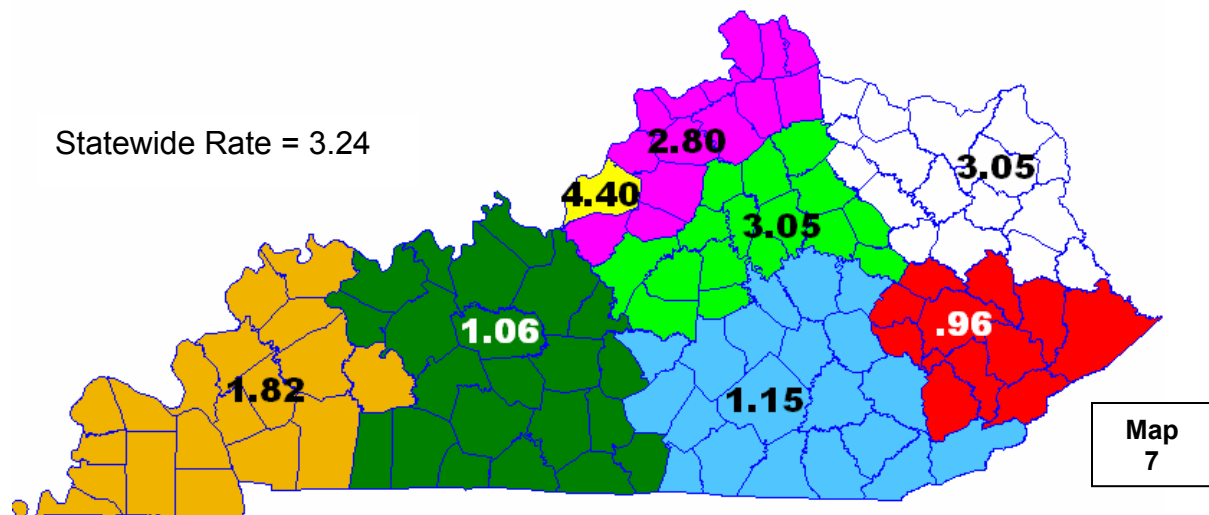

Jefferson County reports the lowest rate of **disciplinary actions for African-American students for board policy violations**, 14.20, while the west region reports the highest rate of 43.26 per 100. (Map 6).

**Disciplinary Actions for Board Policy Violations
2001-2002 – African-American Students**

The southeast region reports the lowest rate, .96, of **disciplinary actions for African-American students for law violations** while Jefferson County has the highest rate at 4.40 per 100 as shown in Map 7.

**Disciplinary Actions for Law Violations
2001-2002 – African-American Students**

Districts are encouraged to examine their data over the three years of reporting. Additionally, districts are encouraged to make comparisons to other districts of similar size, to their region, and to the state. Building level data should make similar comparisons with other schools in their district as well as comparisons to their district, region and the state. Data should be reviewed in context to understand the full meaning of the data and to avoid misinterpretation.

Section IV District Level Data

Occurrence of School District Disciplinary Consequences for Law and Board Violations

Table I reports the number of disciplinary actions for law and board violations for each Kentucky school district from the 1999-2000 school year until the 2001-2002 school year. County districts (in bold type) are organized alphabetically with independent school districts shown beneath the county school district they adjoin. The data in this table represent the raw number of reported disciplinary consequences associated with specific incidents. Attendance numbers collected by the Kentucky Department of Education (KDE) are shown in the enrollment column. Membership data are collected once yearly and is the most accurate snapshot of a district's total number of students.

Note: Local school boards are responsible for determining what disciplinary consequences are permissible in their schools. Some school boards have enacted policies prohibiting the use of corporal punishment; therefore, the data contained in the following table under corporal punishment reflects only those districts where it is allowed.

Table
1

District Totals – Disciplinary Consequences of Law and Board Violations 1999-2002

(School Districts Grouped by County Alphabetically
with Independent Districts Listed Below Their County)

1= Expulsions with educational services
2= Expulsions without educational services
3= Suspensions
4= Alternative Placements
5= Corporal Punishment

L = Law violations
B = Board violations

Standard Scale of Measurement

The following tables utilize a standard scale of measurement, rate per 100, to facilitate comparison between districts of dissimilar sizes.

Therefore, the rate listed indicates how many incidents occurred in relation to every 100 students in the given districts. Districts are grouped by size to allow for more meaningful comparisons and due to the small number of expulsions across the state, expulsions with and without services are combined in these tables. District rates for

disciplinary actions for all students are shown in **Table 2**. The same data are shown in **Tables 3** and **4**, but have been disaggregated to show the rates for white and African-American students.

Note: A relatively small number of incidents can have a more dramatic effect on the rate per 100 in very small districts and in districts with a small number of African-Americans which may distort interpretation.

Districts **not found** in **Tables 3** and **4** were not reported at the district level because the number of African-American students was so small that reporting the numbers might make them “personally identifiable” in violation of federal privacy laws (Federal Educational Rights and Privacy Act, FERPA). Because their numbers were so small in most counties the concern for violating the privacy laws also results in the omission entirely of Asian, Hispanic, American Indian and other racial groups from the tables.

1. Expulsion with educational services
2. Expulsion without educational services
3. Suspension
4. Alternative placement
5. Corporal punishment

2000-2002 Disciplinary Consequence Rates for Law and Board Violations

**Table
2**

School Districts with Fewer than 2,500 Students
Rate per 100 Students

L = Law violations

*** State rate for '01-02 is for African-American students while the state rate for '00-01 is for all students.

The current Safe Schools Report reflects four years of data collection and analysis by the Kentucky Center for School Safety. During that time districts have responded admirably in upgrading and refining their data collection and entry procedures; consequently, confidence in the accuracy of the numbers has improved dramatically. Simultaneously, KDE and KCSS have polished their collective efforts thereby producing a report without additional agency involvement. All of these efforts have resulted in a report that is not only comprehensive with a high level of accuracy, but is also available (for the first time) before the start of comprehensive planning.

The report does pose a number of questions that warrant discussion at the state, district and school levels.

1. What are the factors relating to the significant increases in:
 - a. Drug Abuse,
 - b. Fighting,
 - c. Threatening/intimidation (bullying and harassment),
 - d. Dangerous instruments (carrying or using), and
 - e. Aggravated assault
2. With the overrepresentation of African-Americans in disciplinary actions related to repeat offenders, what strategies can be implemented to target this population and reduce recidivism?
3. Will increased supervision and less tolerance of prohibited behavior ultimately lead to a safer school and a better learning environment?
4. Are students' concerns over school safety forging better relationships with teachers and thereby breaking the "teenage code of silence" regarding informing their teachers about student infractions? Additionally, are students using anonymous hotlines, electronic and school safety drop boxes to inform on offenders?

While questions such as these require the wisdom of school staff, parents, community members and students themselves, the end result of a safe learning environment should be the impetus for a combined effort.

The Kentucky Center for School Safety plans to incorporate into their site visits to the districts the results of this data. KCSS will also continue to emphasize technical assistance and training focused on issues of concern detailed in this report, such as behavior management training, crisis management, substance abuse prevention, etc.

The Kentucky Center for School Safety remains ready to assist schools and communities in improving the safety of all students to ensure that learning can occur so that Kentucky's students can compete academically with the rest of the nation.

Appendix B*

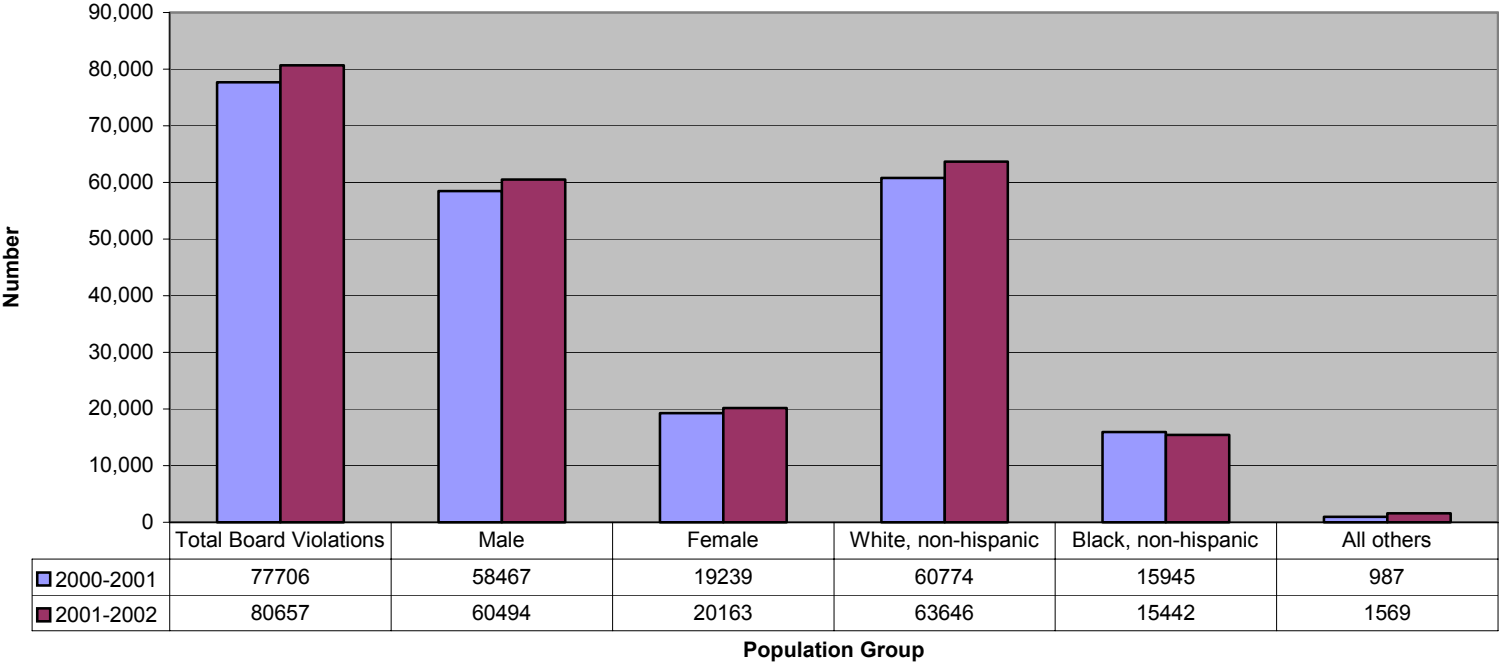

Charts of Board Policy Violations

*Additional data have been reported for the 2000-2001 and 2001-2002 schools years that were not reported in the 1999-2000 report.

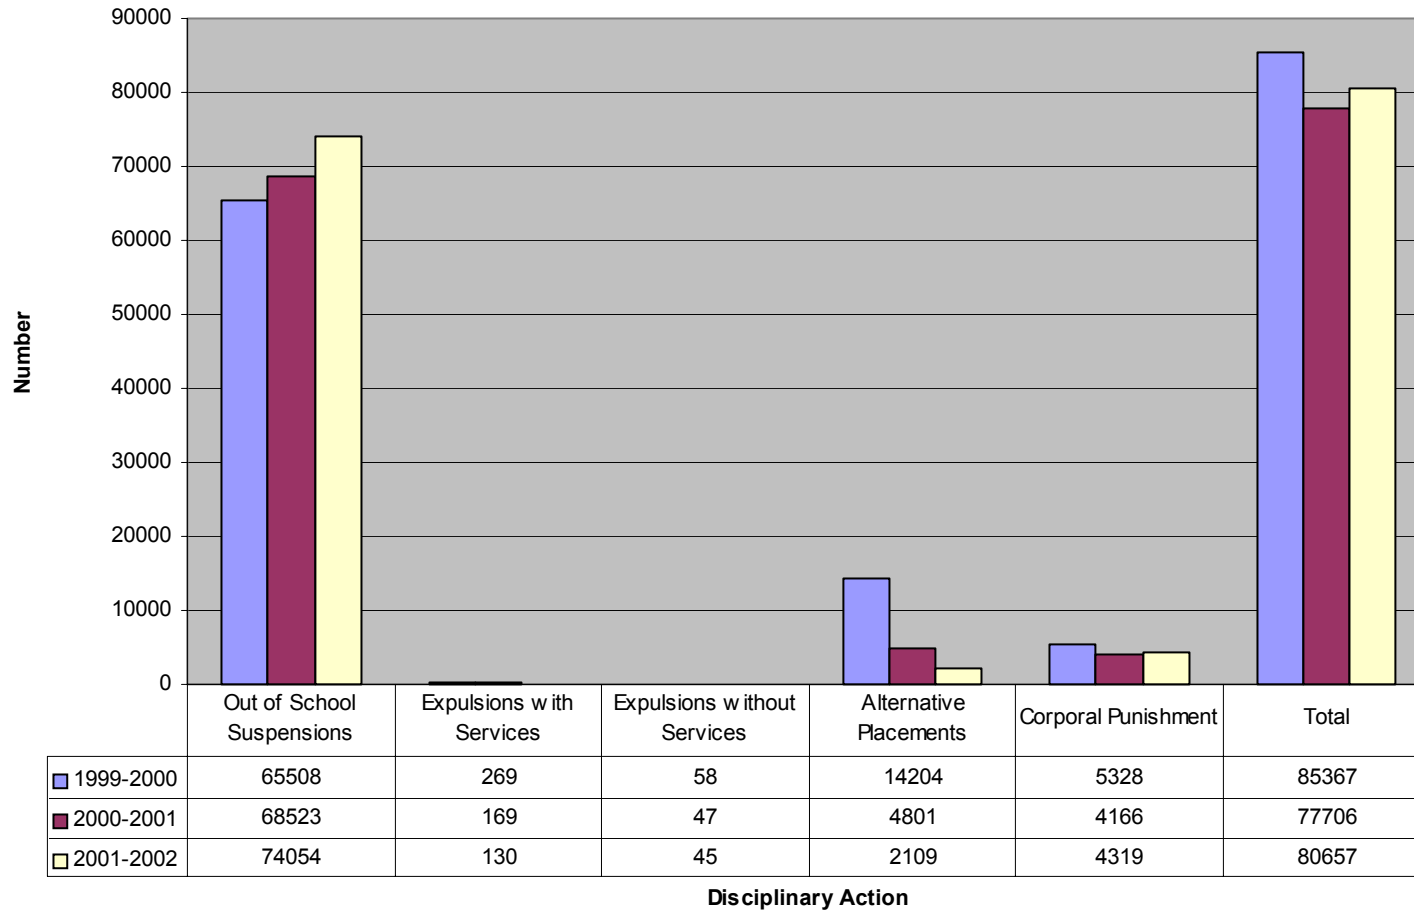

Disciplinary Actions for Board Policy Violations Totals by Category

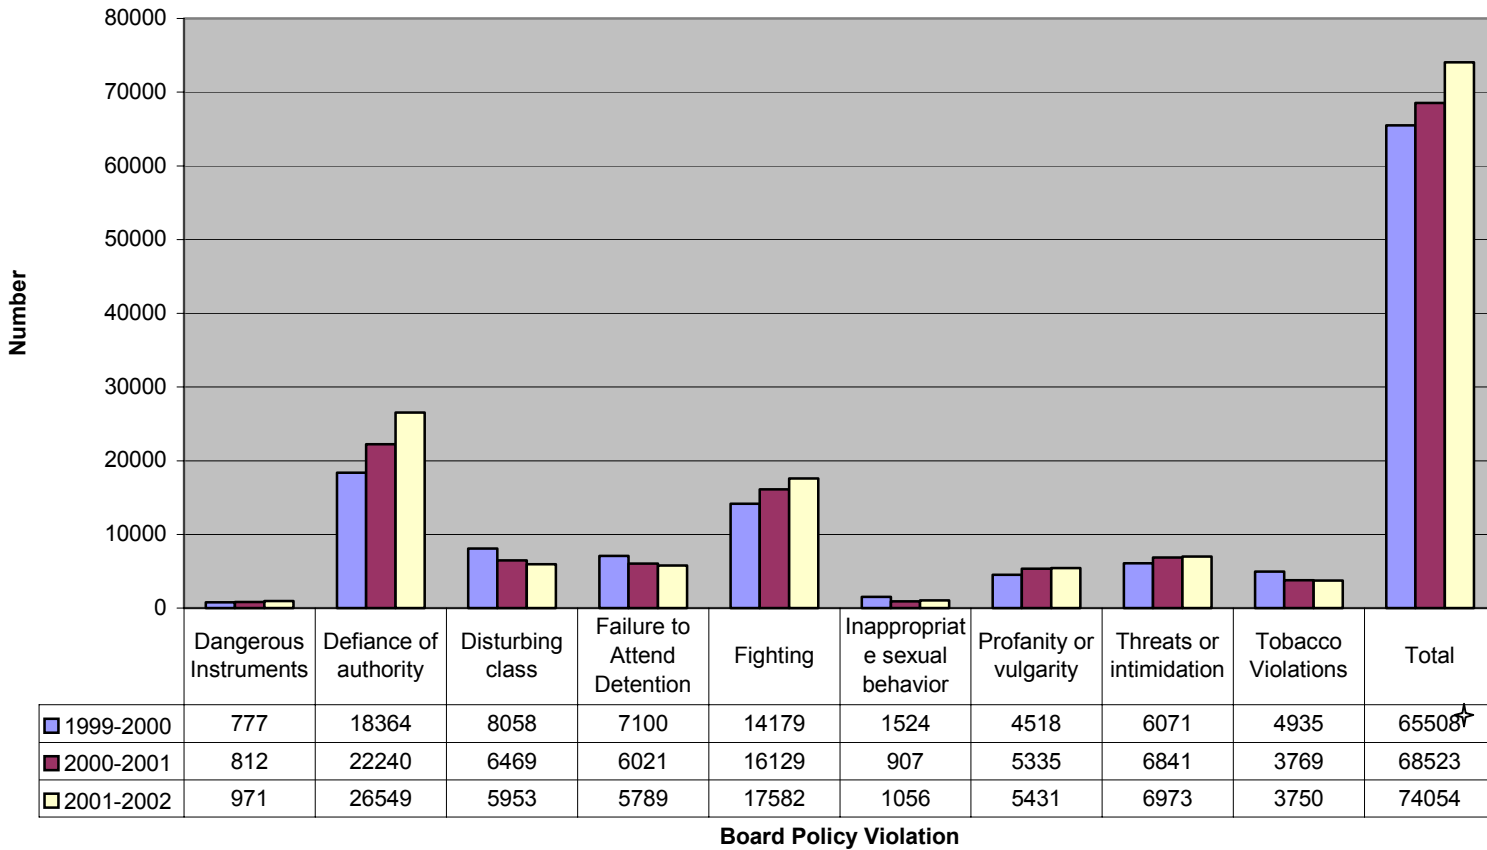

**Disciplinary Actions for Board Policy Violations
Totals by Population Group**

Board Policy Violations Comparison of Disciplinary Actions

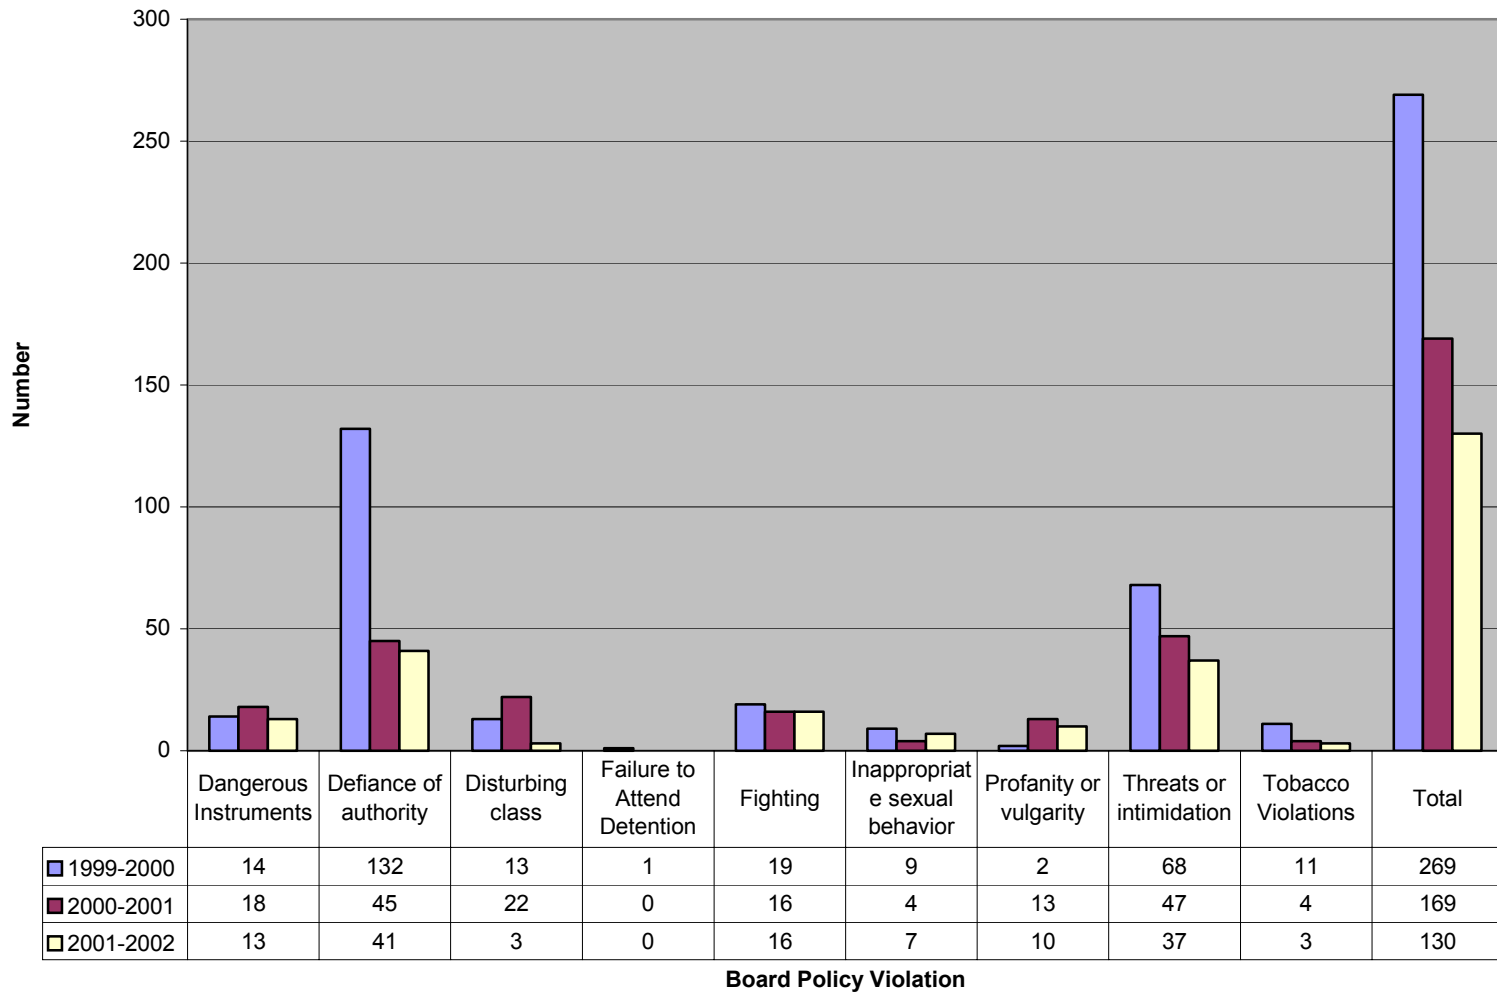

Board Policy Violations Out-of-School Suspensions

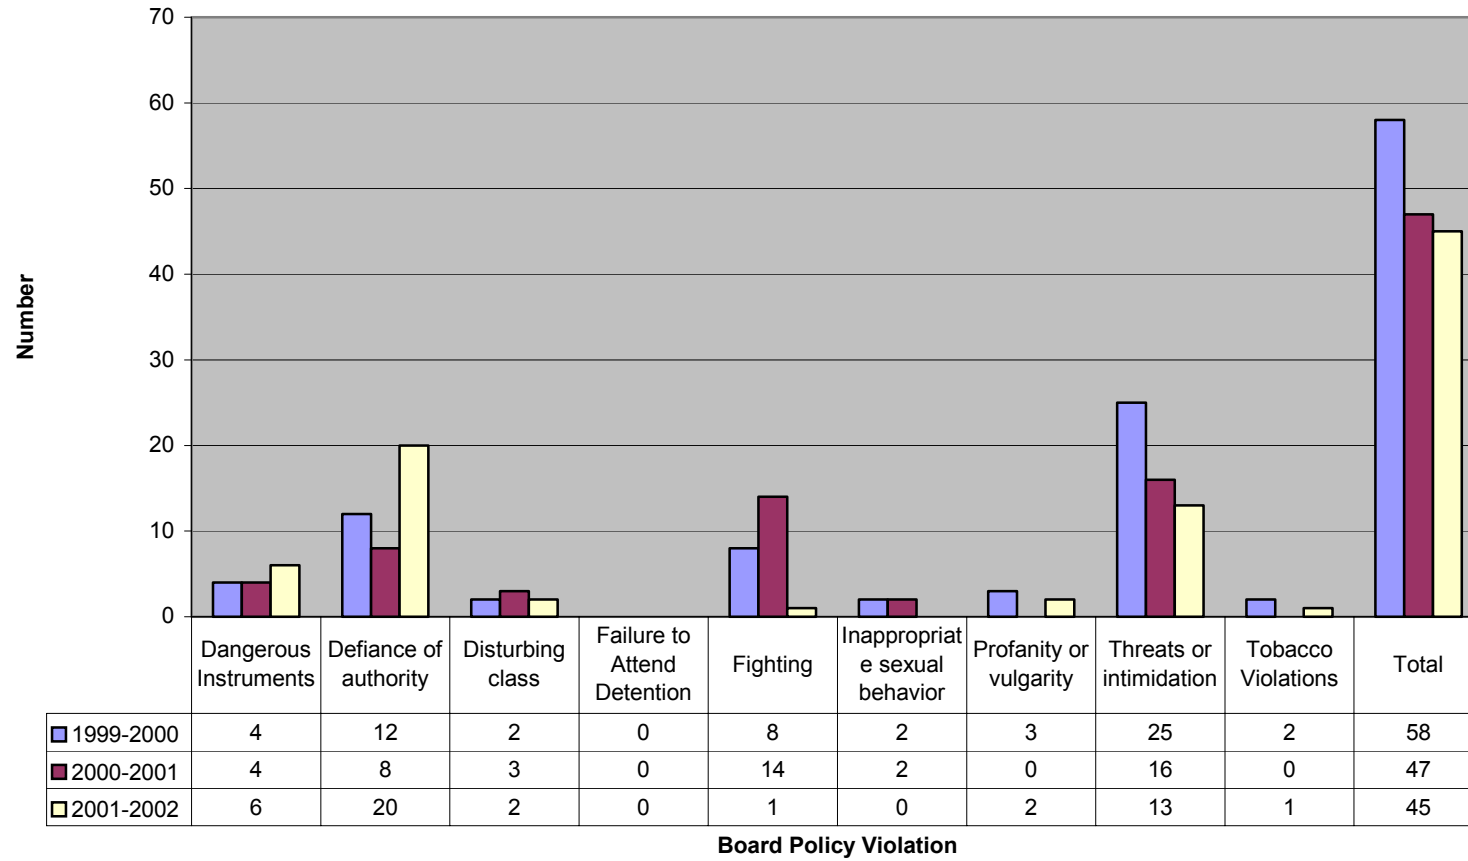

*Review of the 1999-2000 report disclosed a discrepancy between the total reported and the sum of all categories. Further analysis indicates that the total, 65508, is correct and is therefore used consistently throughout the report.

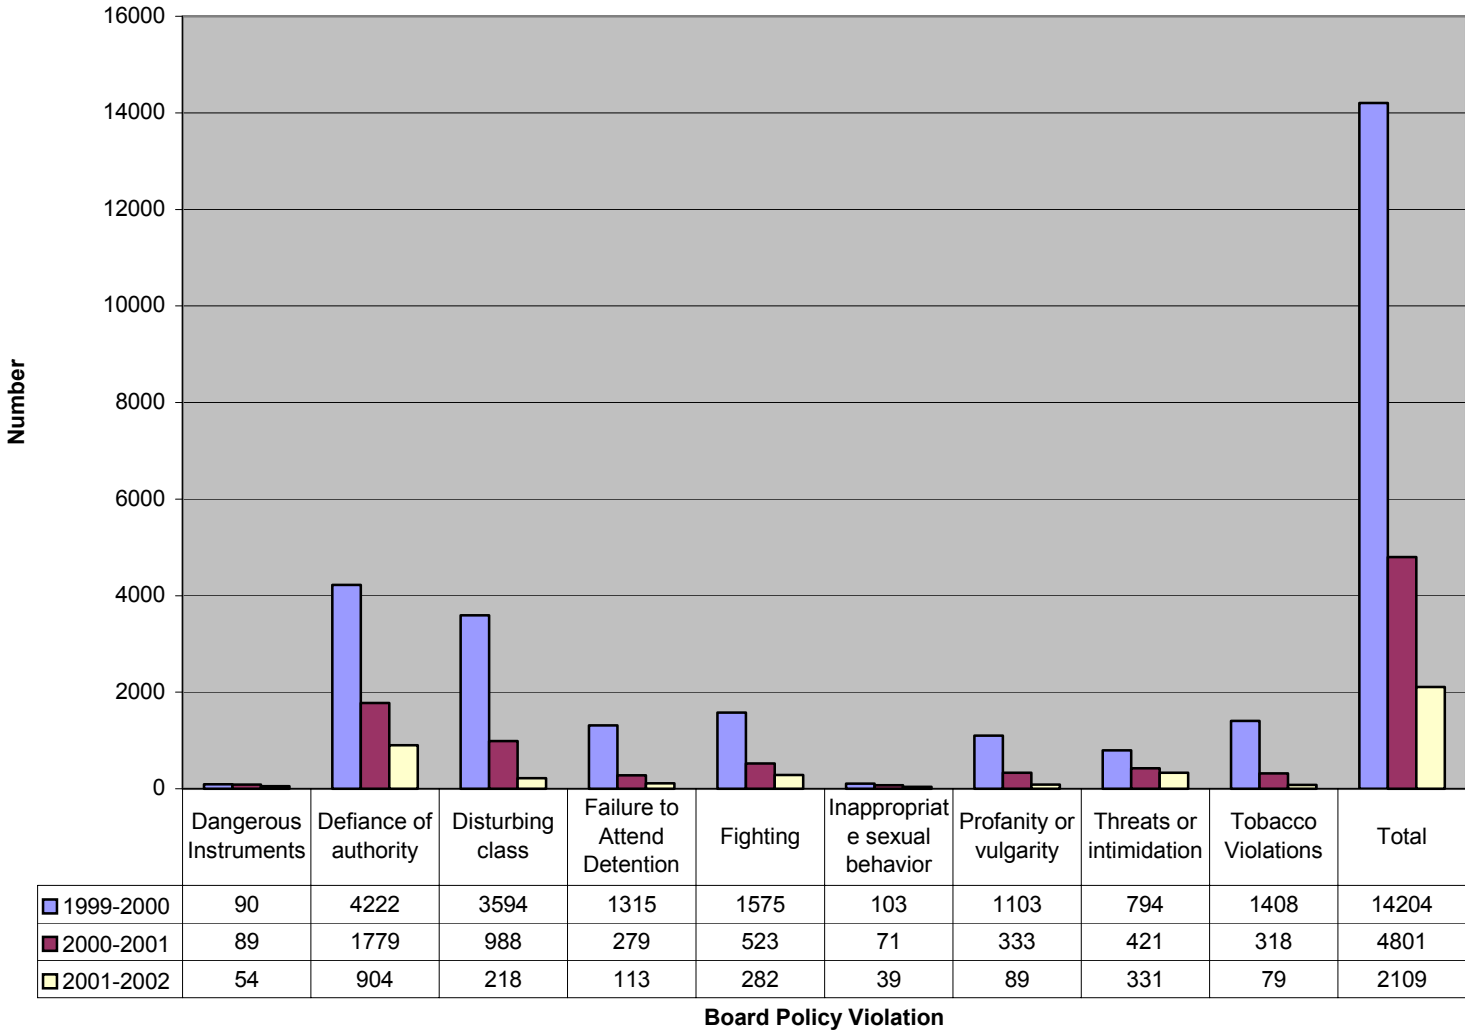

Board Policy Violations Expulsions with Services

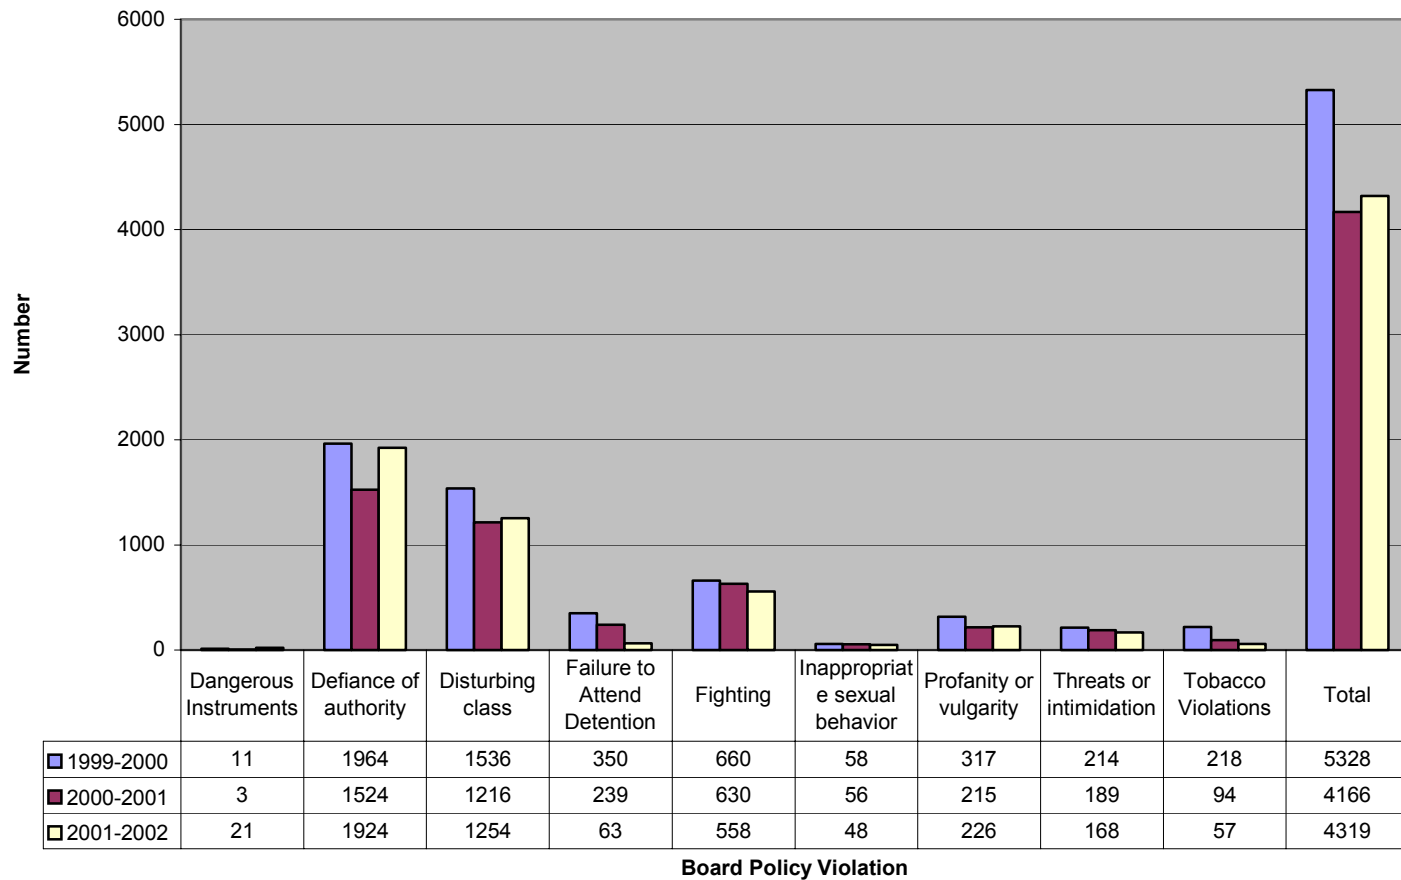

Board Policy Violations Expulsions without Services

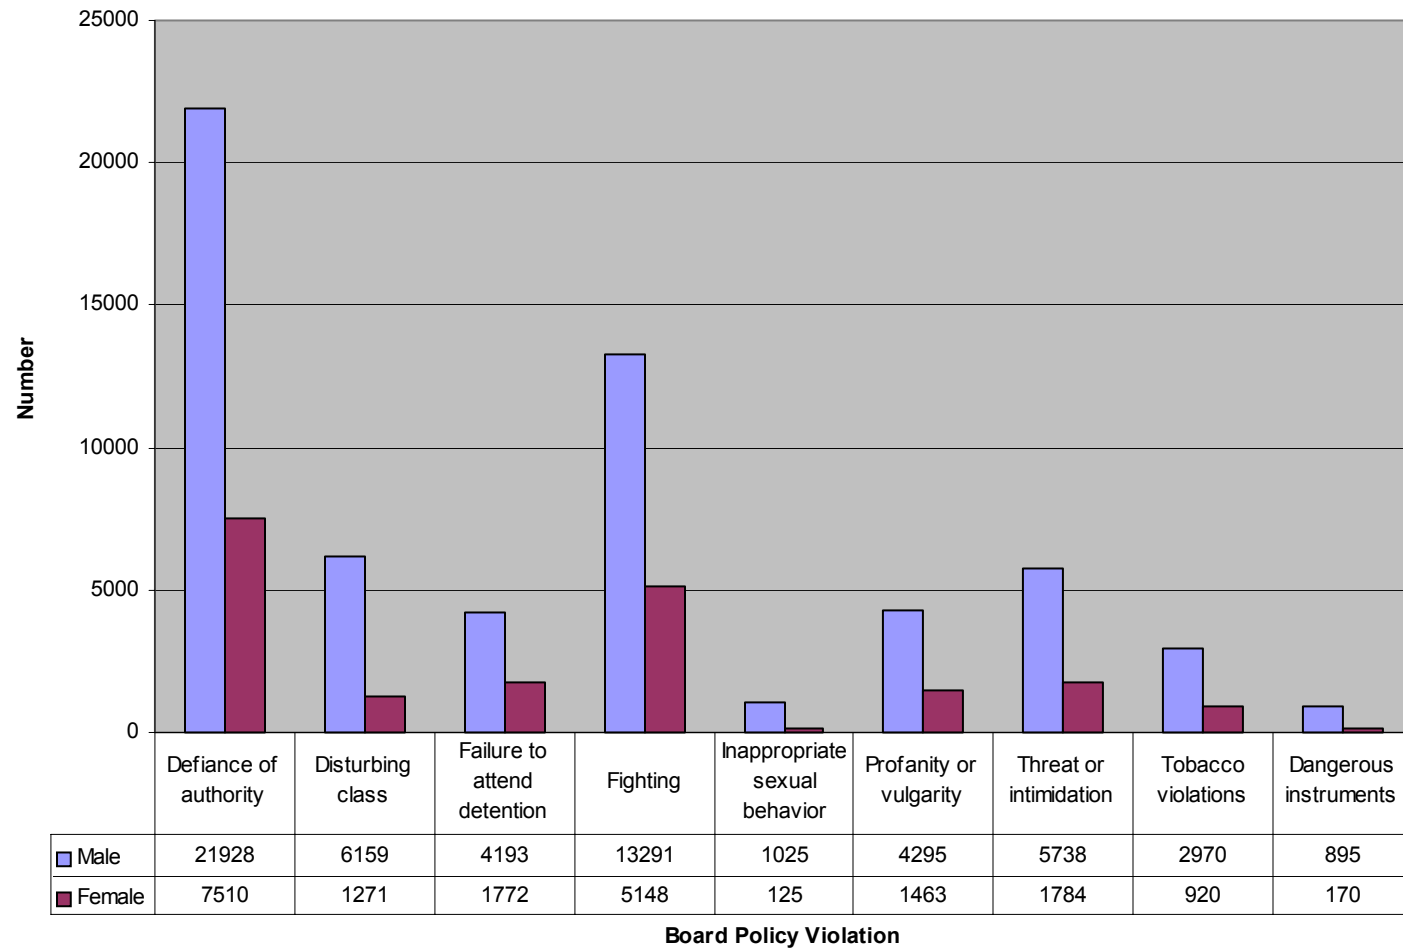

Board Policy Violations Alternative Placements

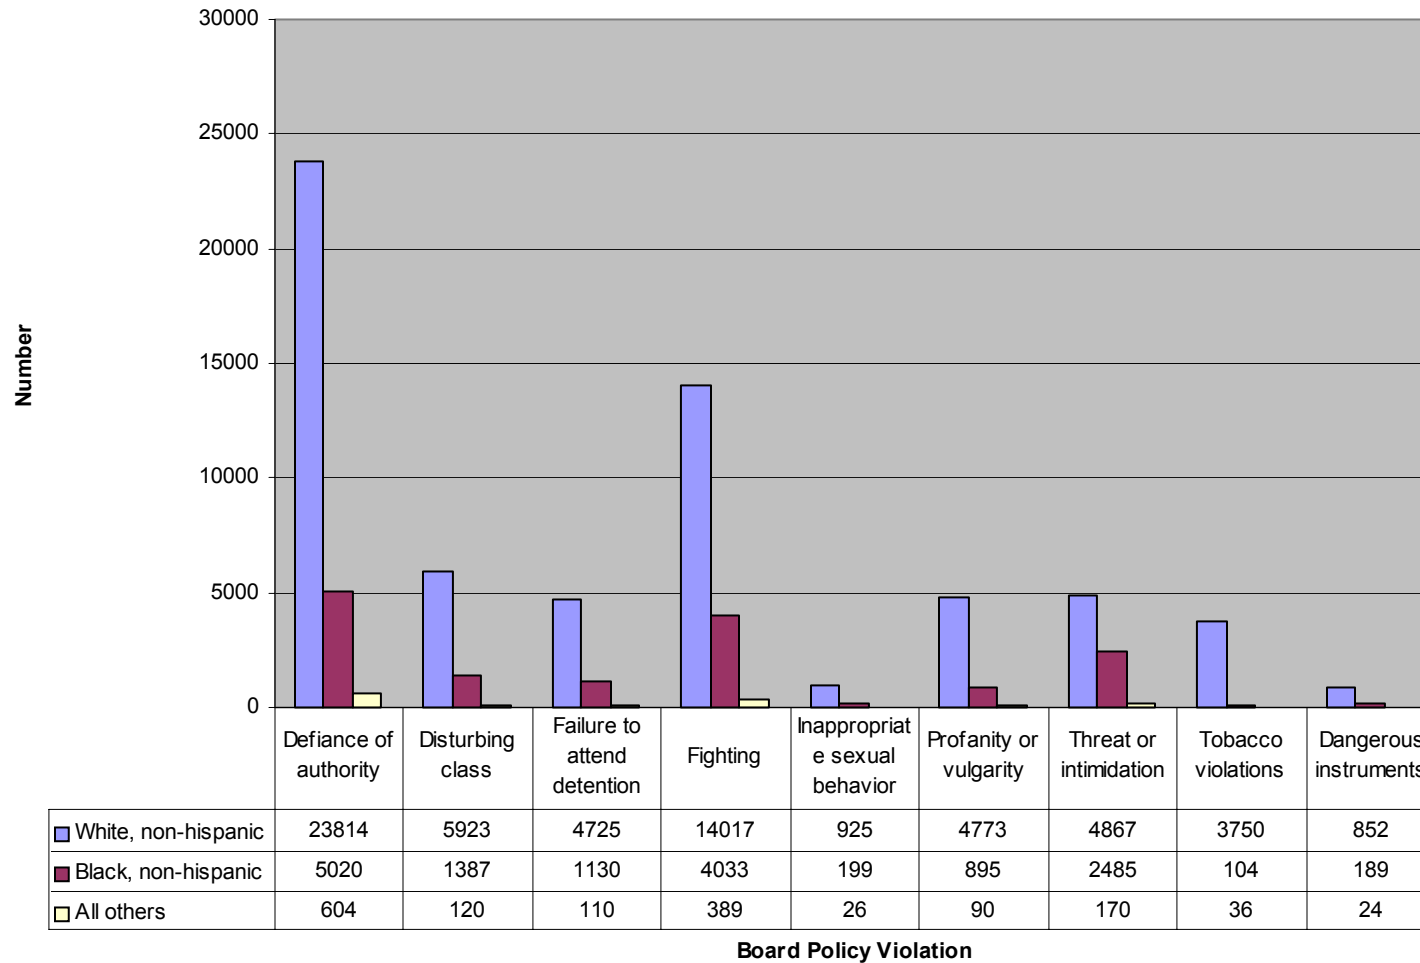

Board Policy Violations Corporal Punishment

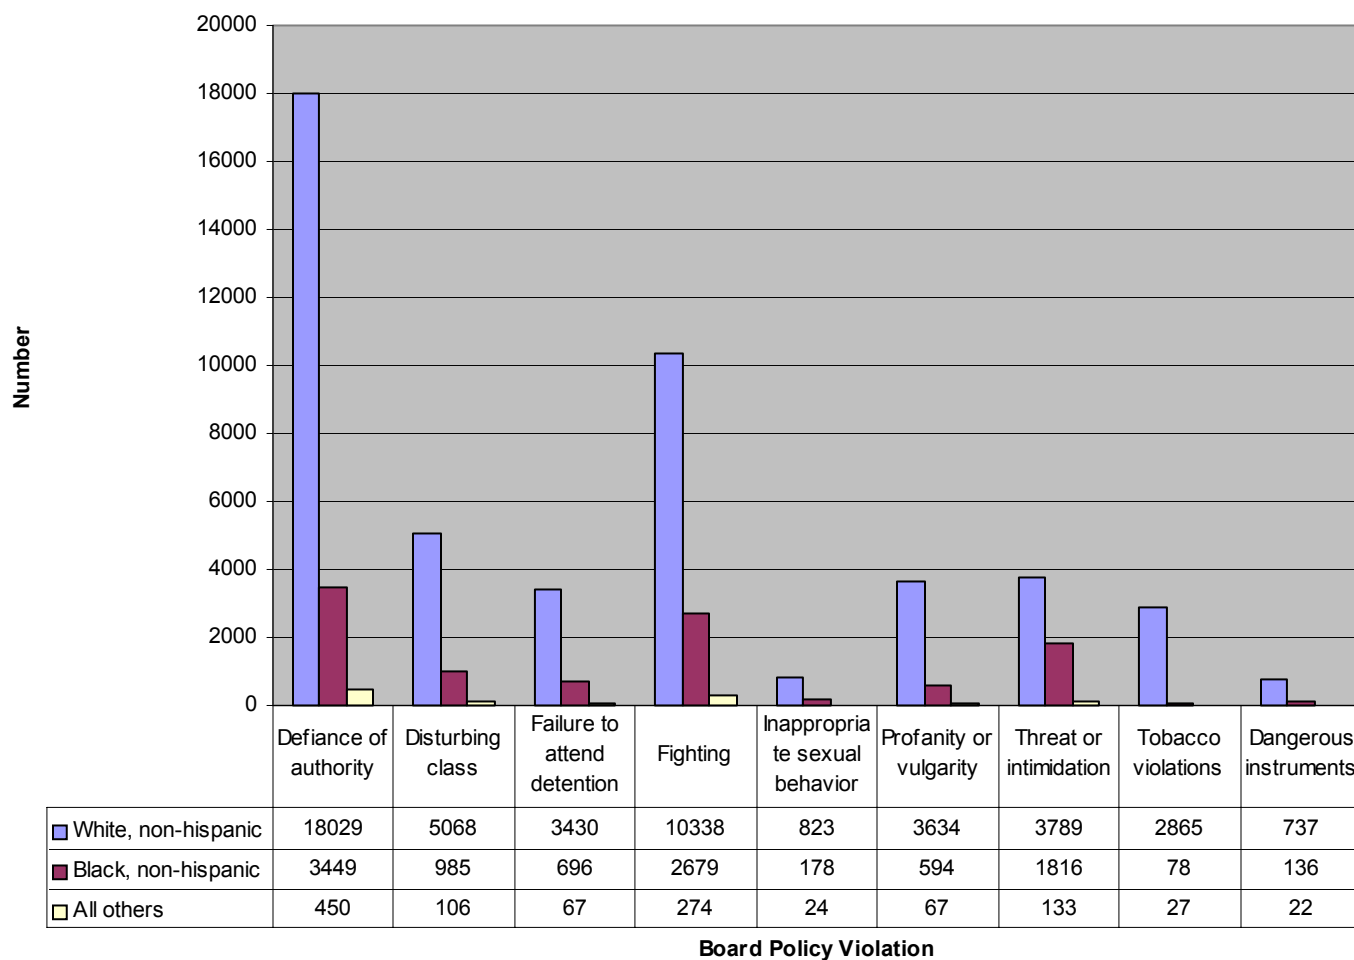

Disciplinary Actions for Board Policy Violations By Gender 2001-2002

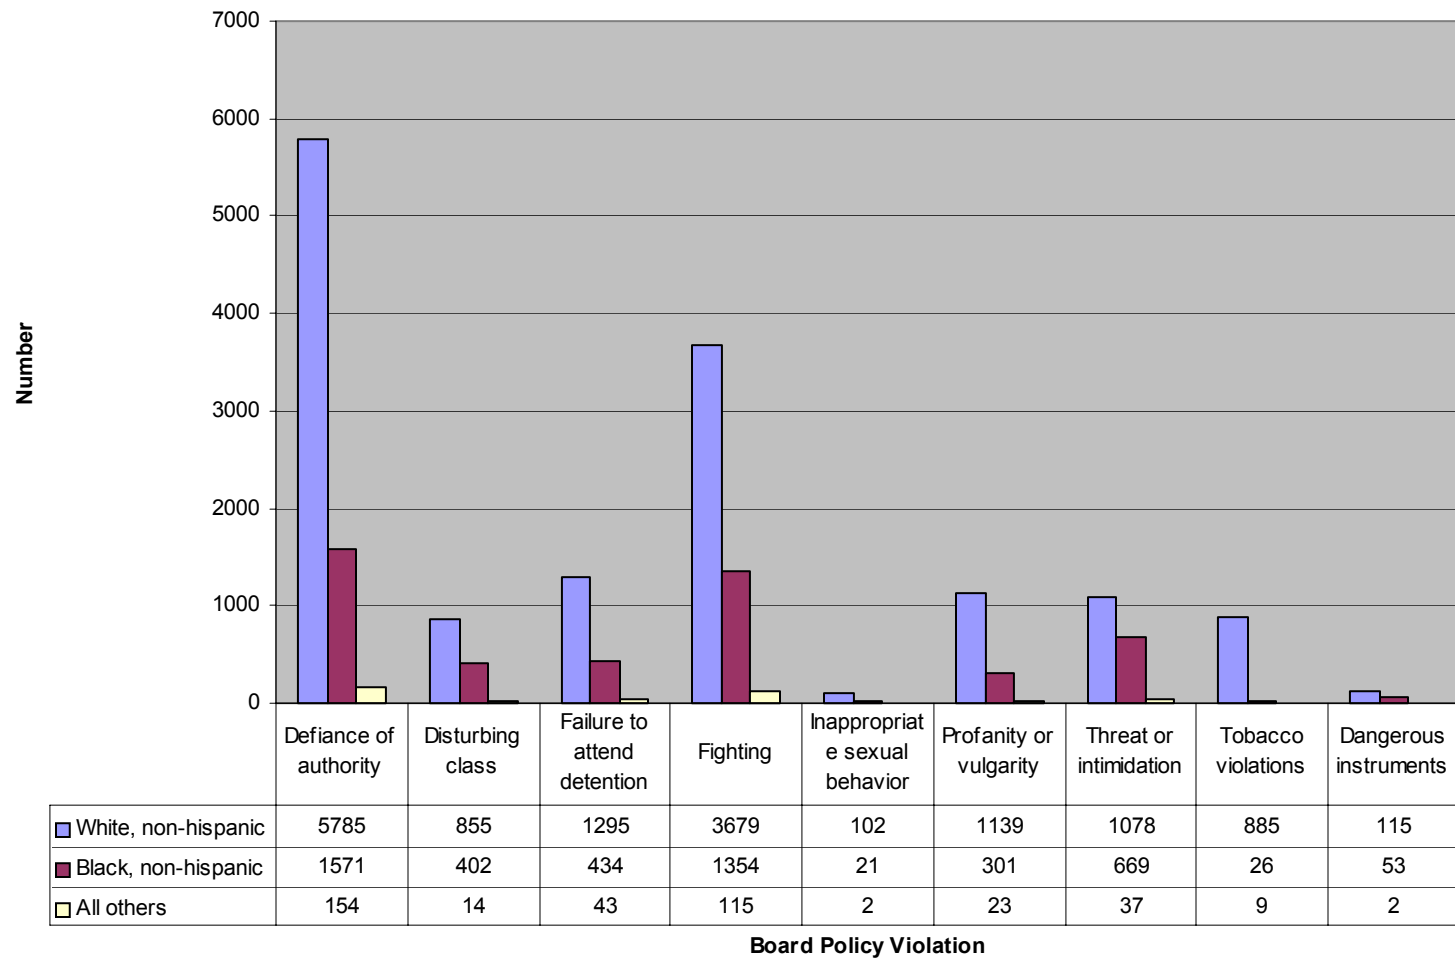

Disciplinary Actions for Board Policy Violations By Race 2001-2002

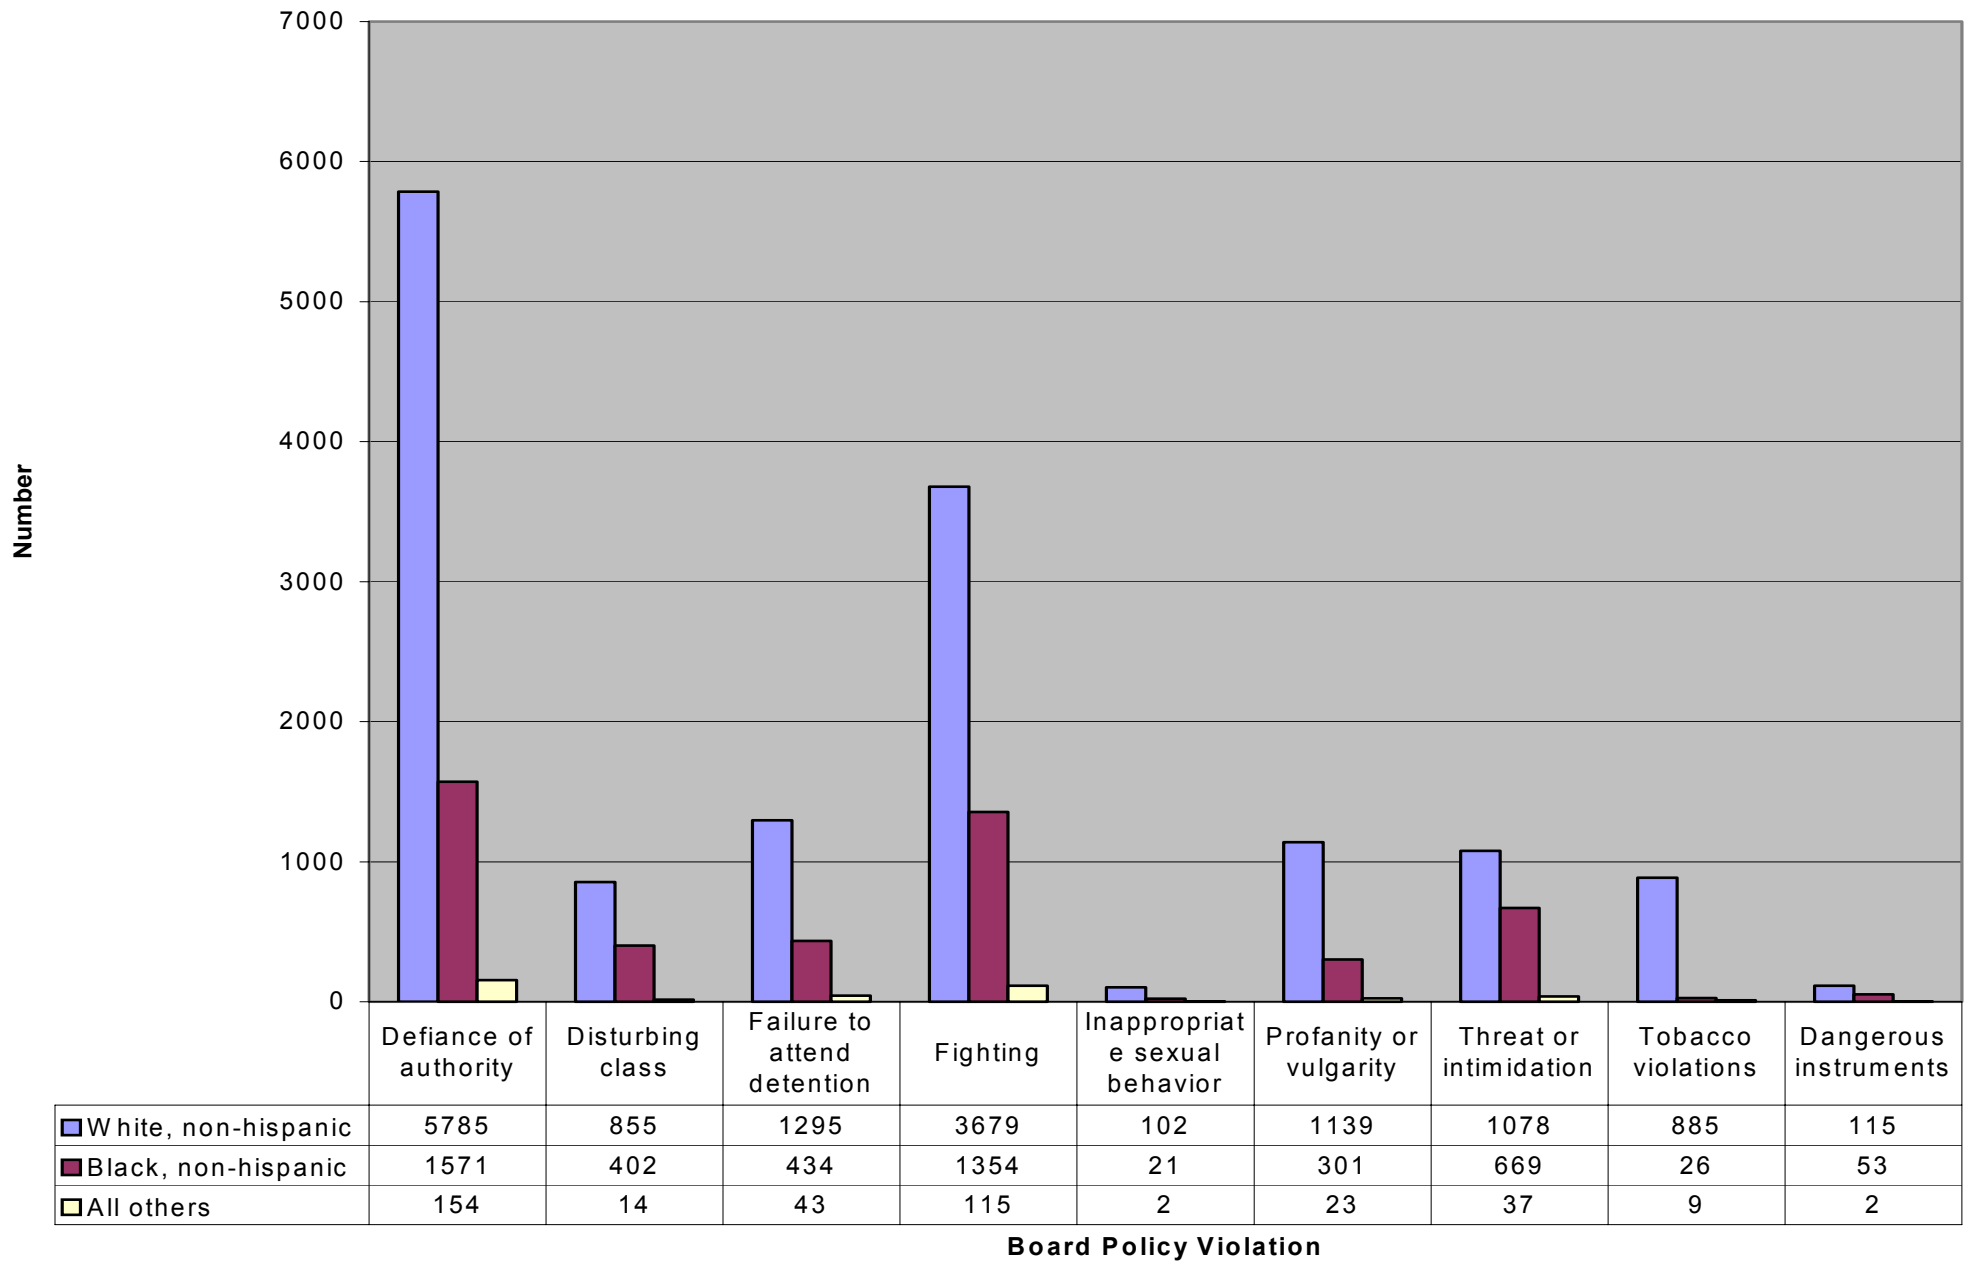

Disciplinary Actions for Board Policy Violations Males by Race 2001-2002

Disciplinary Actions for Board Policy Violations Females by Race 2001-2002

Disciplinary Actions for Board Policy Violations Females by Race 2001-2002

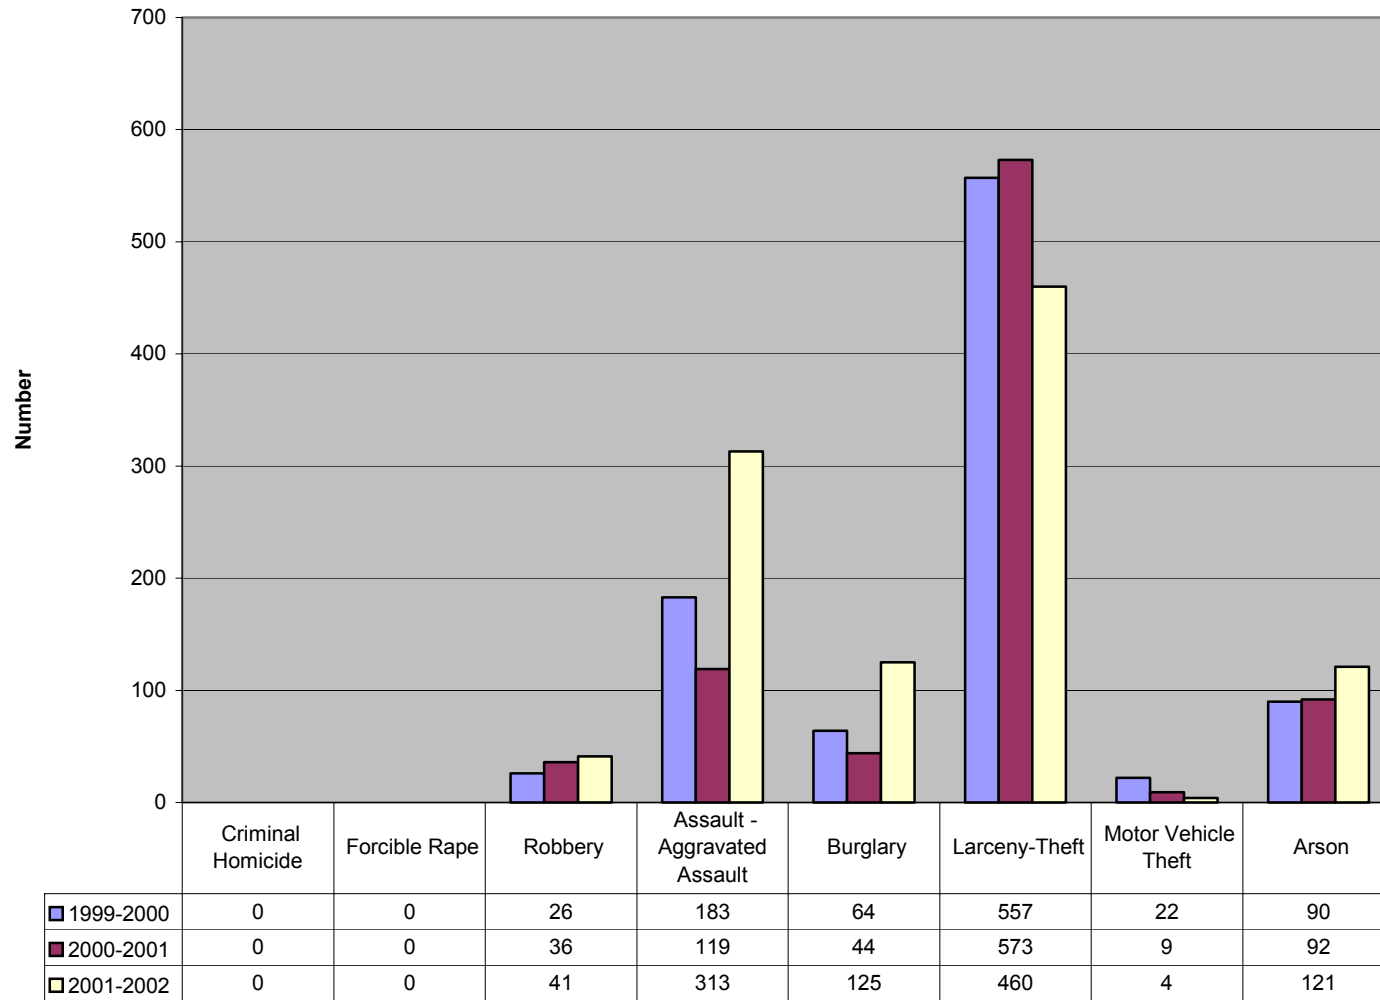

APPENDIX C*

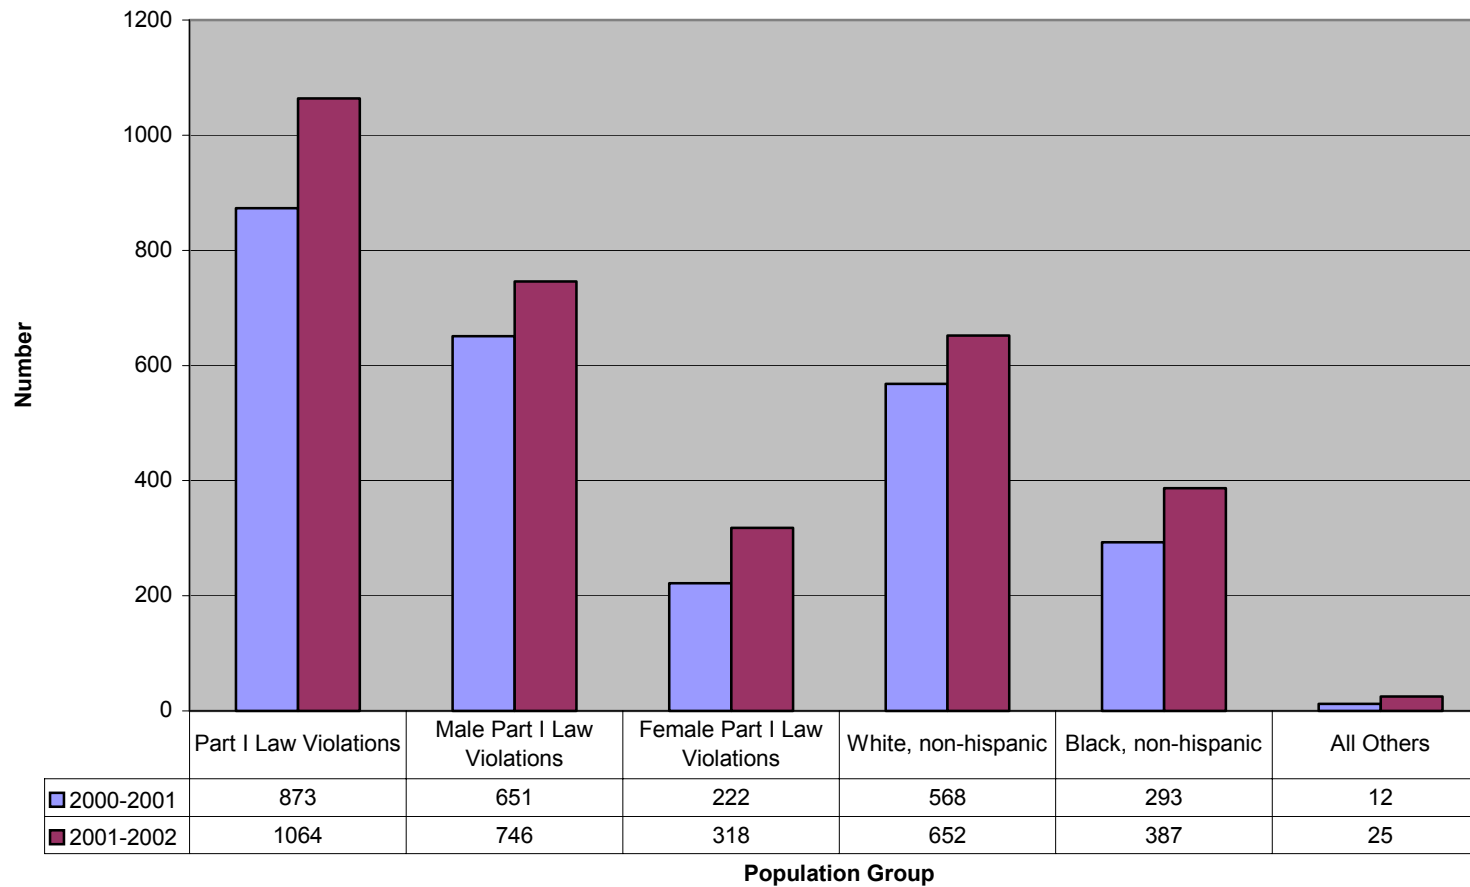

Charts of Law Violations

*Additional data have been reported for the 2000-2001 and 2001-2002 school years that were not reported in the 1999-2000 report.

Appendix E

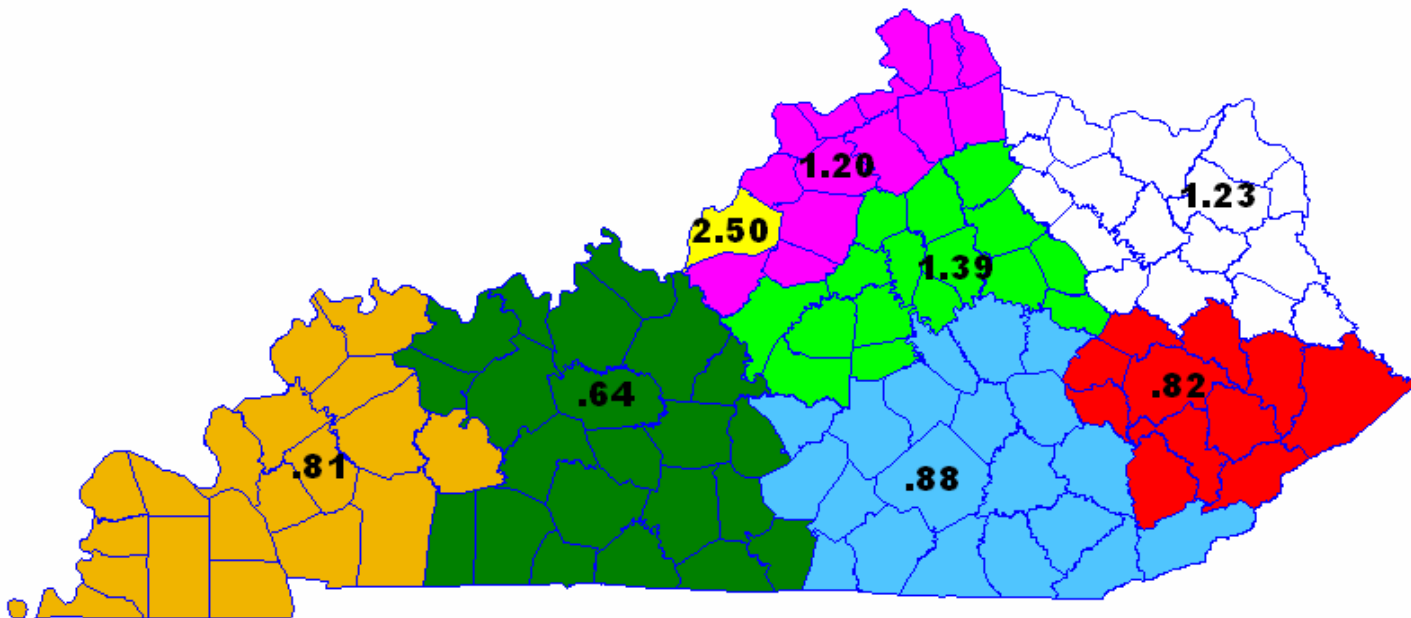

Regional Maps of Board Policy and Law Violations

Expulsions (with and without services) for Law Violations:
Regional Rate per 100 Students
2001-2002 school year

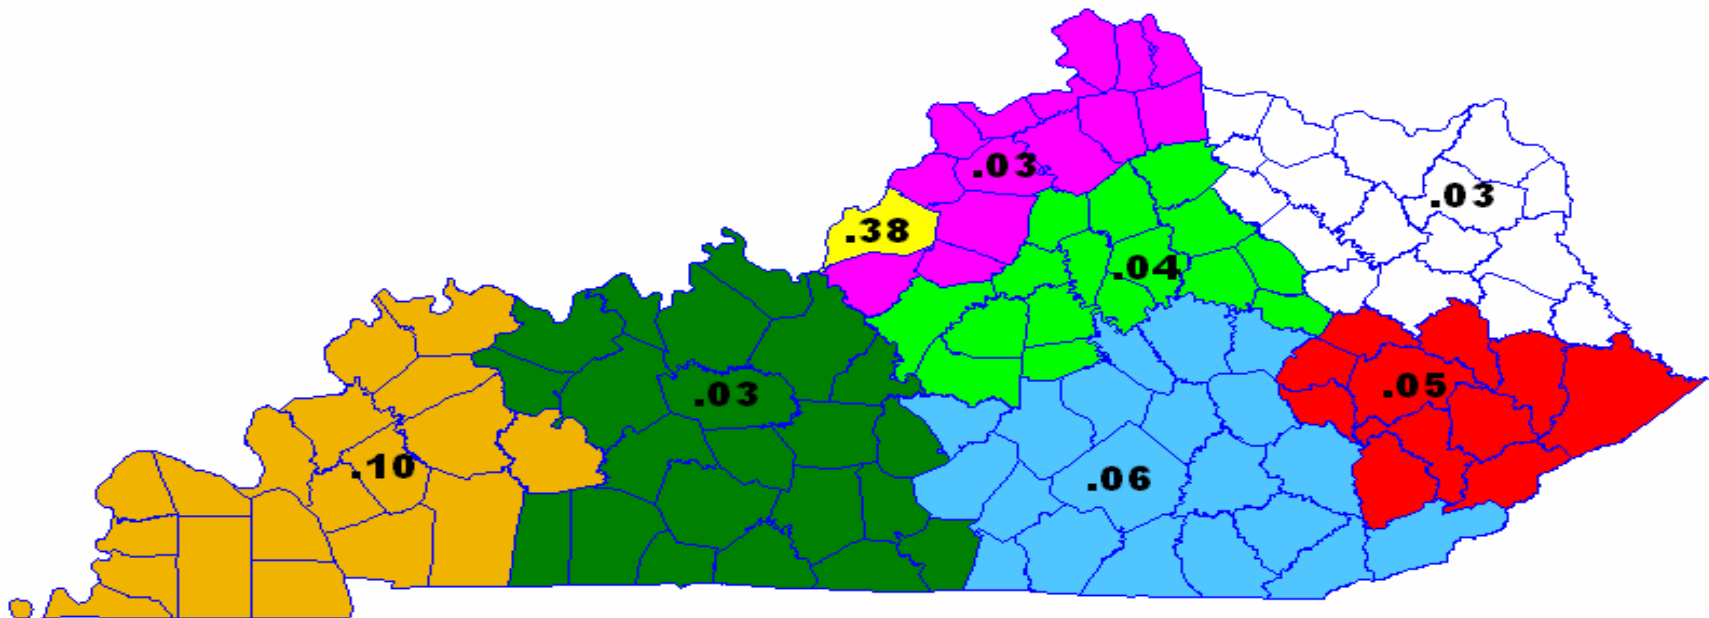

Statewide Rate = .05

**Suspensions for Law Violations:
Regional Rate per 100 Students**
2001-2002 school year

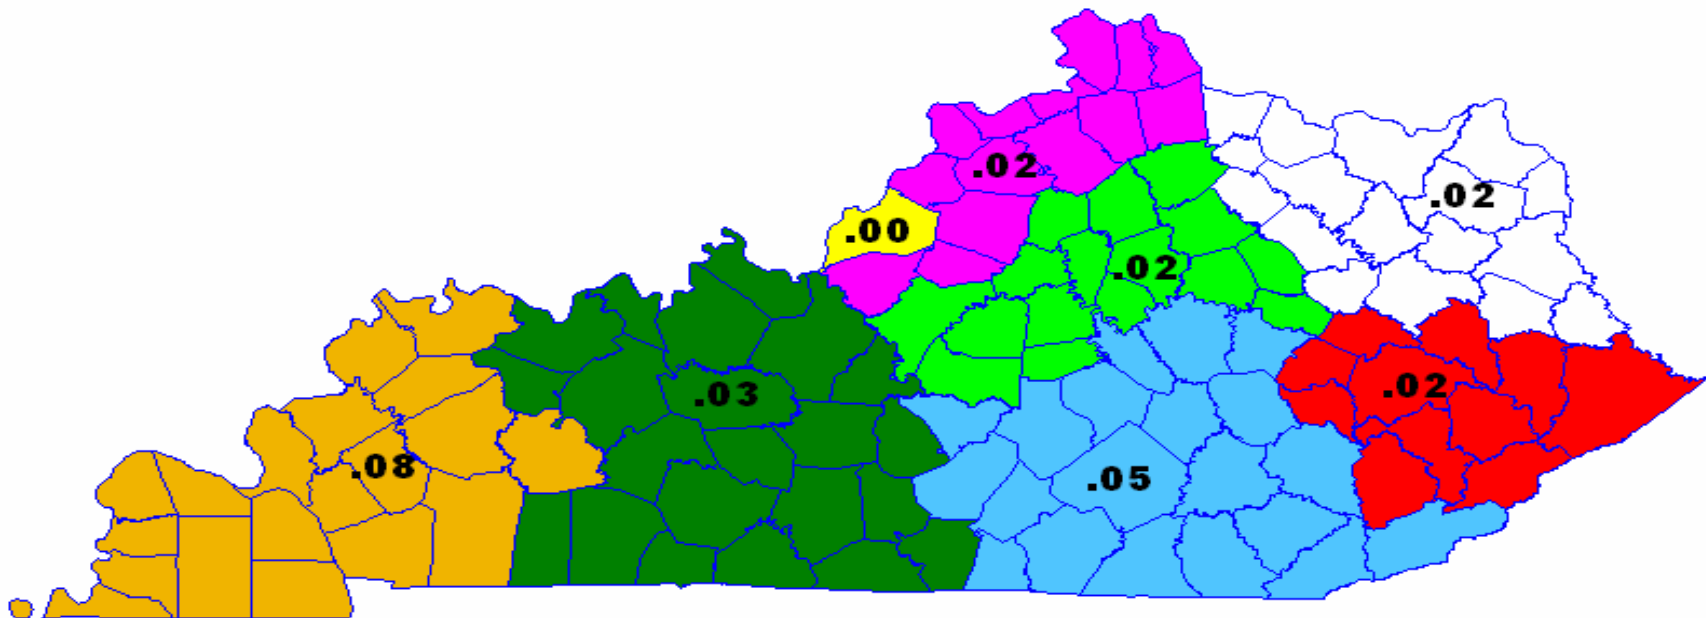

Statewide Rate = 1.22

**Alternative Placements for Law Violations:
Regional Rate per 100 Students**
2001-2002 school year

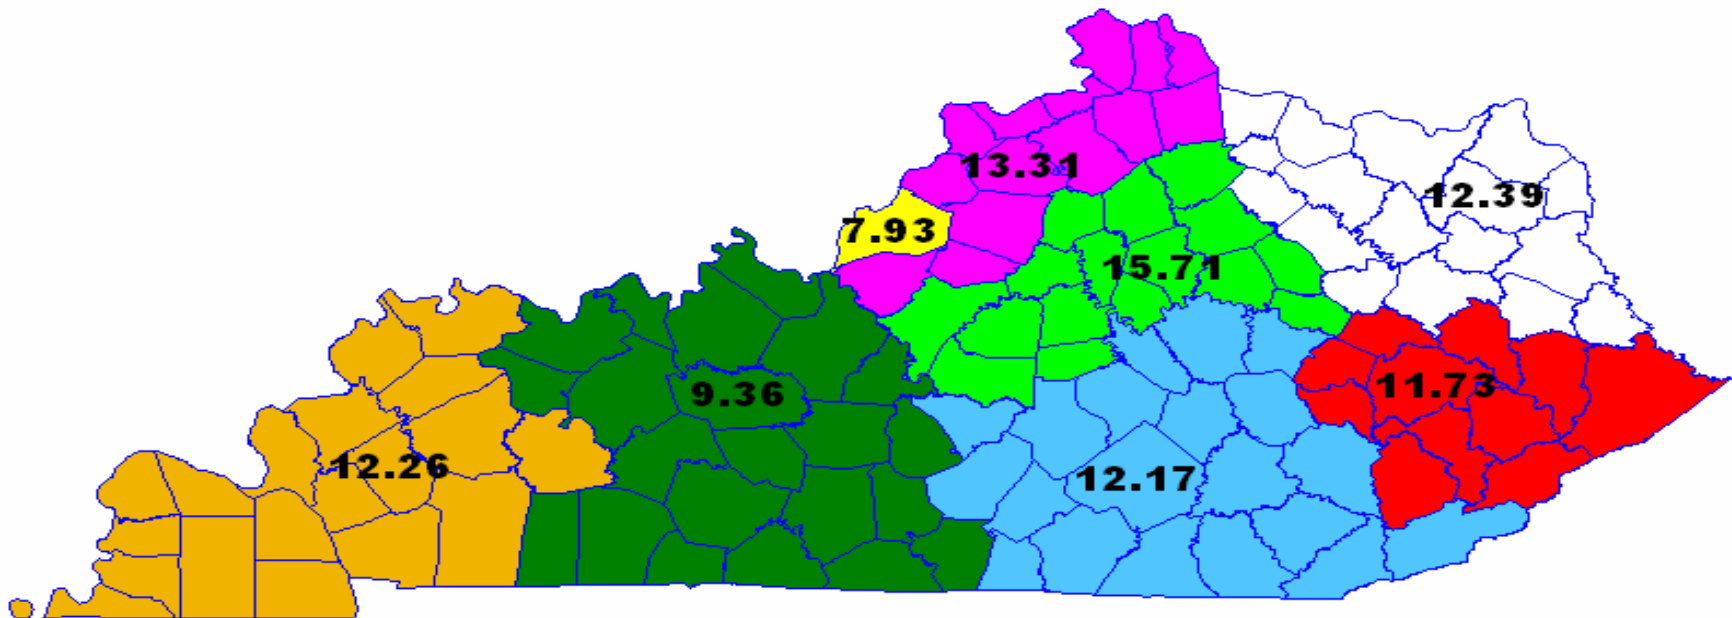

Statewide Rate = .10

**Expulsions (with and without services) for Board Violations:
Regional Rate per 100 Students**
2001-2002 school year

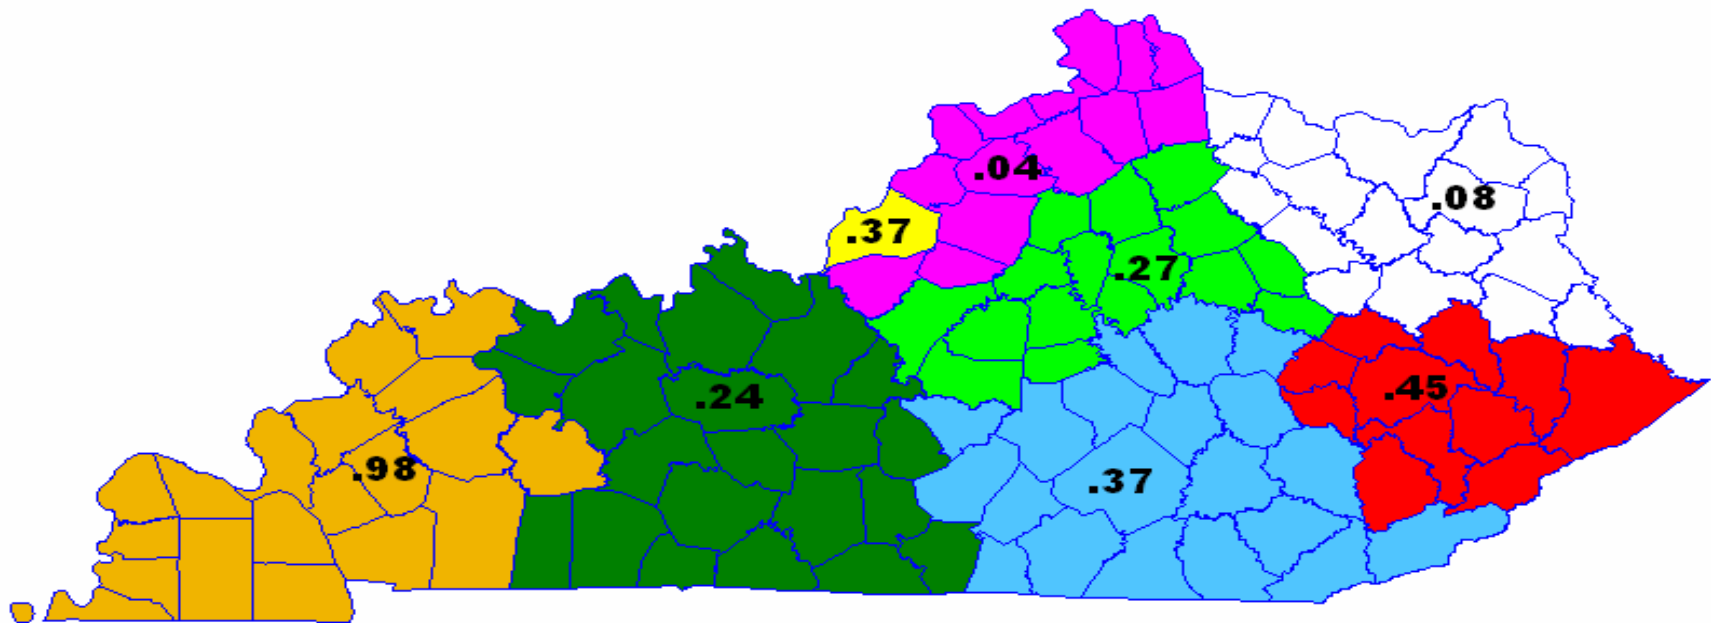

Statewide Rate = .03

**Suspensions for Board Violations:
Regional Rate per 100 Students**
2001-2002 school year

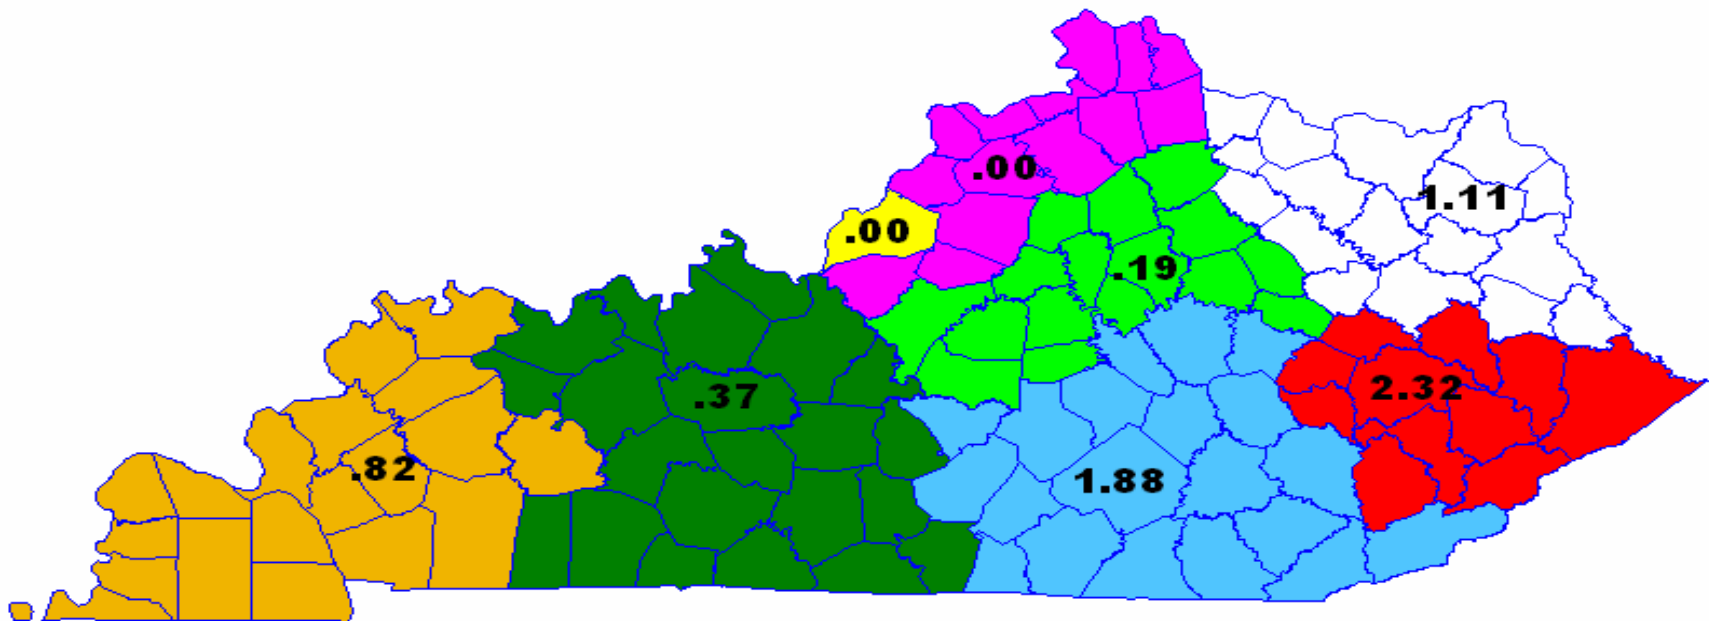

**Alternative Placements for Board Violations:
Regional Rate per 100 Students
2001-2002 school year**

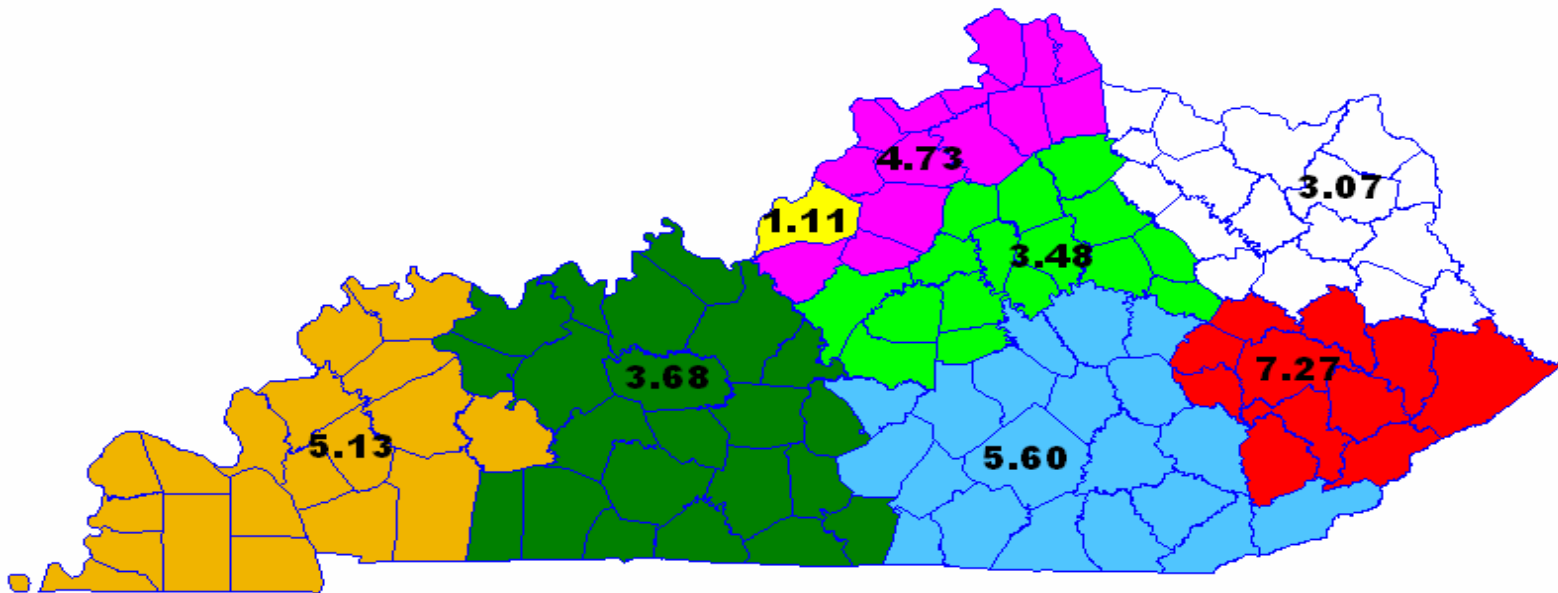

Statewide Rate = .34

**Corporal Punishments for Board Violations:
Regional Rate per 100 Students**
2001-2002 school year

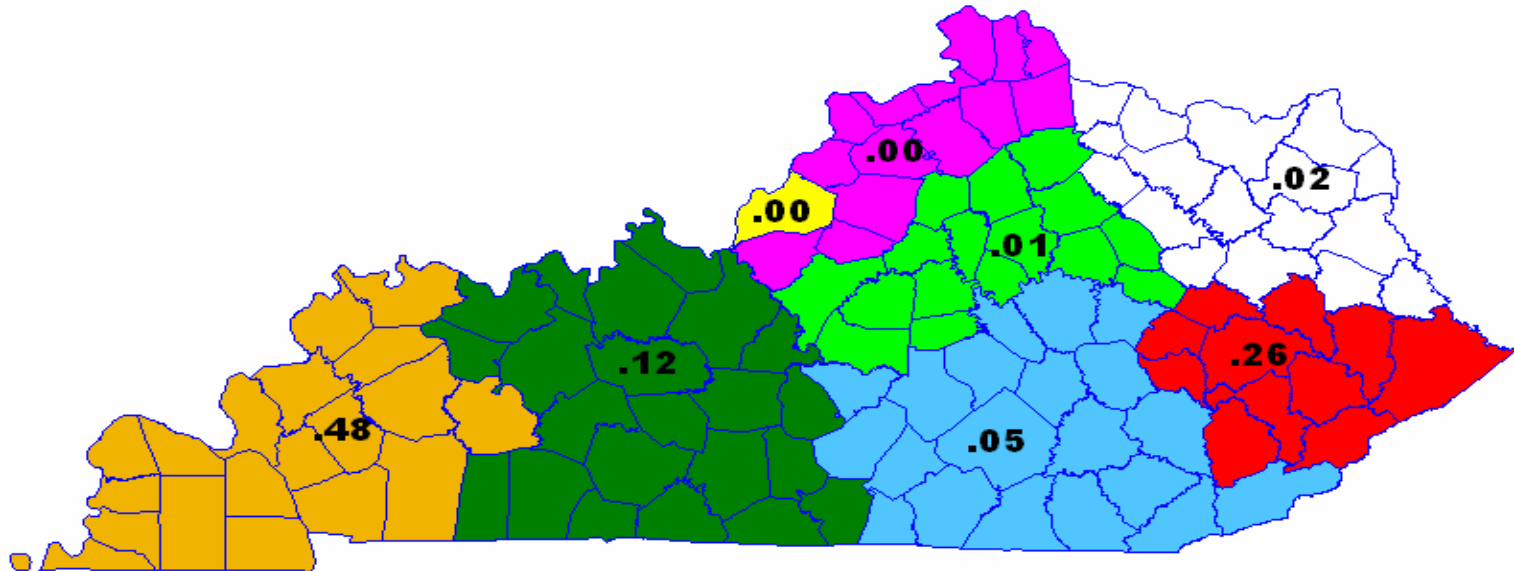

Statewide Rate = .69

**Suspensions for Board Violations:
Rate per 100 Elementary School Students
2001-2002 school year**

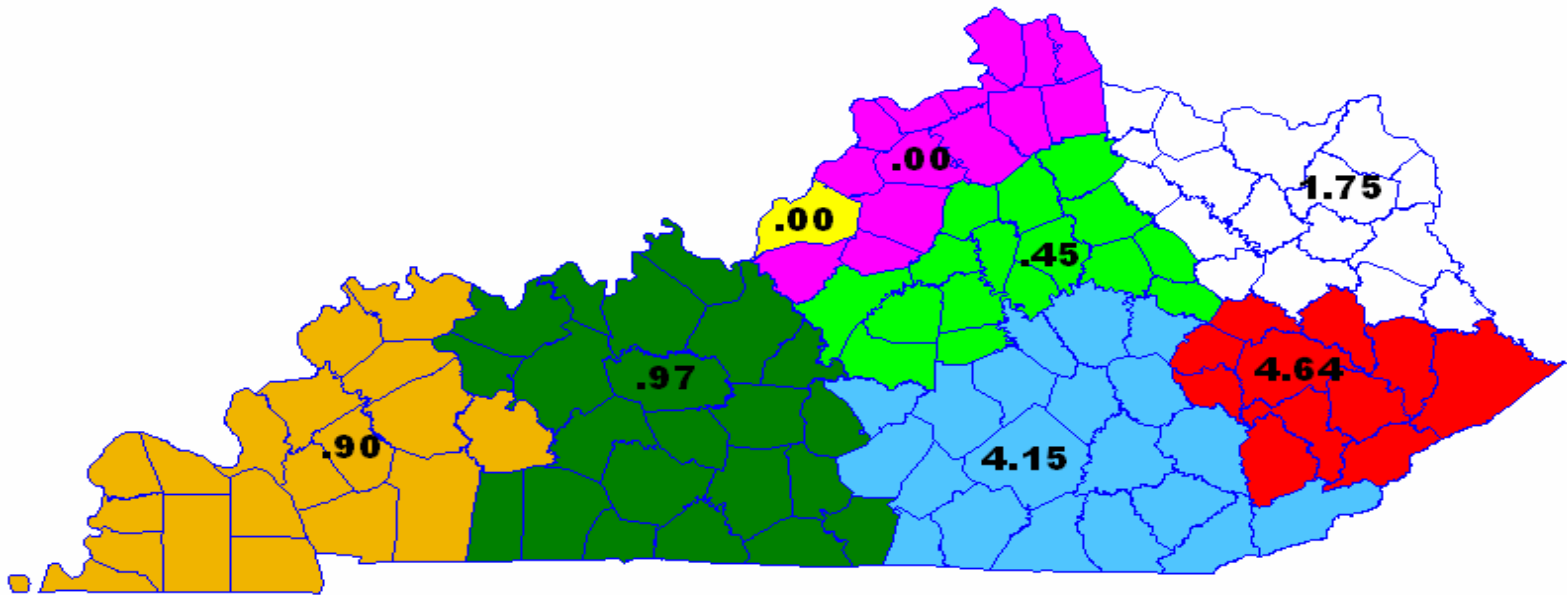

Statewide Rate = 4.07

**Alternative Placements for Board Violations:
Rate per 100 Elementary School Students
2001-2002 school year**

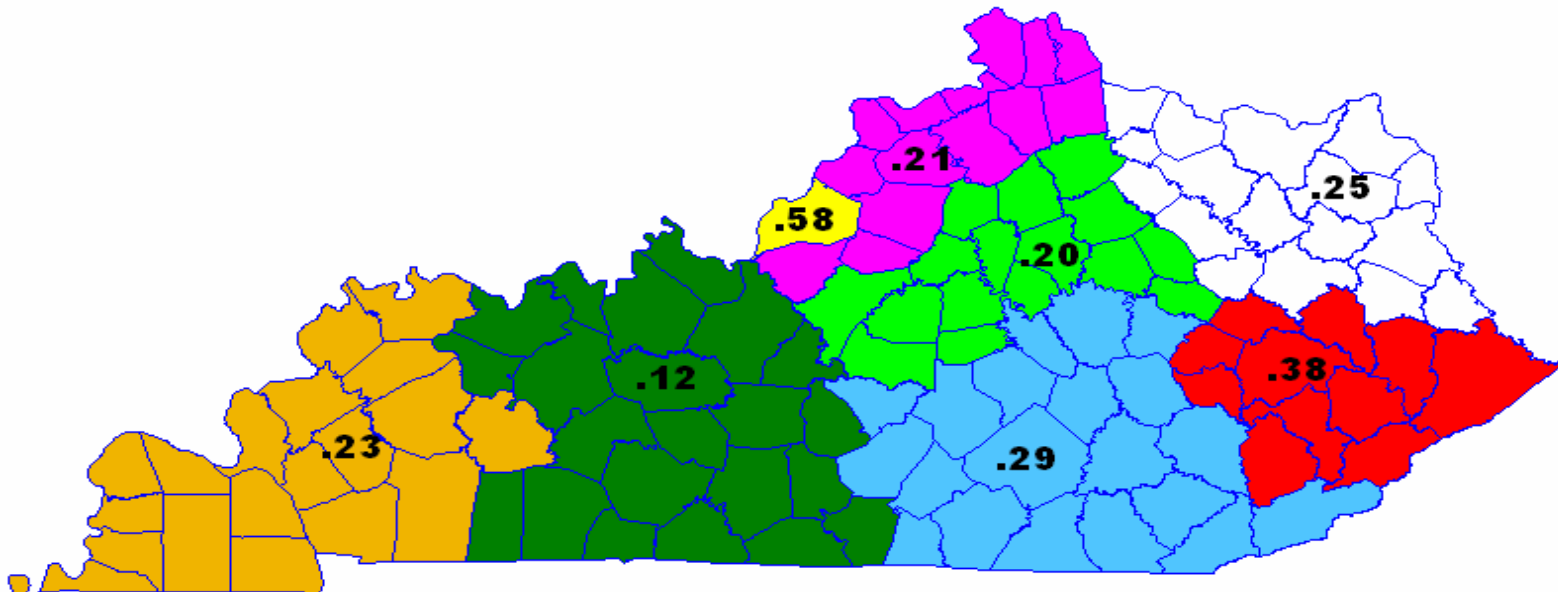

Statewide Rate = .10

**Corporal Punishment for Board Violations:
Rate per 100 Elementary School Students
2001-2002 school year**

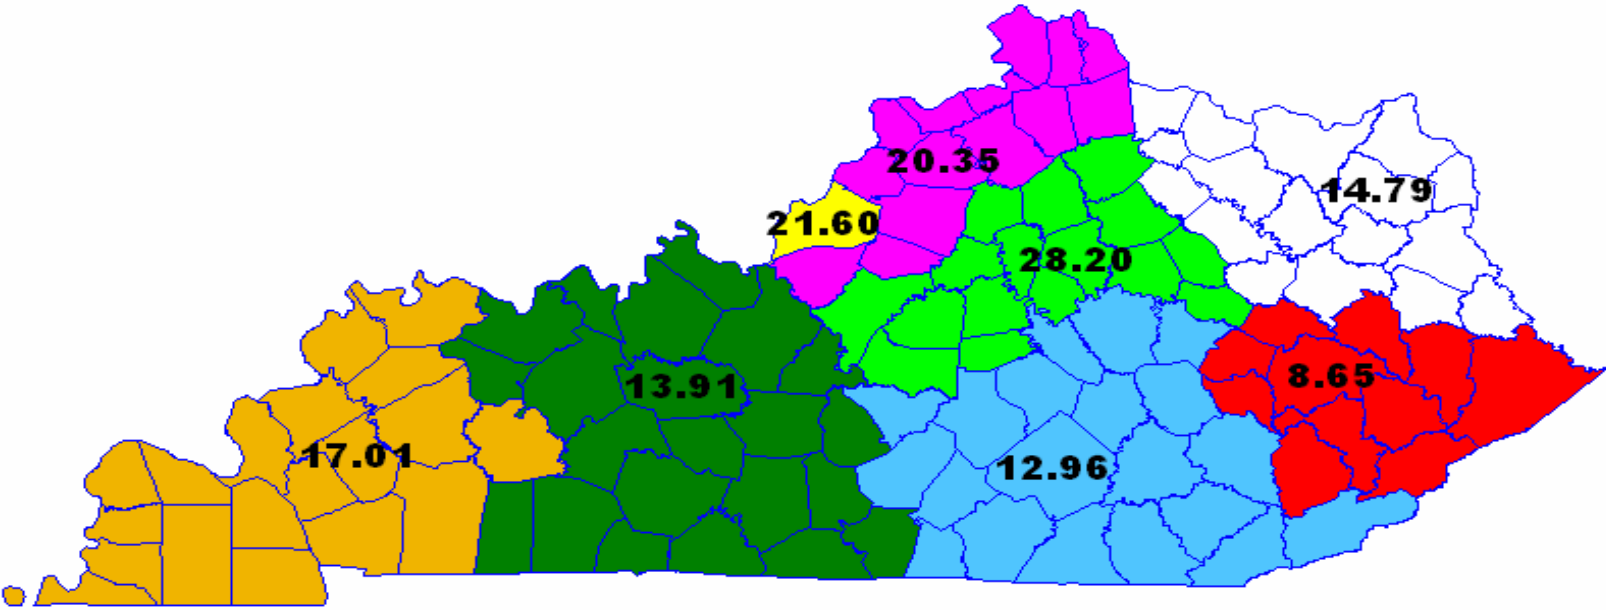

Statewide Rate = 1.37

**Suspensions for Law Violations:
Rate per 100 Elementary School Students
2001-2002 school year**

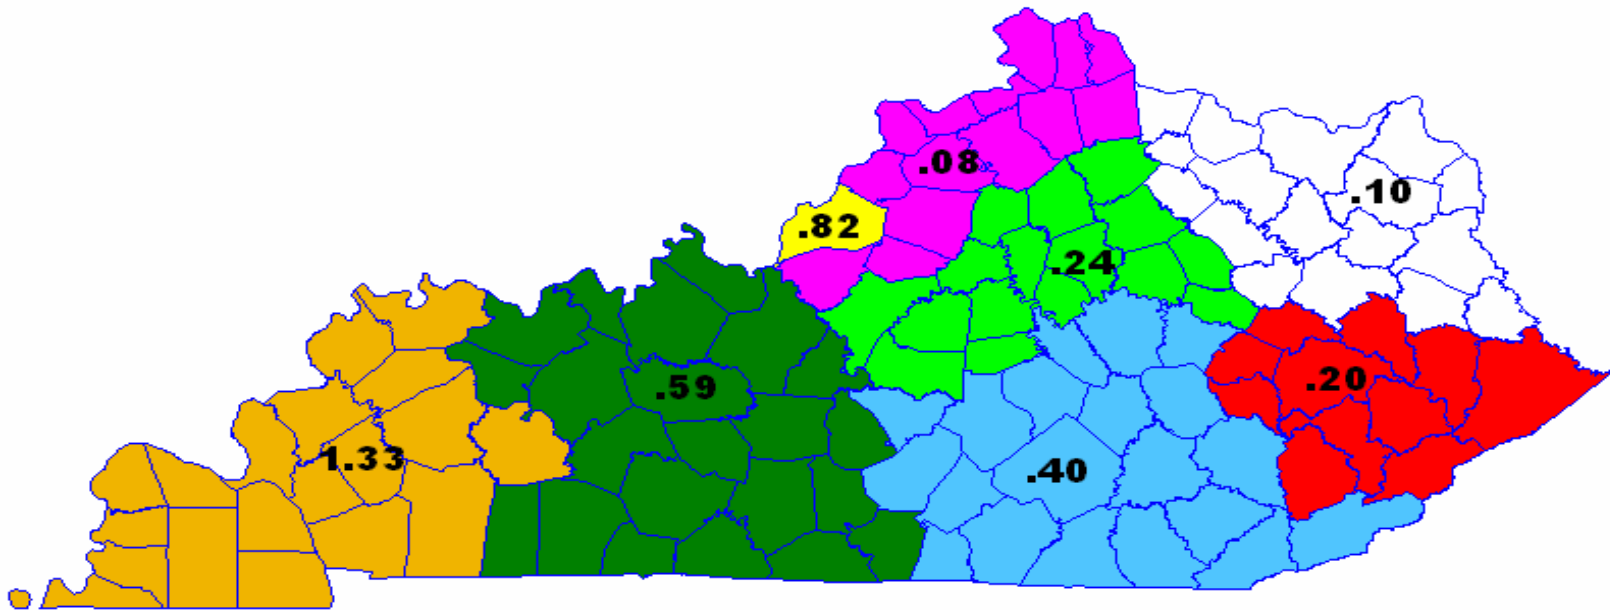

Statewide Rate = .28

**Suspensions for Board Violations:
Rate per 100 Middle School Students
2001-2002 school year**

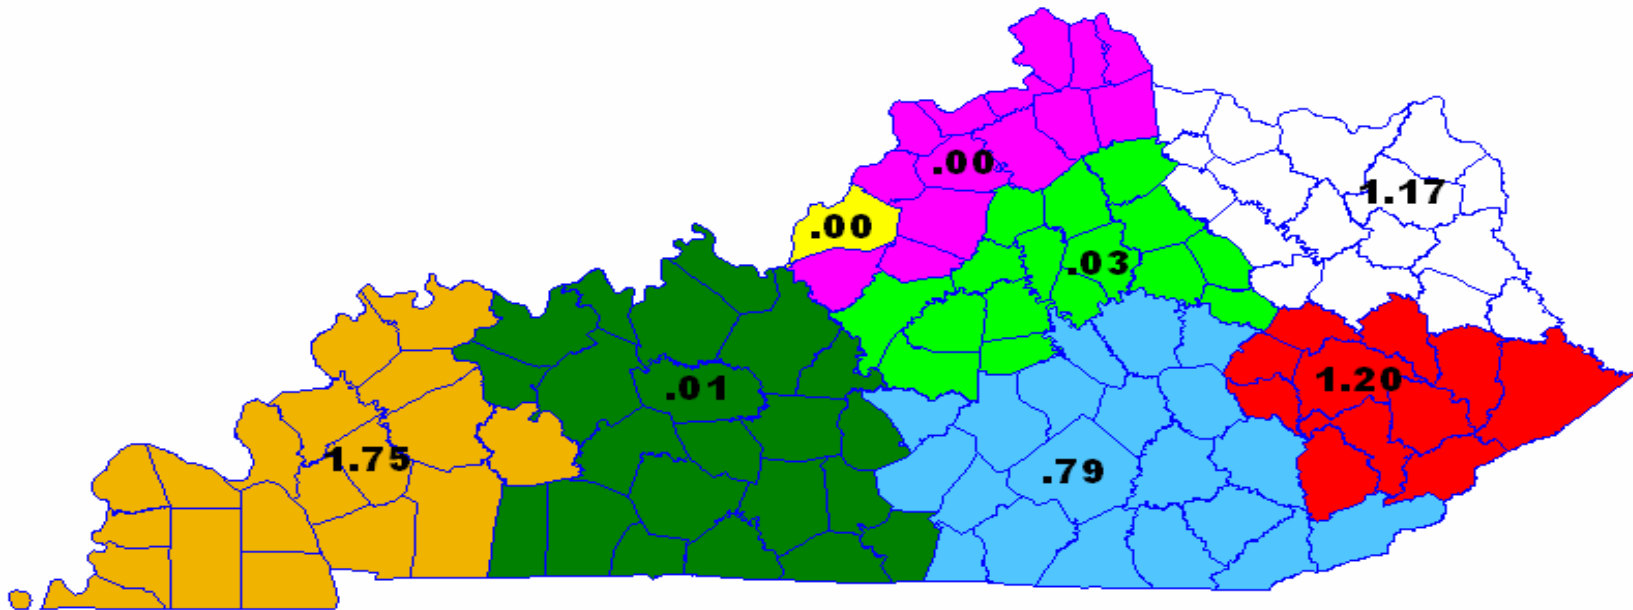

Statewide Rate = 18.10

**Alternative Placements for Board Violations:
Rate per 100 Middle School Students
2001-2002 school year**

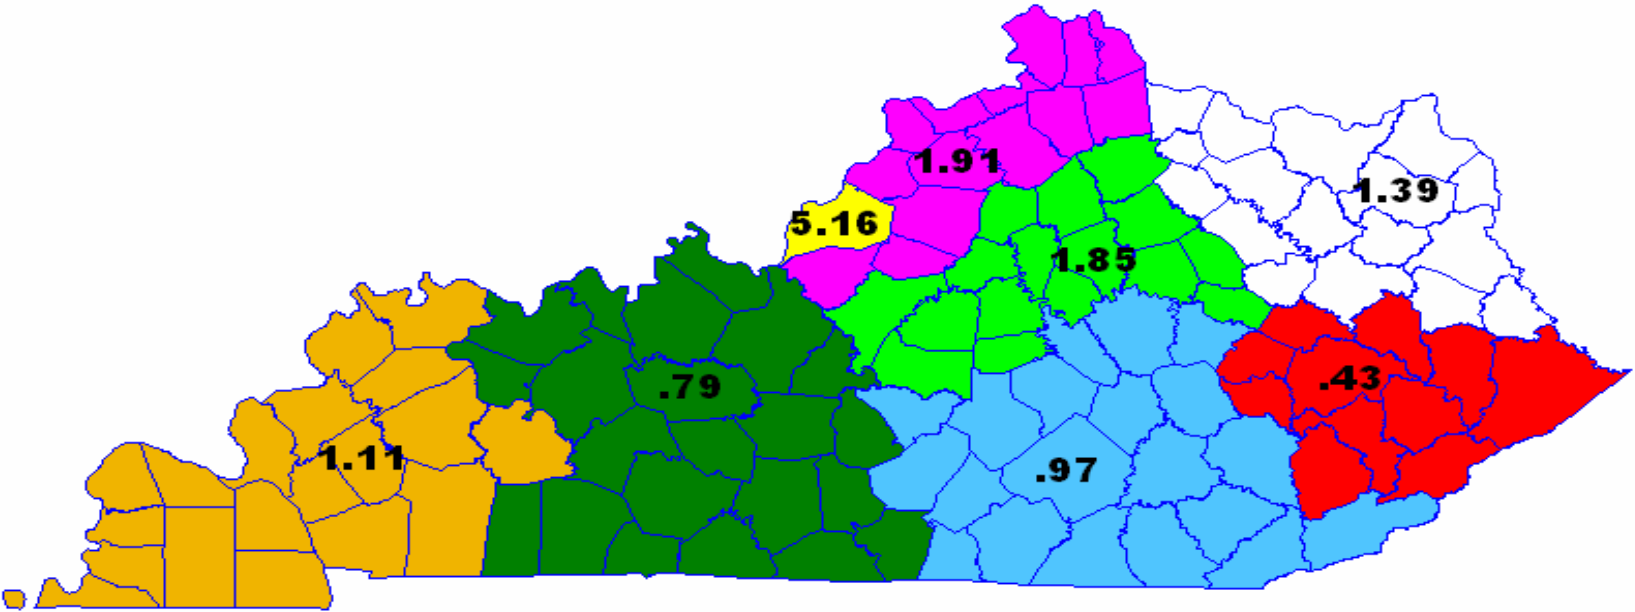

Statewide Rate = .48

**Corporal Punishments for Board Violations:
Rate per 100 Middle School Students
2001-2002 school year**

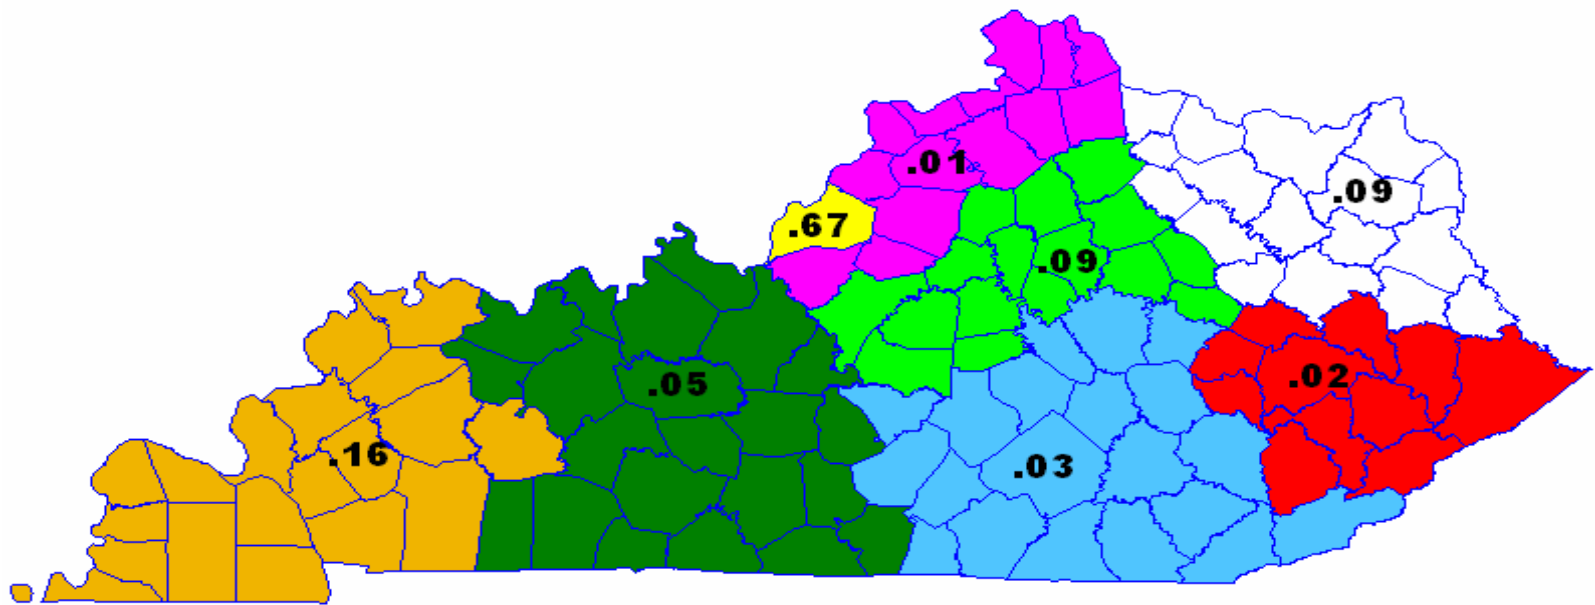

Statewide Rate = .49

**Suspensions for Law Violations:
Rate per 100 Middle School Students
2001-2002 school year**

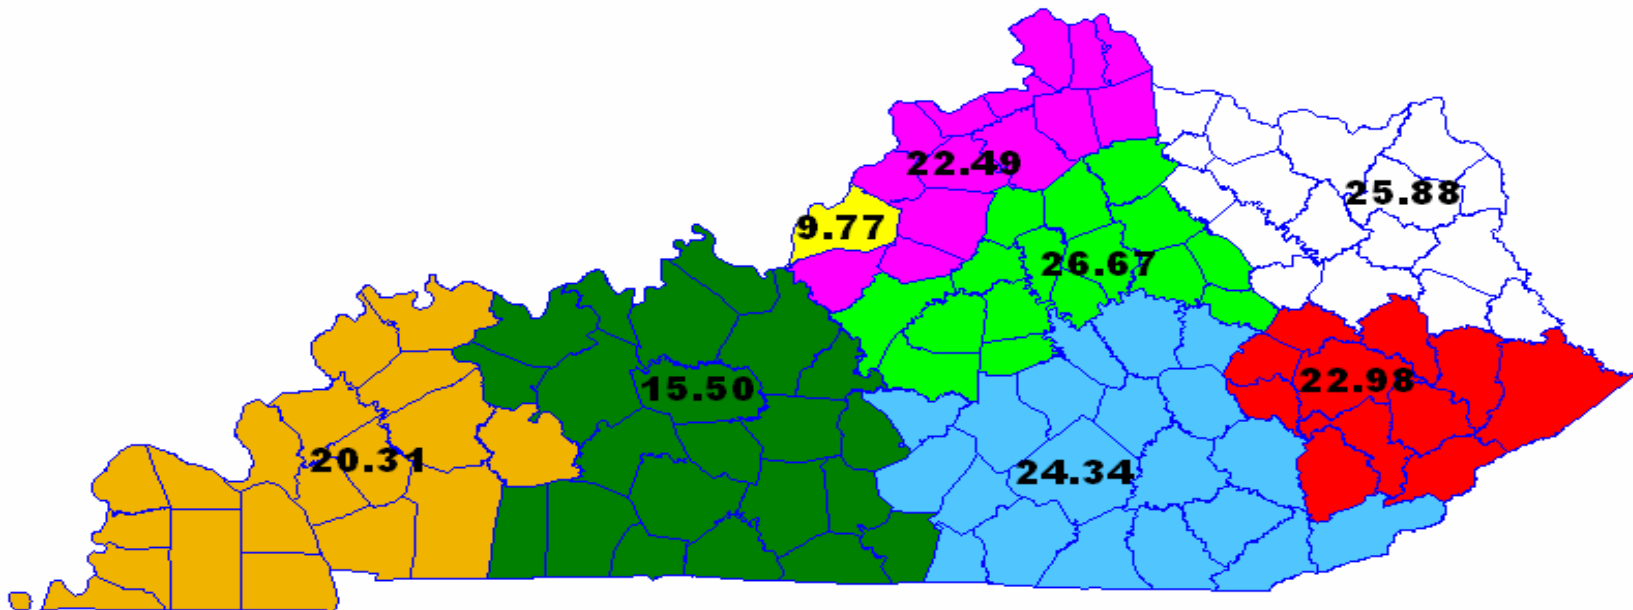

Statewide Rate = 1.80

**Alternative Placements for Law Violations:
Rate per 100 Middle School Students
2001-2002 school year**

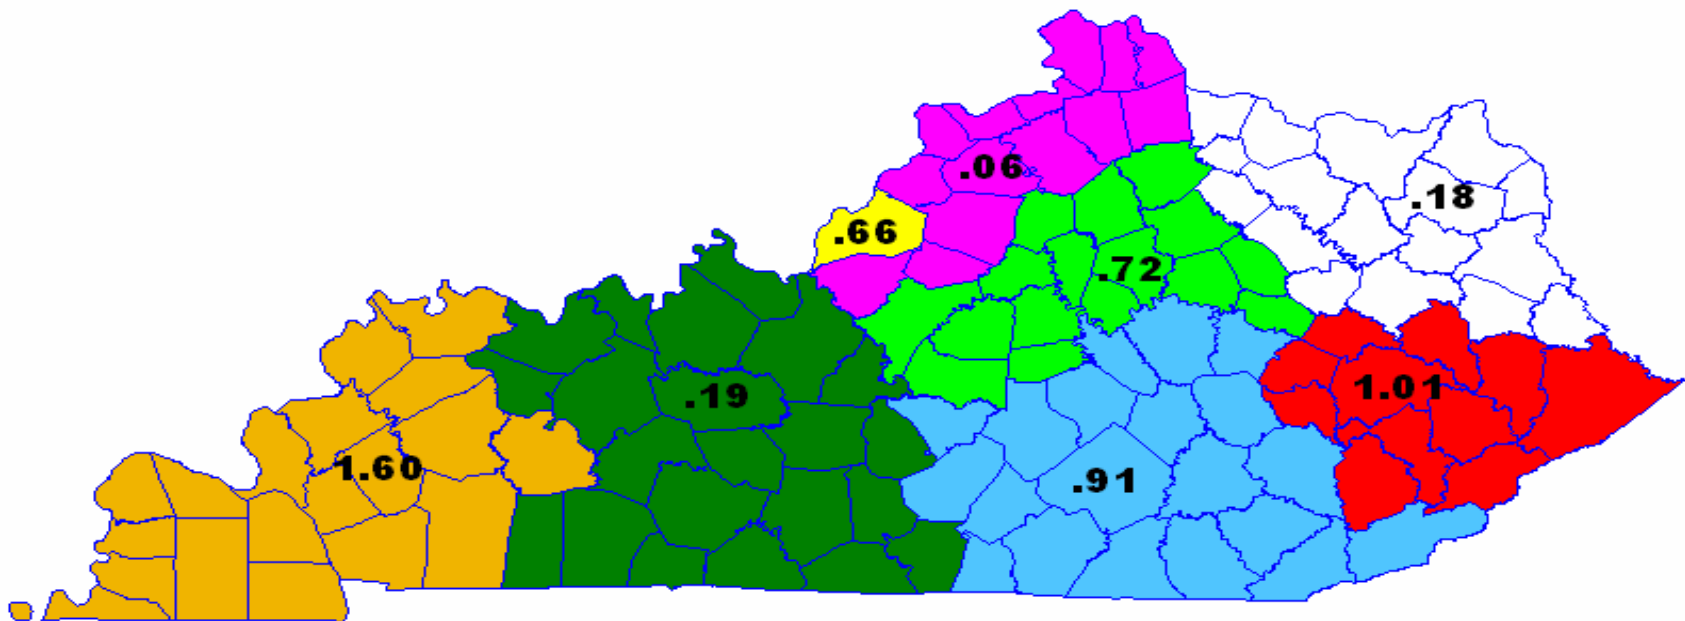

Statewide Rate = .14

**Suspensions for Board Violations:
Rate per 100 High School Students
2001-2002 school year**

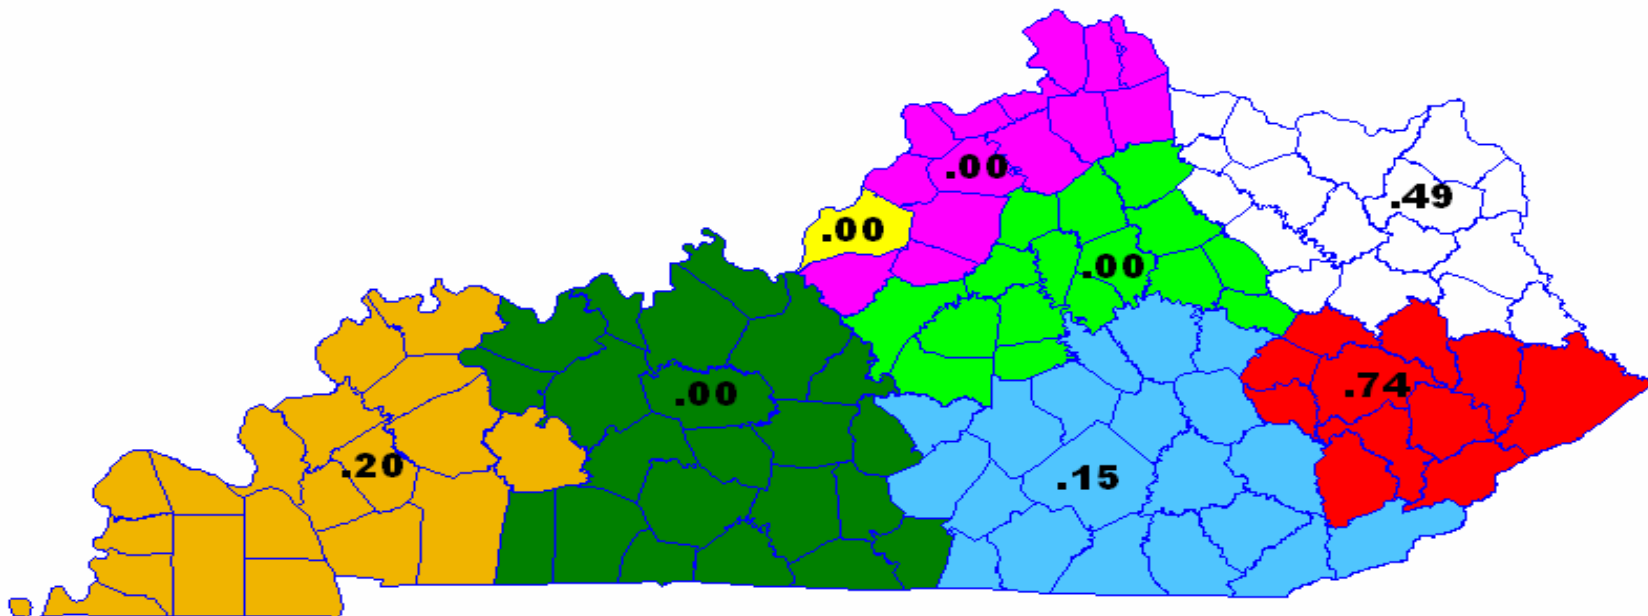

Statewide Rate = 20.51

**Alternative Placements for Board Violations:
Rate per 100 High School Students
2001-2002 school year**

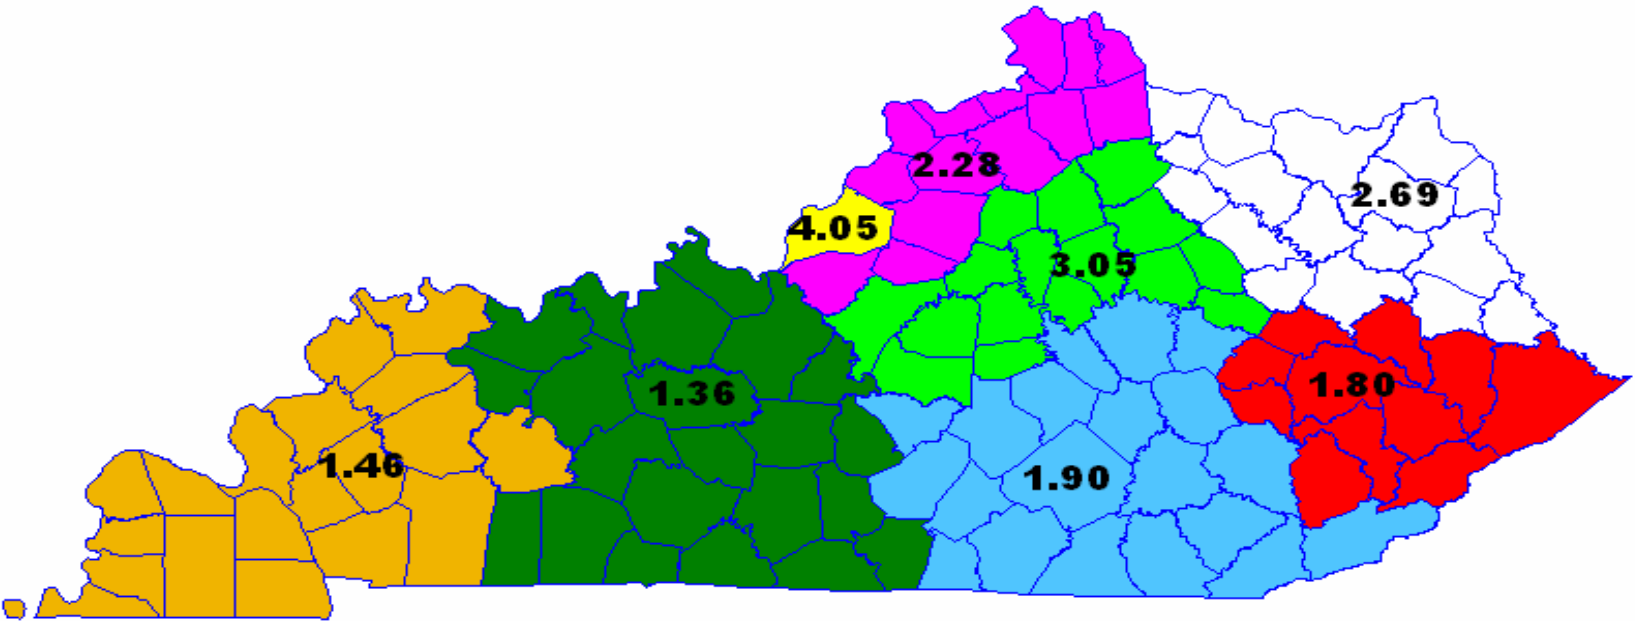

Statewide Rate = .64

**Corporal Punishments for Board Violations:
Rate per 100 High School Students
2001-2002 School Year**

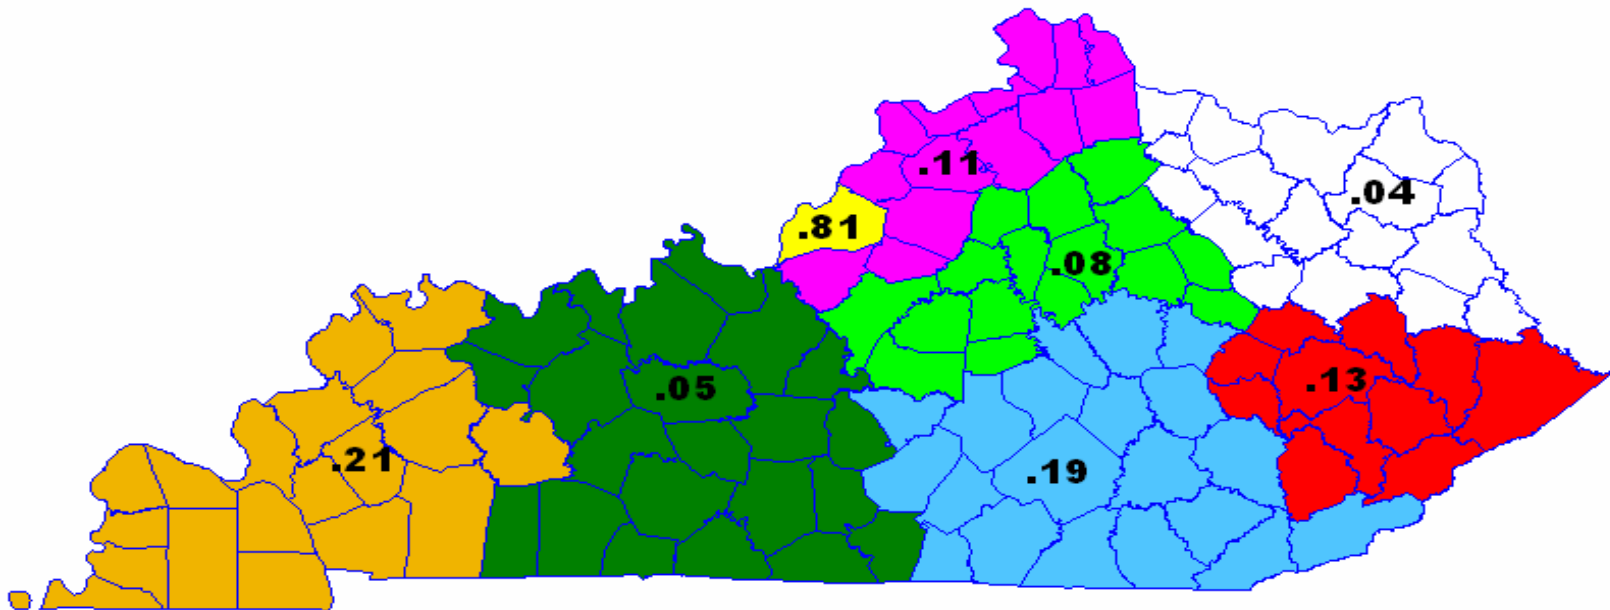

Statewide Rate = .13

**Suspensions for Law Violations:
Rate per 100 High School Students**
2001-2002 school year

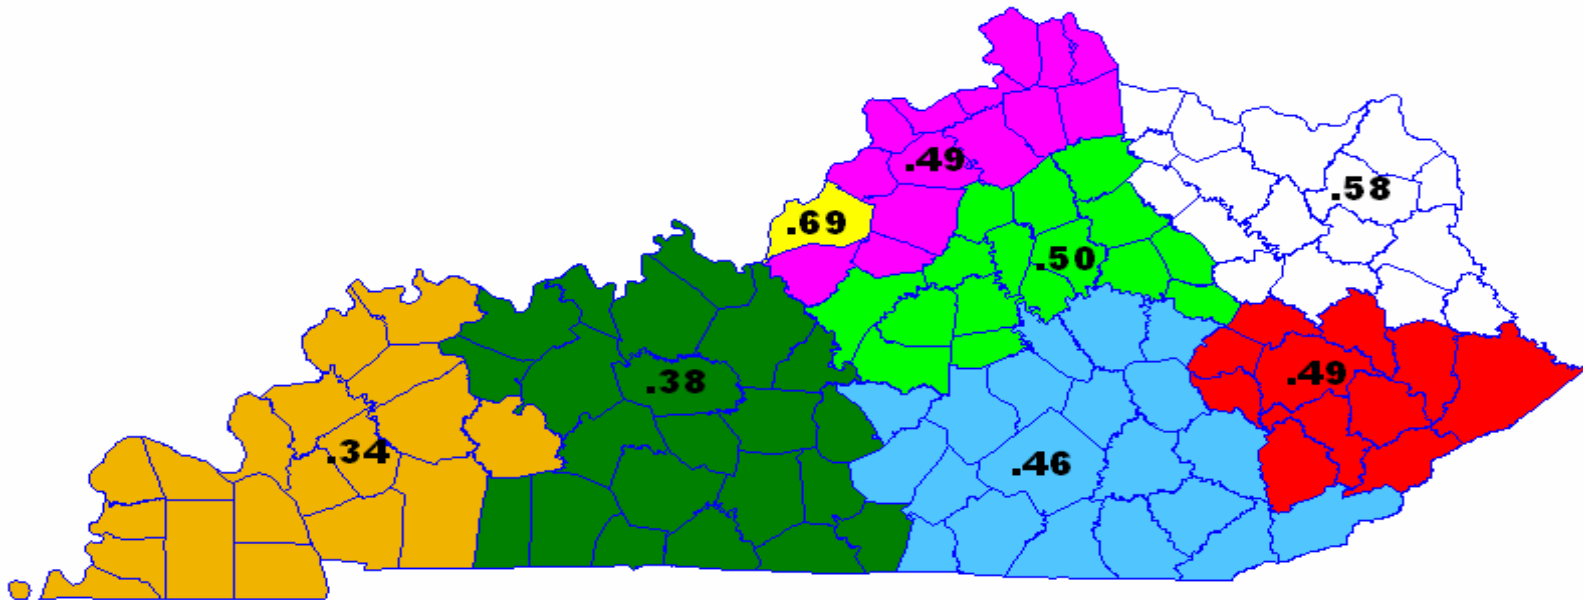

Statewide Rate = 2.36

**Alternative Placements for Law Violations:
Rate per 100 High School Students
2001-2002 school year**

Statewide Rate = .21

**Drug Abuse Violations:
Rate per 100 Students**
2001-2002 school year

Statewide Rate = .49
