Appendix F – Using the 2008-2009 Report	180

Executive Summary

This is the tenth annual report produced by the Kentucky Center for School Safety and, once again, is cause for celebration. The most significant good news is that a comparison of the data presented here with past reports reveals 10-year lows in the number of expulsions (both with and without services) and corporal punishments for Board Violations, which declined to the lowest levels since we began tracking the data in the current format in 1999-2000. Additionally, these data reveal a dramatic reduction over the five-year period presented here in:

- Total Disciplinary actions for Board Violations
- Disciplinary actions for Disturbing class
- Disciplinary actions for Board Violations at each grade level in grades K-9
- Disciplinary actions for Drug Possession

Additionally, for the tenth consecutive year, no criminal homicides or forcible rapes were reported. Furthermore, encouraging developments can be seen in the fact that:

- Part II Law Violations decreased over the past year.
- There were very few disciplinary actions for menacing or abuse, disciplinary actions we began tracking this year as a result of KRS 158.156.

Nevertheless, not all the news from this report is good news. Despite decreases in both Board and Law Violations over the five-year period for students in grades K-9, disciplinary actions for both Board and Law Violations for 10th, 11th, and 12th graders increased over the five-year period. Additionally, both students that received free and reduced lunch and nonwhite students continue to be disproportionately represented in disciplinary actions for both Board and Law Violations. Disciplinary actions for serious law violations also increased slightly from 2007-2008, with most of that increase in disciplinary actions for larceny-theft and robbery. Finally, disciplinary actions for simple assault and drug distribution also increased from 2007-2008 totals, as did the total days that students were absent from school due to Out-of-School suspension. These findings suggest that, despite the many positive findings in this report, there are still areas where further study and efforts are needed.

Our ongoing efforts to increase the usefulness of the school safety data in the state of Kentucky continue this year. Due to enhanced data collection and reporting procedures, this year's report again allows the reader to make comparisons about Board and Law Violations with regard to grade level, school type, socio-economic indicators, drug use and distribution, and Individualized Education Plan (IEP). These additional data continue to offer a rich database that encourages advanced exploration of the complexities of student behavior. Additionally, for the first time, all public school districts in the state used Infinite Campus as their data management system, which has the potential in the very near future to provide more timely data analysis of school safety data at the state and district level. These developments, coupled with ongoing efforts to provide school safety data with unique identifiers for analysis, are cause for excitement and anxious anticipation of upcoming reports.

Despite these enhancements, the most important shortcoming in the data collection process that we continue to try to overcome involves the current inability to connect **each disciplinary action to a particular student through a unique identifier**. Individual-level data (gender, ethnicity, grade, lunch type, special education classification, limited English proficiency, mobility, etc.) remain available at the school level; however, we currently do not have access to that information. This continues to prohibit us from matching disciplinary actions with individuals. If we had that capability, data analysis could be more thorough and detailed. For example, examination of offender recidivism is currently not possible. This connection could assist schools in evaluating programs targeted to repeat offenders. As KDE continues to improve the process, we are hopeful that we will have access to these identifiers in the near future.

As always, KCSS is prepared to assist schools further with data usage. Training in this area is a part of the Center's training efforts. For additional information regarding training opportunities, check our website at www.kysafeschools.org.

Maintaining and improving the safety of Kentucky's students and school staff members are the driving forces behind the Kentucky Center for School Safety. However, for parents, educators, and community members, children must be our first priority. Consequently, the safety of Kentucky's school children is a shared responsibility. Let each of us make this responsibility a sacred trust in our future.

Introduction

School safety is everyone's concern. Teachers and students cannot be expected to perform at higher levels when they feel unsafe at school. Parents want schools to provide a secure place to send their children to learn. Educators want to facilitate learning by providing a safe and civil environment. Businesses want schools to be safe to attract good workers to the community. Government and social agencies want schools to be safe to reinforce the safety and security of the community.

School safety must be a concern for everyone in the community, because it is everyone's responsibility.

To this end, the Kentucky Center for School Safety (KCSS) provides this report of demographic data regarding disciplinary actions involving students in Kentucky's public schools. Every public school and school district in Kentucky contributed data to this report; ideally, schools, districts, and communities will use this information to maintain and improve the safety for all of Kentucky's school children.

The purpose of this report is to provide schools with state, regional, and district data for comparisons. In previous years, the “Using this Report” section has outlined basic data analysis and how to utilize the report in a comprehensive school safety plan. Refer to Appendix F for the full section discussing the most effective use of this report at the school and district levels.

Section I Using this Report

With two notable exceptions, the data collection process for 2008-2009 remained relatively unchanged from the previous years. The first exception was the addition of several Law Violation codes designed to more accurately measure threats and harassments by students in the school setting as a result of KRS 158.156 that was enacted in July, 2008. These codes resulted from a focus group of educators, law enforcement, and legal personnel convened in the summer of 2008 to more adequately capture the data mandated by the newly enacted bill. At the recommendation of the focus group, we created new codes to capture menacing, wanton endangerment, criminal abuse, and stalking. The second exception involved a statewide transition from the previous data collection system (STI) to a new data collection system known as Infinite Campus (IC) for all of the school districts. In 2007-2008, 19 districts converted from STI to IC at the beginning of the academic year. This transition caused a number of data issues, delaying the release of the 2007-2008 report for at least four months, and preventing us from replicating all charts that were included in previous reports. The difficulties discovered during the transition, however, give us increased confidence that this report and successive reports using IC data will be even richer and more reliable because of the enhancements offered by that system. While the transition between systems created some delays for that academic year, we hope (and our experience with this year’s report is) that future reports can be completed earlier in the year because of the new data collection system.

This stability represents an indication of the confidence that we now have in the reliability of the data collection process. Consequently, we now have a database that is more robust and reliable than previous years that provides additional information unavailable at the state level prior to 2004-2005. Given the confidence that we have in the reliability of the data, we again present five-year trend data in this report for practically all of the charts, which will make trends more easily recognizable and thus identifiable. We feel this improvement will continue to provide more helpful data for the users of these reports.

While the additions have enriched the database for this reporting period and improved the usefulness of this report, we continue to suggest that the full impact of the data collection process could be further improved with the addition of the unique identifier mentioned earlier in the report. We are committed to working with schools, districts and the Kentucky Department of Education to enhance the quality of the data report. As we continue to review, assess, and improve the data collection process, we feel this report will continue to provide richer data to schools and districts in order that more effective interventions can be planned and implemented.

Interpreting the Data

Data should always be reviewed in context. For example, a school with an increase in suspensions could be experiencing any or all of the following:

1. A rising level of student misbehavior and school disorder;
2. An administrative emphasis on commission of certain targeted offenses; or
3. A building with physical plant or staffing problems that makes effective supervision of student behavior difficult.

Conversely, a school with a decrease in suspensions could be experiencing any of the following:

1. A decrease in the level of student misbehavior and school disorder;
2. A change in automatic suspension requirement (i.e. zero tolerance) for certain school offenses; or
3. The assignment of additional personnel to the school, coupled with a more comprehensive supervision plan.

Additionally, we remind the reader that a slight change in a single or double digit number can have a dramatic impact on percentage changes from one year to the next.

Knowing the context around the data changes is crucial. The context should drive the intervention plan.

We encourage school administrators to use the data presented in conjunction with their own school-level Infinite Campus data to enhance their respective school safety plans. Helpful guidance in this area is included in Appendix F- Using the 2008-2009 Report.

Section II State Level Data*

The Safe Schools Data Project collects data from all Kentucky public schools regarding the commission of law and school board policy violations (hereafter Law and Board Violations) that result in one of four disciplinary actions:

- Suspension
- Corporal punishment
- Expulsion with services, and
- Expulsion without services.

Kentucky's total public school population for 2008-2009 was 636,188 students. Of that total, 42,606 students (6.70%) committed an offense that resulted in an out-of-school suspension or an expulsion (with or without services). Lesser disciplinary responses (e.g., parent conferences, detentions, in-school suspensions) are not reported to the Kentucky Department of Education and are not reflected in this report. In reviewing the upcoming data regarding commission of Board and Law Violations, it is very important to keep in mind that 93.30% of Kentucky's students were not offenders and are not represented in the data as illustrated in **Chart 1**.

The term "offender" as used in Charts 1, 2a and 2b refers to an individual student involved in committing at least one incident of prohibited behavior as contained in this report. An offender, however, may commit multiple offenses.

** Where rates can be calculated in this section, a similar chart in which chart numbers are presented in rate form is included in Appendix B & C.*

** The enrollment numbers used throughout this report were obtained from the Kentucky Department of Education's Superintendent's Annual Attendance Ethnic Membership Report. These figures best reflect the districts' most stable enrollments.*

Chart 2a illustrates Kentucky students by ethnicity while **Chart 2b** shows the percentage of offenders by population group. Although White students comprise 83.00% of the total student population, the percentage of white students in the offender group is 69.08%. On the other hand, Black, non-Hispanic students make up 10.66% of the total student population, but account for 25.58% of the student offenders. Other ethnic groups represent 6.35% of the total student population and 5.34% of the offender group. The disproportionate representation of Black students in the offender group is consistent with previous Safe Schools Data reports and suggests the need for continued study into reversing this trend.

Disciplinary Actions for Violations of Board Policy In Kentucky Schools

Chart 3 provides the total number of disciplinary actions for school Board Violations for the past five years. The number of disciplinary actions for the 2008-2009 school year decreased 1.0% (or 691 actions) from the 2007-2008 total and 16.5% (or 13,680 actions) from the 2004-2005 total. This decline is particularly encouraging because it represents a continuous decline over the five year period under study here.

Total Disciplinary Actions for Board Violations

**Chart
3**

Legend for all charts in the report:

- 2004-2005 School Year
- 2005-2006 School Year
- 2006-2007 School Year
- 2007-2008 School Year
- 2008-2009 School Year

Disciplinary Actions for Board Violations by Category

Chart
4

Chart 4 depicts a categorical breakdown of disciplinary actions for Board policy violations. Please keep in mind that each of these categories is subject to interpretation of the student action by the teachers/administrators and may be defined differently from one teacher/administrator to another. The categories showing the biggest change from 2007-2008 were the Failure to Attend Detention (with 23.1% decrease), Disturbing Class (a 9.1% decrease), Defiance of Authority (where there was an 8.7% increase), and Tobacco Violations (a 4.6% decrease) categories. Threat/ Intimidation (a 4.2% increase) and Dangerous Instruments - Carrying or Using (a 3.6% increase) also increased from 2007-2008 levels as well.

An analysis of the five-year data trends suggests that disciplinary actions for Failure to Attend Detention (54.2%), Other Board Violations (46.5%), Tobacco (39.8), Disturbing Class (39.0%), Dangerous Instruments - Carrying or Using (19.1%), Fighting (15.6%), and Inappropriate Sexual Behavior (14.2%) decreased substantially over the five-year period. Disciplinary actions for Profanity or Vulgarity and Threat and Intimidation have remained relatively stable over the five-year period while Defiance of Authority (109.6%) has increased substantially over five years, due in part to a change in the coding scheme for Defiance of Authority in 2004-2005. In that year, changes to the data collection system prohibited schools from entering a number of offenses that should have been coded as Defiance of Authority within that category. This coding problem forced many users to enter these actions into the Disturbing Class category, which caused a large increase in the number of Disciplinary Actions for Disturbing Class and a large decrease in the number of Disciplinary Actions for Defiance of Authority in 2004-2005. This problem was corrected in 2005-2006. Thus, a comparison between the 2005-2006 and 2008-2009 total number of disciplinary actions for Defiance of Authority reveals a much smaller (5.8%) increase and provides a more meaningful comparison. The number of disciplinary actions for Threat/Intimidation also increased slightly (5.3%) over the five-year period.

Total Disciplinary Actions for Board Violations by Grade^{ab}Chart
5a

^a Primary refers to 1st, 2nd and 3rd grades.

^b Spec. Educ. refers to students in self-contained special education classes only. This does not include special education students who receive resource or collaborative service.

Chart 5a shows the distribution of Board Violations across grade levels. The chart clearly illustrates the decreasing number of disciplinary actions from primary through 9th grade with a concurrent increasing number of actions from 10th grade through 12th grade, particularly between 2007-2008 and 2008-2009. In 6th grade, which typically marks the transition from elementary to middle school, the number of disciplinary actions is almost three times the number for 5th graders in each of the five years. Although the data presented here do not allow us to identify the causes of the increase between 5th and 6th grade, one possible explanation for this increase has to do with the more punitive philosophies of middle school administrators and teachers when compared with their colleagues in elementary school. Because this report only includes disciplinary actions that involve out-of-school suspensions, expulsions, and corporal punishments (used in 52 districts), it may be that the rule-breaking activity that received an office referral or some other in-school punishment in 5th grade (the highest grade in most Kentucky elementary schools) may receive an out-of-school suspension in 6th grade (the lowest grade in most Kentucky middle schools). Regardless of the explanation, this increase needs to be further explored, as does the large increase between 8th and 9th grades (33.2% in 2004-2005, 49.9% in 2005-2006, 54.4% in 2006-2007, 67.6% in 2007-2008, and 67.1% in 2008-2009), the typical transition year from middle to high school. Additionally, because the number of disciplinary actions among high school students appears to be increasing over the five-year and one-year periods, further exploration is needed in this area as well.

Total Enrollment by Grade ^a

Chart 5b

^a Primary refers to 1st, 2nd and 3rd grades.

**Disciplinary Actions of Board Violations by Grade ^a
Rate per 100 Students**

Chart 5c

^a Primary refers to 1st, 2nd and 3rd grades.

Chart 5b depicts the enrollment for grades K-12 while **Chart 5c** shows the rate of violations per 100 students for grades K-12 from 2004-2005 to 2008-2009. Part of the decrease in disciplinary actions from 10th through 12th grades is due to the declining population at each grade level; however, because the population of sixth through eighth grades remained relatively constant, the large increases between traditional middle school grades (6th through 8th) and traditional elementary grades (K-5th grades) are very troubling and suggest the need for more research into intervention strategies that will reduce disciplinary actions among middle school students.

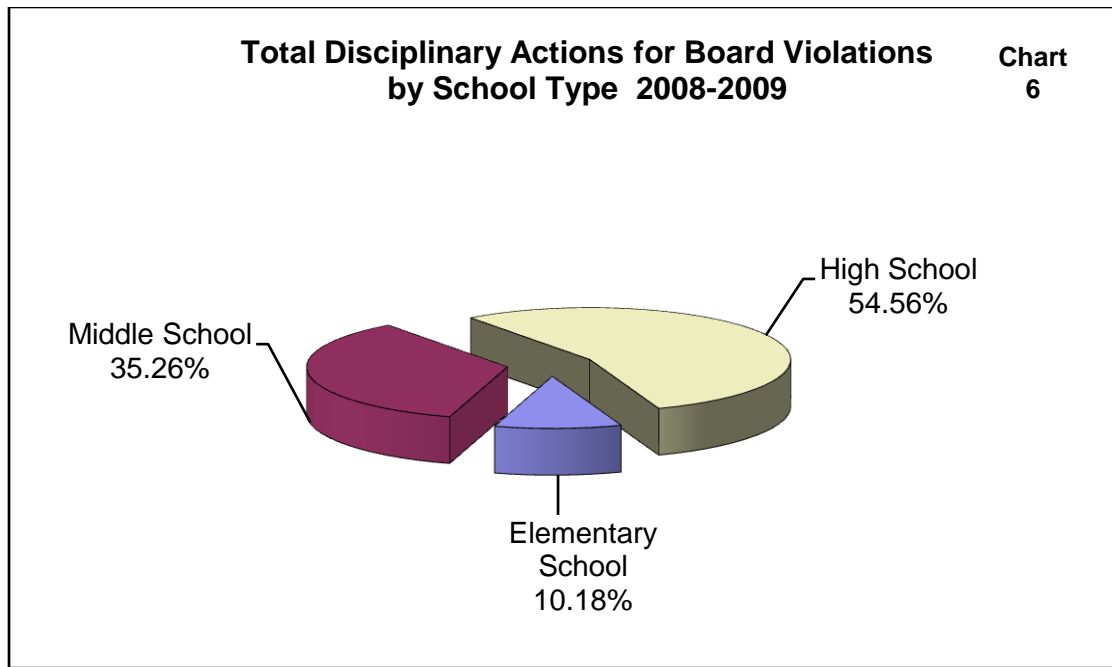

Chart 6 indicates that elementary schools represent 10.2% of the total Board Violations while disciplinary actions for Board Violations in middle and high school account for 35.3% and 54.6% of all disciplinary actions, respectively. Although the largest percentage of Board Violations occurs at the high school level, there are four grades, 9th-12th, at the high school level and only three grades, 6th-8th, at the middle school level. Previously, **Chart 5a** specified the violations by grade level, which shows that of the five grades with the highest violations, three were in middle school, further indicating the need for more intensive interventions to reduce disciplinary actions in middle schools.

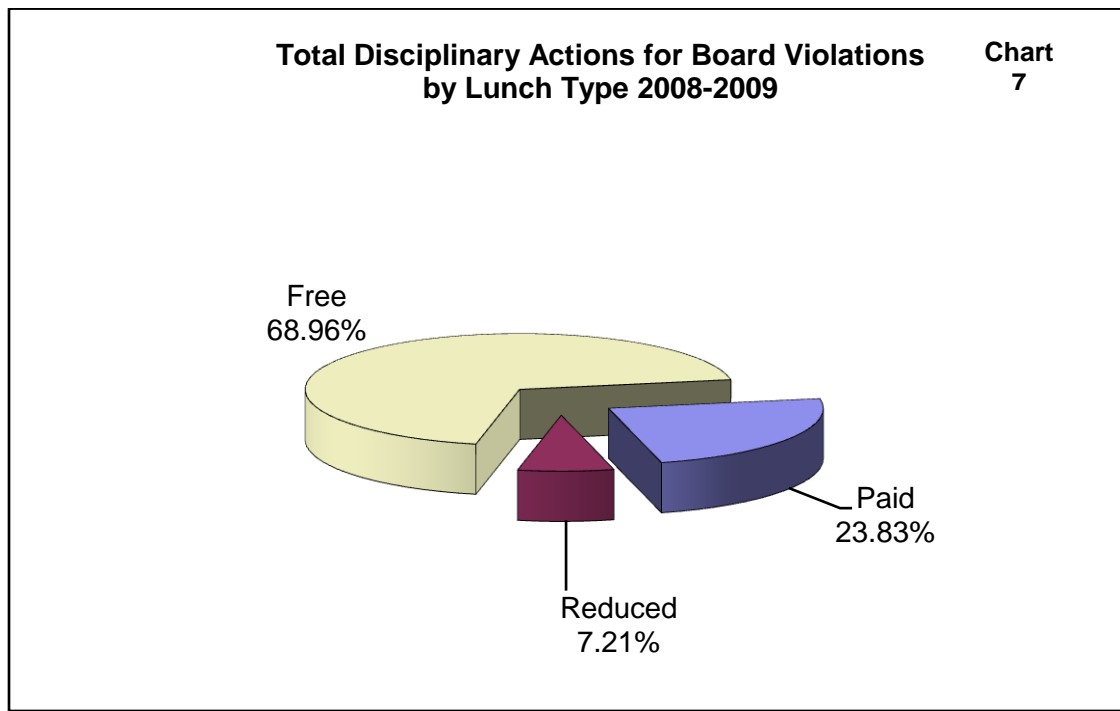

Chart 7 illustrates the total disciplinary actions for Board Violations by lunch type. Students who qualified for free lunch comprised 68.96% of the total disciplinary actions while students with paid and reduced lunches accounted for 23.83% and 7.21% of the total disciplinary actions, respectively. For the 2008-2009 school year, approximately half of Kentucky's students received free or reduced lunches (see <http://nhs.ky.gov/octdataout/rptlist.htm>)

Among the student offenders, the percentage of students who qualified for free or reduced lunch (76.27%, or the sum of 68.96% and 7.21% from Chart 7) is considerably higher than their representation in the total population. It is quite possible that this link may be due to a number of factors not measured in these data (e.g., the reduced parental involvement in school activities often seen in low-income households, additional stressors faced by students from low-income households) rather than a direct relationship between household income and school behaviors. In any case, the link between poverty and school misbehavior is an area that continues to need additional study.

Board Violations by Lunch Type and Race - 2008-09 School Year *

Chart
8

**To interpret the chart, read across the row. For example, there were 46,666 disciplinary actions for Board Violations received by Whites. Of that number, 64.0% of the students receiving disciplinary actions also received free lunch, 7.7% received reduced lunch, and 28.3% paid for their lunch.*

Disciplinary actions for Board Violations are displayed by race and lunch category in **Chart 8**. The percentage of Blacks, Hispanics, Asian, and Others that were given disciplinary actions for Board Violations that received free lunch (80.0%, 77.6%, 76.7%, and 74.8%, respectively) was substantially higher than the percentage of Whites that were given disciplinary actions for Board Violations that received free lunch (64.0%). It appears that both race and free lunch status impact the likelihood of receiving disciplinary actions for Board Violations in 2008-2009.

Board Policy Violations Comparison of Disciplinary Actions

**Chart
9**

Total Board Violations are categorized by specific disciplinary actions in **Chart 9**. In 2008-2009, there were 341 more out-of-school suspensions than the previous year, an increase of 0.5%. At the same time, there were 72 fewer incidents of expulsions with services (a 49.7% decrease), 17 fewer expulsions without services (a 53.1% decrease), and 943 fewer incidents of corporal punishment (a 37.5% decrease). Compared to out-of-school suspensions, expulsions (both with and without service) occur relatively infrequently; the total number of expulsions without services remained below 50 for the entire state for the seventh consecutive year.

Additionally, three important trends have emerged. First, out-of-school suspensions for Board Violations have steadily declined (15.1% over the past five years). Second, corporal punishments began a downward trend in 2005-2006 (decreasing 49.0% over the five-year period, with a slight increase between 2004-2005 and 2005-2006). Finally, both expulsions with services and expulsions without services also have declined over the five-year period (decreases of 56.8% and 60.6%, respectively). Each of these findings is encouraging. The number of expulsions without services for Board Violations (ranging between 17 and 43) has remained relatively stable over the five-year period.

Chart
10

Board Violations by Population Group

* All others include students of American Indian, Asian/Pacific Islander, Hispanic, and other descents.

Comparisons of disciplinary actions by gender and ethnicity are made in **Chart 10**. Between 2007-2008 and 2008-2009, total disciplinary actions for Board Violations (1.0%) declined slightly, as did disciplinary actions for males (1.4%), and white, non-Hispanics (4.2%). Over the two-year period, disciplinary actions for females (0.2%) and non-Hispanic Blacks (4.7%) increased slightly, while violations among “All others” increased for the fifth consecutive year (15.8% from 2007-2008 totals). The ratio of male violations to female violations is approximately 2.5 to 1, a ratio that has decreased over the five-year period.

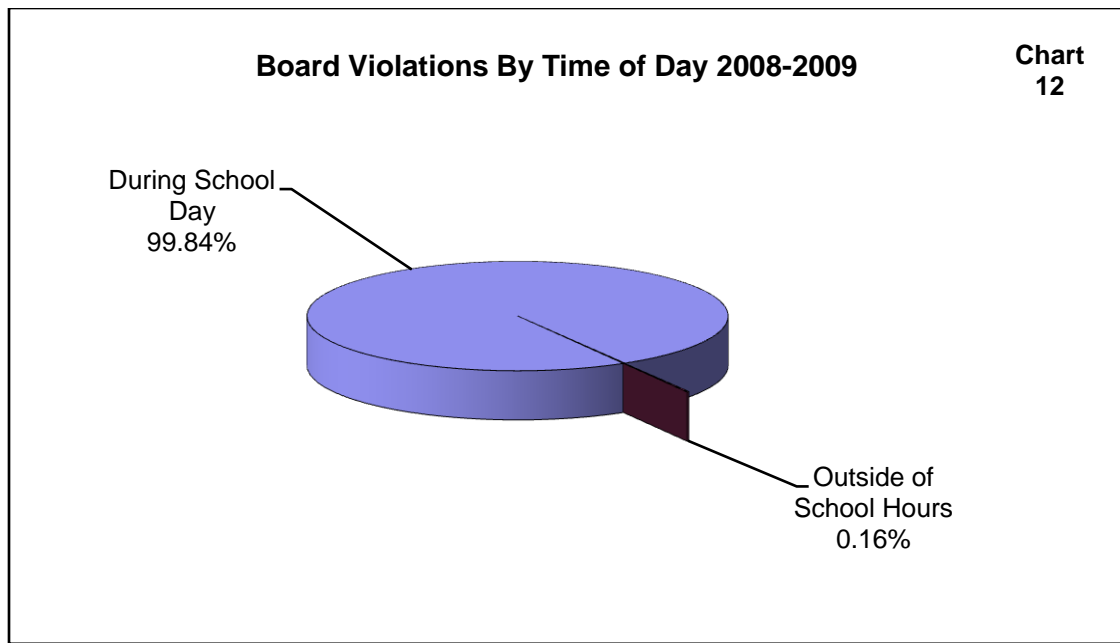

A comparison of disciplinary actions over the five-year period suggests several trends. First, total disciplinary actions for Board Violations and disciplinary actions for males, females, and white, non-Hispanics appear to have peaked in 2004-2005 and have now begun a downward trend (decreases of 16.5%, 18.7%, 10.1%, and 24.4% from 2004-2005 to 2008-2009, respectively). Secondly, disciplinary actions for black, non-Hispanic students have remained relatively stable over the five year period. Finally, disciplinary actions for students of all races other than White or Black have increased dramatically (41.5%) over the five-year period. During that same period, the number of total students in public schools in Kentucky in the “All Others” category increased by 51.5%, so the dramatic increase in disciplinary actions for Board Violations may be at least partially explained by the population increase in that group. Additional research is needed to fully understand this increase.

**Disciplinary Actions for Board Violations by Special Education Status
(2008-09 School Year)**

**Chart
11**

In 2008-2009, we are once again able to distinguish those students who had an IEP from those that did not. The comparison of disciplinary actions in 2008-2009 by IEP status is presented in **Chart 11**. The results presented in **Chart 11** suggest that approximately one in five students (19.2%) receiving an expulsion with service for a Board Violation had an IEP in 2008-2009 while none (0.0%) of those receiving expulsions without service had an IEP. One in four students suspended for a Board Violation in 2008-2009 (24.5%) had an IEP and one in three students who received a corporal punishment for a Board Violation (32.6%) had an IEP. Given that the Kentucky Department of Education suggests that approximately one in eight (13.1%) students in public schools in Kentucky had an IEP in 2008-2009, both the percentages for out-of-school suspensions and corporal punishments suggest that students with IEPs are disproportionately more likely to receive those disciplinary actions for Board Violations. This finding follows national data that students with IEPs are disproportionately likely to receive disciplinary actions.

* See note on page 17.

Charts 12 and 13 depict the time of day and location of Board Violations. The charts reflect that 99.84% of Board Violations are committed during the school day and 98.25% are committed on school campus.

Board Violations by School Locations 2008-2009

**Chart
14**

The location of Board Violations is further explored in **Chart 14**. The data presented in **Chart 14** suggest that the classroom is the site of the majority of Board Violations (71.98%). The remaining Board Violations are committed in hallways/stairwells (9.32%), the cafeteria (4.47%), on the bus (2.86%), in the gymnasium (2.32%), restrooms (2.10%), and other campus locations (6.95%). These trends have been fairly stable for each time period for which we have data.

Note: Public schools are legally responsible for the behavior and safety of students when they leave their homes to go to school until they return to their homes after their school day is over.

Law Violations that are committed by a student outside of the school day are subject to consequences imposed by the justice system and are not recorded in these data.

Law Violations committed during the school day are subject to consequences imposed by the school district and are included in this report. When the Law Violation during the school day is of a severe nature, the justice system may also be involved.

Disciplinary Actions for Law Violations in Kentucky Schools

At the beginning of this reporting process in 1998, the Kentucky Department of Education adopted the FBI Uniform Crime Reporting (UCR) Form as a format for reporting Law Violations on school grounds and at school-related activities. Under this system, *Part I* crimes involve an illegal act directed against a person or property and are generally considered to be more serious offenses. *Part II* Law Violations may result in an arrest, but are considered less serious. The FBI UCR collects data about 22 Part II Law Violations; however, over the life of this report, we have added several categories of Law Violations that are found in the Kentucky Revised Statutes but not in the FBI UCR to gain further understanding of Law Violations in the school setting. Definitions of all Law Violations used in this report can be

found in **Appendix A**. The following charts show the reported incidents of *Part I* and *Part II* (including the additional KRS 158.156) Law Violations from 2004-2009.

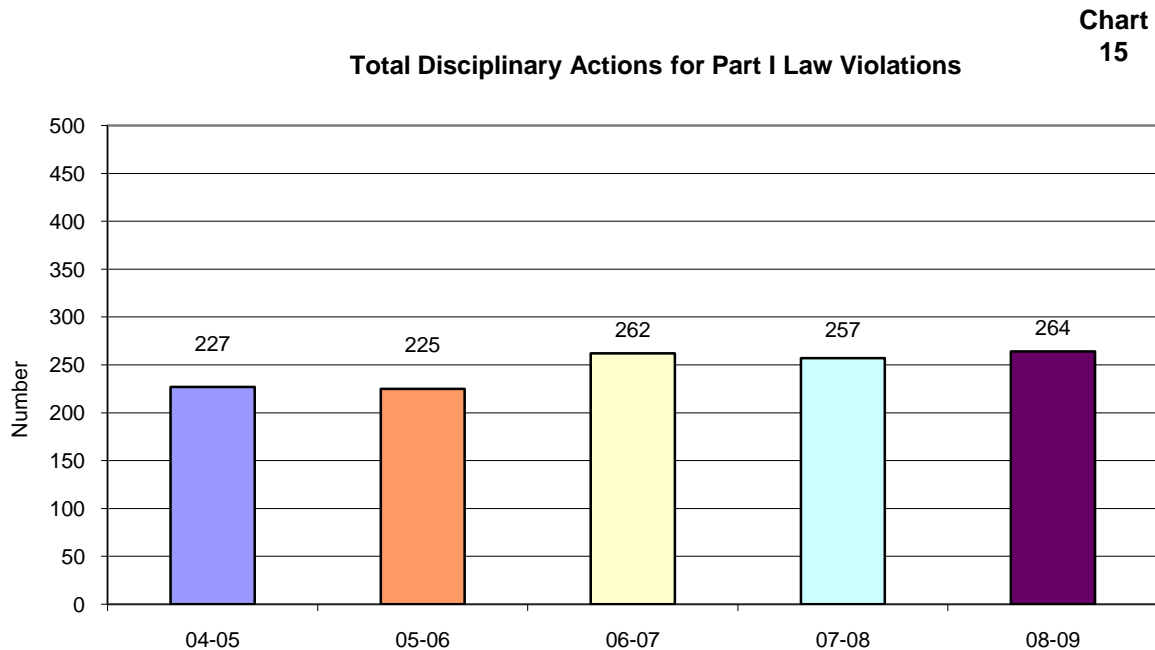

Chart 15 illustrates a five-year increase in disciplinary actions for *Part I* Law Violations. Although disciplinary actions for *Part I* Law Violations increased slightly (2.7%) from 2007-08 to 2008-09, they increased 16.3% over the five years under study, a somewhat troubling finding, the source of which needs to be further examined. Nevertheless, the slight increase in *Part I* Law Violations for the past year, and the relative stability of that number from 2006-2007 to 2008-2009, suggest that this finding should be monitored closely to determine if future increases occur.

Disciplinary Action for Part I Law Violations by Category

Chart
16

Note that a slight change in a single or double digit number can have a dramatic impact on percentages.

Disciplinary actions for *Part I* Law Violations by category are shown in **Chart 16**. Over the five-year period, motor vehicle theft (62.5%), arson (49.0%), and aggravated assaults (14.7%) decreased dramatically. Disciplinary actions for motor-vehicle theft and burglary fluctuated during the five-year period, but remained at 8 or less incidents throughout the state for motor vehicle theft and 33 or less incidents for burglary throughout the entire five-year period. Despite these encouraging findings, robbery increased 75.0% over the five-year period (but there were only 21 reported robberies in 2008-2009 throughout the state) and burglary increased 163.6% over the five-year period (but there were only 29 reported burglaries in 2008-2009 throughout the state). The downward trend in aggravated assault (coupled with the fact that there were no criminal homicides or forcible rapes reported over the five-year period) is a promising development; however, the increases in robbery and burglary need to be monitored closely in the future and exploration into these increases may be warranted.

Total Disciplinary Actions for Part II Law Violations

Chart
17

In **Chart 17**, the total disciplinary actions for *Part II* and the additional KRS Law Violations (hereafter referred to as *Part II* Law Violations) are presented. Disciplinary actions for *Part II* Law Violations decreased by 5.8% from 2007-2008 to 2008-2009 and by 9.7% over the five-year period. The declining number of disciplinary actions for *Part II* Law Violations over the five-year period is a promising trend.

Total Disciplinary Actions for Part II Law Violations

**Chart
18**

Abbreviations*:

<i>Abbr.</i>	<i>Description</i>	<i>Abbr.</i>	<i>Description</i>
DUI	Driving Under the Influence	P/V	Prostitution and Vice
DA	Drug Abuse	Weap. A	Weapon - A. Handgun
UI	Under Influence	Weap. B	Weapon - B. Rifle or Shotgun
Forg.	Forgery	Weap. C	Weapon - C. Other Firearm
Fraud	Fraud	Weap. D	Weapon - D. All Other
Gamb.	Gambling		

*** Refer to Appendix A for definitions of each of the Law Violations.**

The depiction of *Part II* Law Violations by category requires three charts to display results. **Chart 18** reveals disciplinary actions for 11 of the 28 *Part II* Law Violations for which data are collected. Relatively few disciplinary actions occur annually for each of some categories. Disciplinary actions for Driving under the influence, Under Influence, Fraud, Prostitution and Vice, Weapon A- Handgun, and Weapon B- Rifle or Shotgun, and Weapon C- Other Firearm remained relatively stable over the five-year period. Disciplinary actions for Drug Abuse (17.3%) and Weapon D- All Other violations (18.4%) declined significantly over the five-year period while disciplinary actions for forgery (60.0%) and gambling (71.4%), although relatively few in number, did increase substantially over the five-year period.

Total Disciplinary Actions for Part II Law Violations

**Chart
19**

Abbreviations:

Abbr.	Description	Abbr.	Description
SA	Assault - (simple)	SO	Sex Offenses (Except Rape and Prostitution)
DC	Disorderly Conduct	SP	Stolen Property (buying, receiving, possessing)
Vand.	Vandalism	T.T	Terroristic Threat
AOO*	All Other Offenses	T.B	Terroristic – Bomb threat
Loit.	Loitering	T.C	Terroristic - Chemical/ Biological / Nuclear threat

* Refer to pages 57 and 62 to see errors in reporting that affect these numbers for 2006-2007.

Chart 19 depicts disciplinary actions for the other 10 categories of *Part II* Law Violations. During the five-year reporting period, there were significant decreases in a number of disciplinary actions for Law Violations, including sex offenses (68.8%), all other offenses (51.8%), terroristic-chemical/biological/nuclear threats (50.0%), terroristic-bomb threats (35.7%), and Terroristic Threats (13.1%). Nevertheless, not all Law Violations in the chart declined dramatically throughout the five-year period. Although the number of disciplinary actions for simple assault increased 37.3% over the five-year period, most of that increase occurred between 2004-2005 and 2005-2006; since that time, the number of disciplinary actions for simple assault has remained relatively stable. Receiving stolen property increased over the five-year period (16.9%) but decreased slightly (1.3%) between 2007-2008 and 2008-2009. The number of disciplinary actions for disorderly conduct, vandalism, and loitering remained relatively stable over the five-year period.

Total Disciplinary Actions for Part II Law Violations 2008-2009

Chart
20

As discussed earlier in the report, we began collecting data regarding seven additional KRS Law Violations for the first time this year (see Appendix A for definitions of these Law Violations) per the requirements of KRS 158.156. The data presented in **Chart 20** show that 18 students received disciplinary actions for Menacing and 20 students received disciplinary actions for Misdemeanor Wanton Endangerment. Few students received disciplinary actions for felony wanton endangerment, felony criminal abuse, misdemeanor criminal abuse, felony stalking, and misdemeanor stalking.

Drug Possession and Use Violations by Drug Type

Chart
21

Beginning in 2004-2005, changes to the data collection process allowed us to disaggregate (1) drug possession/use and distribution of illegal drugs and (2) the type of drug for which disciplinary actions were received. **Charts 21 and 22** display the number of disciplinary actions reported for nine drug categories from 2004-2005 to 2008-2009. Overall, disciplinary actions for drug possession/use decreased 20.0% over the five year period. Despite the fact that disciplinary actions for marijuana/hashish possession accounted for over half of all disciplinary actions for drug possession/use each year, disciplinary actions for marijuana/hashish possession/use (26.5%) and other drugs (46.4%) declined substantially over the five-year period. The category “Other” refers to substances not otherwise specified, for example, “designer” drugs such as Ecstasy, or “look-alikes,” and comprised 13.6% of the total possession and use violations in 2008-2009. Thus, disciplinary actions for the two categories that make up the largest percentage of the total drug possession/use category both declined over the five-year period. Disciplinary actions for barbiturates declined dramatically over the five-year period as well (76.9%). Disciplinary actions for amphetamines, cocaine/crack, hallucinogenics, and heroin together make up a very small percentage of drug abuse violations and disciplinary actions for these drugs remained relatively stable over the five-year period, although none of these drugs had more than 15 disciplinary actions in any of the five years under study. Disciplinary actions for prescription drug possession/use increased 21.5% over the five-year period and increased slightly by 1.7% from 2007-2008 to 2008-2009. Disciplinary actions for alcohol violations increased 17.2% over the five-year period but decreased 6.1% between 2007-2008 and 2008-2009. The increase in disciplinary actions for prescription drug possession/use and alcohol violations is a cause for some concern and further research into its explanation is needed at both the district and state levels.

Drug Distribution Violations by Drug Type

Chart
22

Chart 22 reveals the number of disciplinary actions for drug distribution during the 2004-2005 to 2008-2009 school years. Disciplinary actions for drug distribution declined slightly (3.4%) over the five-year period, but increased (13.1%) between 2007-2008 and 2008-2009. Disciplinary actions for marijuana/hashish (11.6%) and Prescription Drugs (27.2%) increased over the five-year period. These types of drugs comprised over half of the disciplinary actions for drug distribution in 2008-2009; these increases in distribution at school over the five-year period is troubling and needs additional research into its cause. Disciplinary actions for alcohol distribution decreased both over the five-year period (20.0%) and between 2007-2008 and 2008-2009 (56.8%) while disciplinary actions for barbiturates (84.6%) and other drugs (34.1%) decreased over the five-year period. The number of disciplinary actions for hallucinogenics, amphetamines, heroin, cocaine/crack, and inhalants remained relatively stable over the five-year period.

Law Violations Comparison of Disciplinary Actions

Chart
23

The types of disciplinary actions for all Law Violations are compared in **Chart 23**. Expulsions with Services decreased 0.6% and Out of School Suspensions decreased 9.0% over the five-year period. While Expulsions with Services increased 22.8%, Out of School Suspensions decreased by 6.1% between 2007-2008 and 2008-2009. Each of these findings is encouraging and indicates a substantial decrease in the number of Law Violations occurring on school property over the last five years. On the other hand, Expulsions without Services increased 15.6% over the five-year period but decreased 21.3% from 2007-2008 to 2008-2009 after remaining relatively stable from 2004-2005 to 2006-2007. Although the number of students throughout the state that received expulsions without services is still less than 50 for the entire state, it remains somewhat discouraging that this number has increased over the five-year period. Further exploration into the causes of this increase may be needed to uncover why this has occurred.

**Total Disciplinary Actions for Law Violations
(Combination of Expulsions & Suspensions)**

**Chart
24**

Disciplinary actions for all Law Violations, both *Part I* and *II*, are depicted in **Chart 24**. Disciplinary actions for *Part I* Law Violations increased (16.3%) over the five-year period under study while disciplinary actions for *Part II* Law Violations decreased (9.7%) over the five years under study. The increase in disciplinary actions for *Part I Law Violations* was discussed in detail earlier and needs to be monitored closely in future reports to determine whether the number continues its upward trend.

Comparison of Disciplinary Actions for Law Violations by Race and Gender
Subgroup
(Combination of Expulsions & Suspensions)

Chart
25

Race and gender comparisons for disciplinary actions for Law Violations are presented in **Chart 25**. Disciplinary actions for Law Violations decreased slightly from 2007-2008 to 2008-2009 for white males (6.5%) and white females (9.2%) and for both these groups over the five-year period (decreases of 15.7% for white males and 15.5% for white females). Disciplinary actions for Law Violations among black males (6.2%) and “other” females (15.0%) decreased from 2007-2008 to 2008-2009 but increased during the five-year period (5.6% for black males and 58.3% for “other” females). Disciplinary actions for Law Violations among black females (5.4%) and other males (29.9%) increased from 2007-2008 to 2008-2009 and increased during the five-year period as well (2.3% for black females and 110.1% for other males). Further exploration into the root of these disparate findings is needed.

**Disciplinary Actions for Law Violations by Special Ed Status
(2008-2009 School Year)**

**Chart
26**

The comparison of disciplinary actions for Law Violations by IEP status is presented in **Chart 26**. The results presented in **Chart 26** suggest that less than 1 in 10 students (9.0%) receiving expulsions with services for Law Violations had an IEP in 2008-2009 while none of those students receiving expulsions without service had an IEP (in fact, KRS 158.150 prohibits this from occurring). Approximately one in five (21.4%) students who were suspended for Law Violations in 2008-2009 had an IEP. Given that approximately one in eight (13.1%) students in public schools in Kentucky had an IEP in 2008-2009, these percentages suggest that the percentage of students receiving a disciplinary action for Law Violations was generally comparable with the percentage of the total student population (13.1%) that had an IEP in 2008-2009.

Total Disciplinary Actions for Law Violations by Grades ^{ab}
(Combination of Expulsions & Suspensions)

Chart 27a

^a Primary refers to 1st, 2nd and 3rd grades.

^b Spec. Educ. refers to students in self-contained special education classes only. This does not include special education students who receive resource or collaborative service.

Grade level comparisons for Law Violations are displayed in **Chart 27a**. The profile of escalating Law Violations from Kindergarten through 9th grade with a decrease thereafter is similar to the profile presented in Board Violations. Additionally, in a similar manner as Board Violations, despite a general trend of decreases over the five-year period in disciplinary actions for Law Violations from kindergarten to 9th grade, disciplinary actions for Law Violations among students in the 10th (7.1%), 11th (6.4%), and 12th grades (5.5%) increased over the five-year period. Further exploration into these findings at all levels is warranted.

Total Enrollment by Grade ^a

**Chart
27b**

^a Primary refers to 1st, 2nd and 3rd grades.

**Disciplinary Actions of Law Violation by Grade ^a
Rate per 100 Students**

**Chart
27c**

^a Primary refers to 1st, 2nd and 3rd grades.

Chart 27b reflects the total enrollment for grades K-12 while **Chart 27c** depicts the rate of Law Violations for each grade K-12. As with disciplinary actions for Board Violations, the conversion to rates by student enrollment makes the increase in disciplinary actions from 8th grade to 9th grade appear less dramatic. Nevertheless, **Chart 27c** suggests a significant increase in the amount of disciplinary actions for Law Violations between middle school and high school, as the four highest rates of disciplinary actions for Law Violations occur in the high school grade levels, led by 9th grade (2.54 disciplinary actions per 100 students), 10th grade (1.99), 11th grade (1.57), and 12th grade (1.45). This finding, coupled with the findings from the previous chart, suggests that disciplinary actions for Law Violations are a greater concern for high school students than for middle school students.

Chart 28 further suggests that disciplinary actions for Law Violations are more prevalent among high school students than middle school students as it illustrates that the vast majority (72.58%) of disciplinary actions for Law Violations occur at high schools while 24.19% and 3.24% of disciplinary actions for Law Violations take place at middle and elementary schools, respectively. This suggests additional research into the pattern of behavior of offenders in the earlier grades and clearly demonstrates the need for unique identifiers in the data.

Chart 29 indicates the time of day that Law Violations were committed. Almost all of the incidents that incurred disciplinary actions for Law Violations (99.01%) occurred during schools hours while only 0.99% happened outside of school hours.

Chart 30 displays the location where the incidents that received disciplinary actions for Law Violations occurred (either on-campus or off-campus). On-campus violations comprise 96.62% of all disciplinary actions for Law Violations while off-campus Law Violations made up the remaining 3.38%. **Charts 28 and 29** clearly indicate that the preponderance of Law Violations occur during school hours and on school campus.

The locations at which Law Violations occur are further divided in **Chart 31**. Most (58.05%) Law Violations occur in the classroom. The remaining Law Violations were distributed across the following locations on-campus: in the hallway/stairwell (11.09%), in the cafeteria (4.31%), on the bus (4.13%), in the restroom (3.55%), in the gymnasium (2.62%), and other campus locations (16.24%).

Chart 32 illustrates the total disciplinary actions for Law Violations by lunch type. Students who received free lunch made up 57.69% of the total disciplinary actions for Law Violations. Students who paid or received reduced lunch were responsible for 34.83% and 7.49% of the disciplinary actions for Law Violations, respectively. Comparing disciplinary actions for Board and Law Violations by lunch type indicates that students who qualified for free lunch constituted a lower percentage of total disciplinary actions for Law Violations than for Board Violations (57.69% vs. 68.96%). Although the proportion of students (65.18%) receiving disciplinary actions for Law Violations who qualified for free or reduced lunches is greater than their representation in the general student population, this proportion is considerably lower than the proportion of students receiving disciplinary actions for Board Violations that qualify for free or reduced lunch (76.17%).

Law Violations by Lunch Type and Race - 2008-2009 School Year*

Chart
33

**To interpret the chart, read across the row. For example, there were 3,430 disciplinary actions for Law Violations received by Whites. Of that number, 50.4% of the students receiving disciplinary actions also received free lunch, 7.3% received reduced lunch, and 42.4% paid for their lunch.*

Chart 33 compares the percentages of those receiving disciplinary actions that received free lunch by race. As with Board Violations, the percentage of Blacks and Hispanics receiving disciplinary actions for Law Violations that received free lunch (75.6% and 67.3%, respectively) was much higher than the percentage of Whites receiving disciplinary actions for Law Violations that received free lunch (50.4%). Combined with an over-representation of Black, non-Hispanic students in disciplinary actions, these findings suggest that further study into the relationship between poverty, race, and disciplinary actions remains an important educational priority for education researchers and policy-makers.

Board and Law Violations Suspensions by Days

**Chart
34**

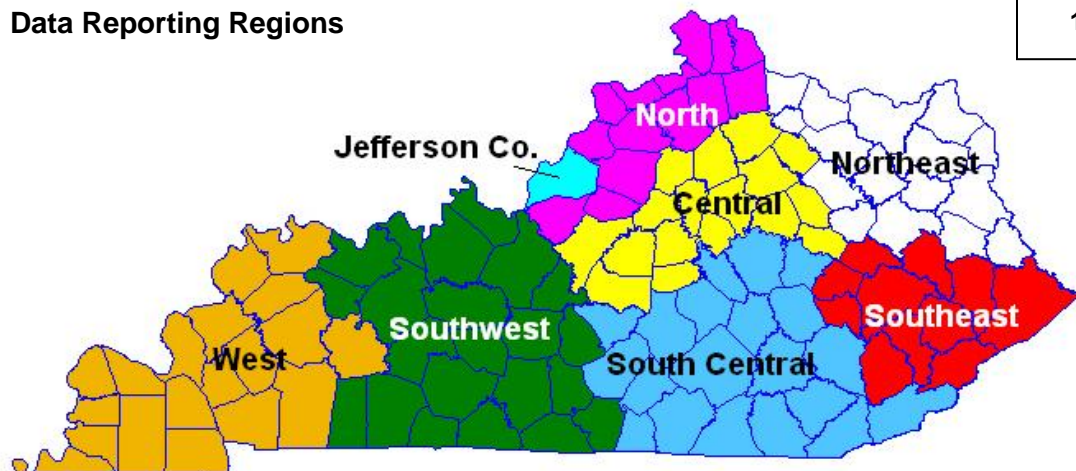

Chart 34 illustrates the number of school days that students were suspended from the 2004-2005 school year through 2008-2009 for Board and Law Violations. As with other data presented throughout the report, the total number of days missed by students for suspensions appears to have peaked in 2004-2005 and declined steadily until 2007-2008 (a 9.8% decrease over the four-year period). The total number of days missed by students for suspensions increased 4.0% from 2007-2008 to 2008-2009, however. Close attention needs to be paid to these numbers in the upcoming years to determine whether this one-year increase signals the beginning of an upward trend or is an anomaly caused by some factor only present in this school year.

KCSS has divided the school districts into eight regions (**Map 1**) to maintain consistency with past reporting. This section of the report disaggregates the school safety data by these geographical regions to examine regional differences in disciplinary actions for Board and Law Violations. Charts tracking these regional trends for five years are then included at the end of the section.

Section III Regional Level Data

Kentucky School Data Reporting Regions				
	Enrollment	Percentage African-Amer.	Percentage White	Percentage Other
West	66,572	12.1	82.8	5.0
Southwest	100,301	7.4	86.4	6.2
Jefferson Co.	93,154	35.3	52.8	11.9
North	101,796	3.9	89.7	6.4
Central	104,012	11.8	78.7	9.5
South Central	90,687	2.2	95.3	2.5
Northeast	45,707	1.7	96.4	1.8
Southeast	33,959	1.0	98.2	0.7

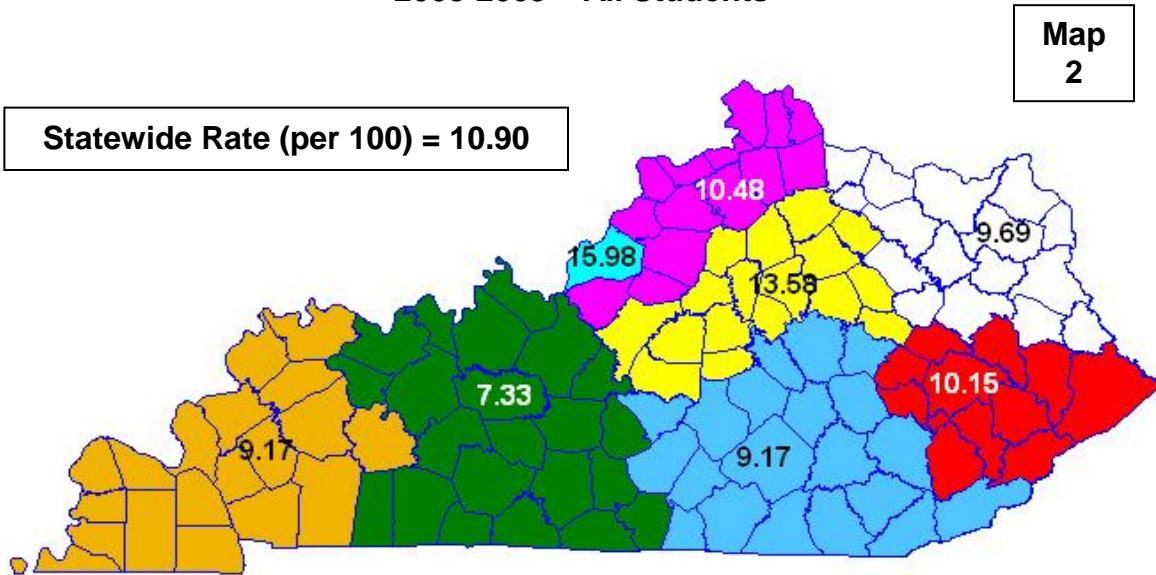

Data Reporting Regions

Map
1

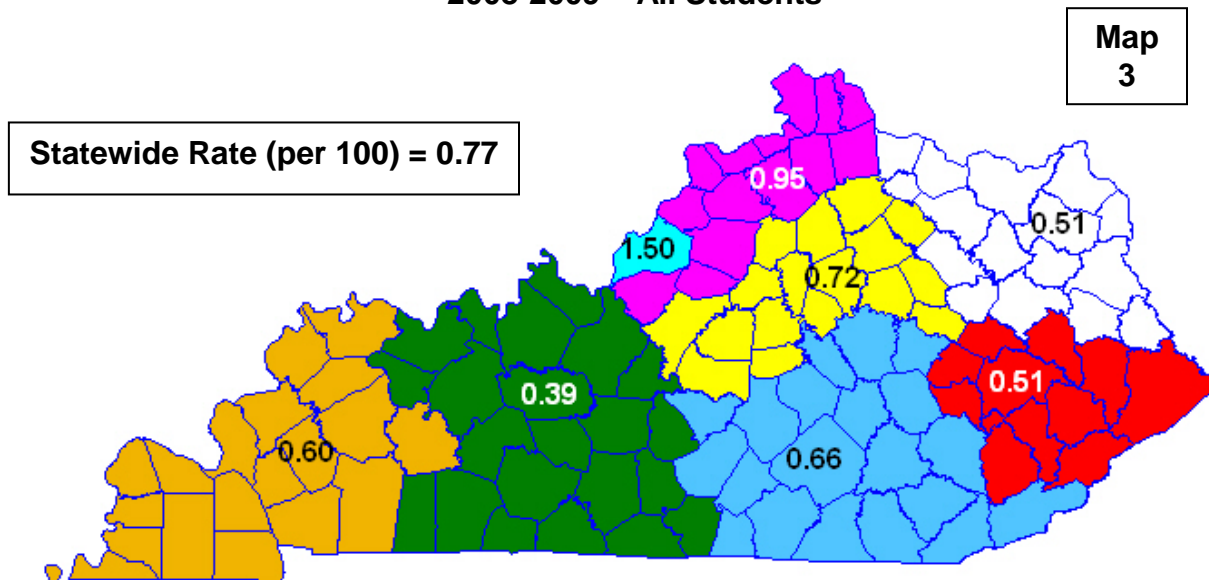

To facilitate comparisons between regions, the standardized measurement of rate per 100 is used on the following maps. The rate listed indicated how many incidents of disciplinary actions occurred in relation to every 100 students in the region.

Disciplinary Actions for Board Violations 2008-2009 – All Students

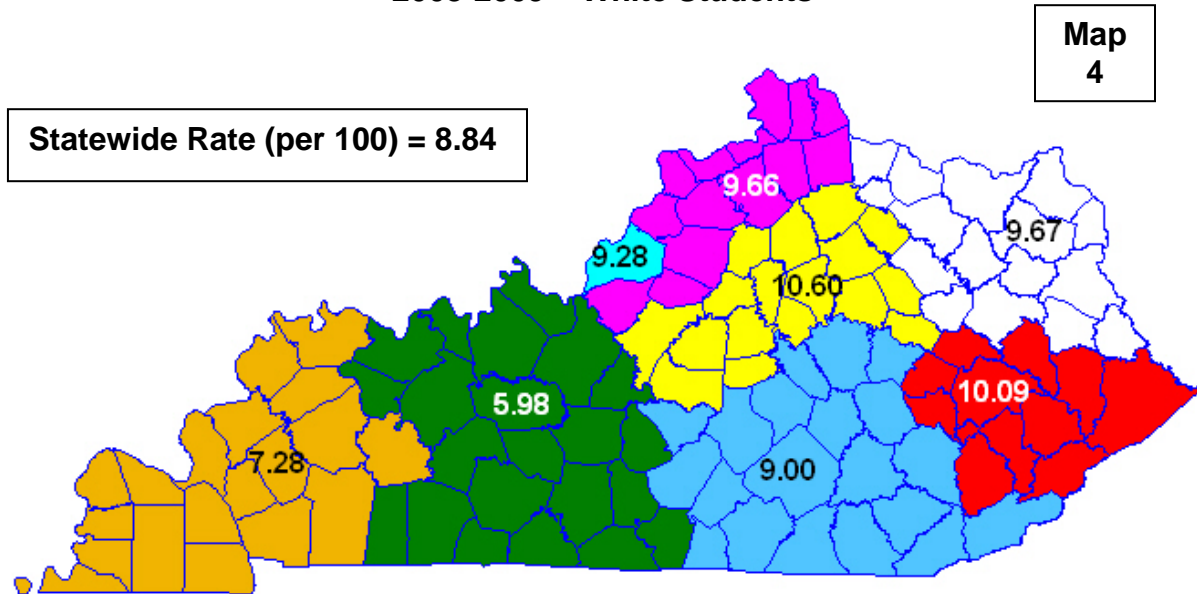

Map 2 shows the regional rate of **disciplinary actions for Board Violations** for all students. The Southwest region reports the lowest rate, 7.33 per 100 students, which is 32.8% below the statewide rate of 10.90 disciplinary actions per 100 students. Jefferson county and the Central region report the highest rates, 15.98 and 13.58, respectively. The rates in the other five regions range from 9.17 to 10.48.

Disciplinary Actions for Law Violations 2008-2009 – All Students

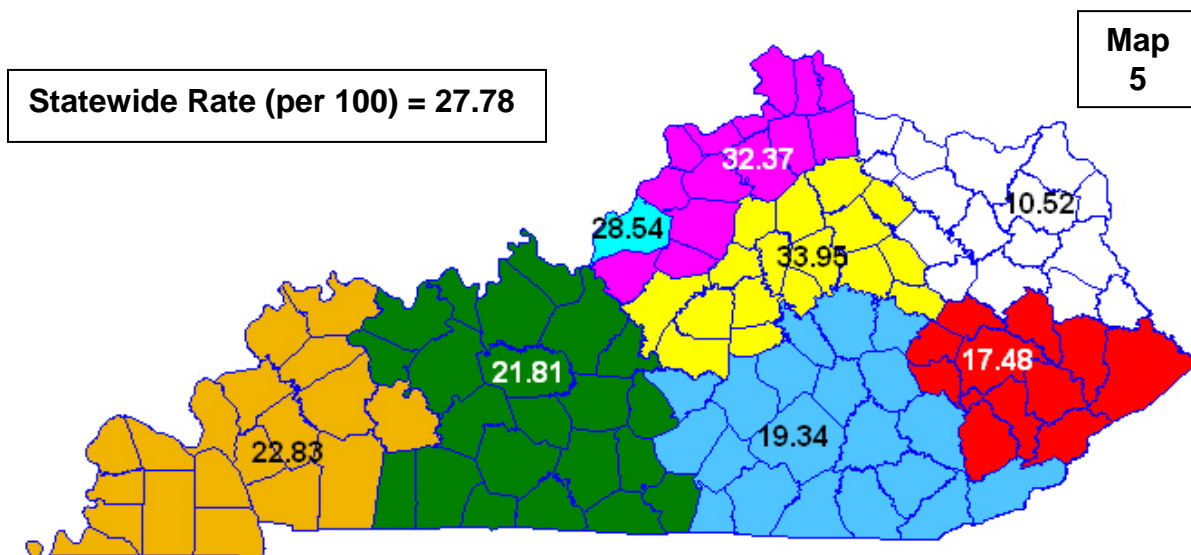

Map 3 depicts **disciplinary actions for Law Violations** for all students. The lowest rate for Law Violations occurred in the Southwest region, 0.39, while the highest rate occurred in Jefferson County, 1.50. Although Jefferson County has consistently reported the highest rate for Law Violations, the difference in all eight regions is little more than one disciplinary action for Law Violation per 100 students.

Disciplinary Actions for Board Violations 2008-2009 – White Students

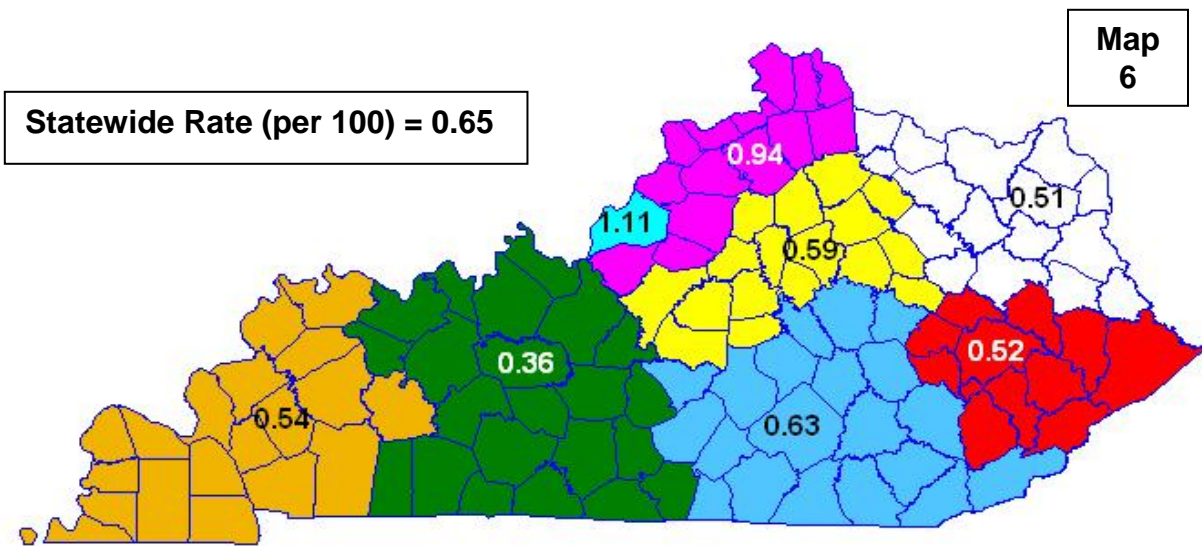

The results presented in **Map 4** and **Map 5** reflect the **disciplinary actions for Board Violations for white (Map 4) and black students (Map 5)**. A comparison of the statewide rates suggests that the statewide rate for disciplinary actions for Board Violations for black students is almost three times higher than the rate for white students (27.78 v. 8.84). The results further suggest that, for white students, the Southwest region has the lowest rate per 100 students (5.98) while the Central region reports the highest rate at 10.60. For black students, the Central region reports the highest rate (33.95) while the Northeast region reports the lowest rate (10.52).

Disciplinary Actions for Board Violations 2008-2009 – Black Students

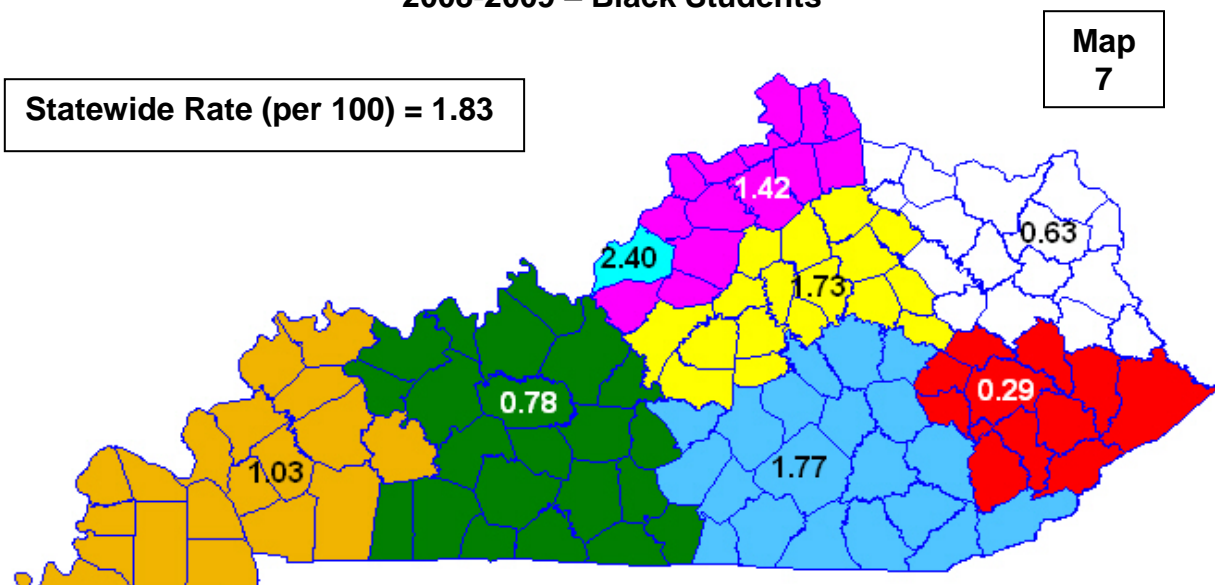

Disciplinary Actions for Law Violations 2008-2009 – White Students

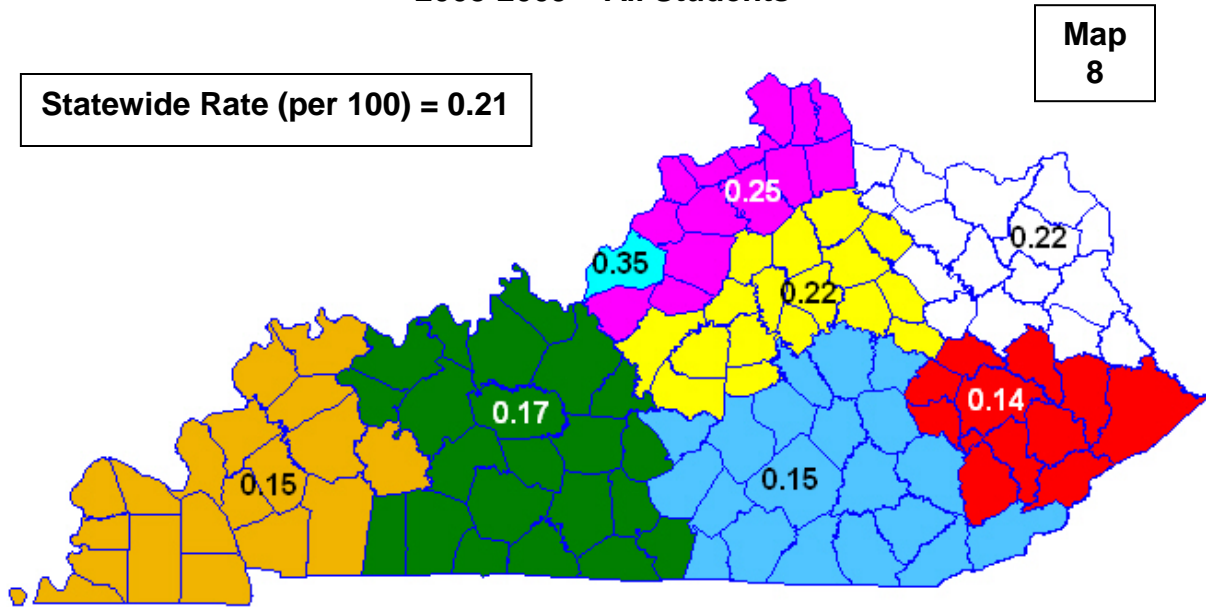

The results presented in **Map 6** and **Map 7** reflect the **rate of disciplinary actions for Law Violations for white (Map 6) and black (Map 7) students**. As noted with disciplinary actions for Board Violations for black students, the statewide rate of disciplinary actions for Law Violations for black students (1.83 per 100 students) was more than double that rate for white students (0.65 per 100). Furthermore, Jefferson County had the highest rate of disciplinary actions for both white (1.11) and black (2.40) students. Additionally, the Southwest region has the lowest rate of disciplinary actions for white students (0.36) and the Southeast region had the lowest rate of disciplinary actions for black students (0.29).

Disciplinary Actions for Law Violations 2008-2009 – Black Students

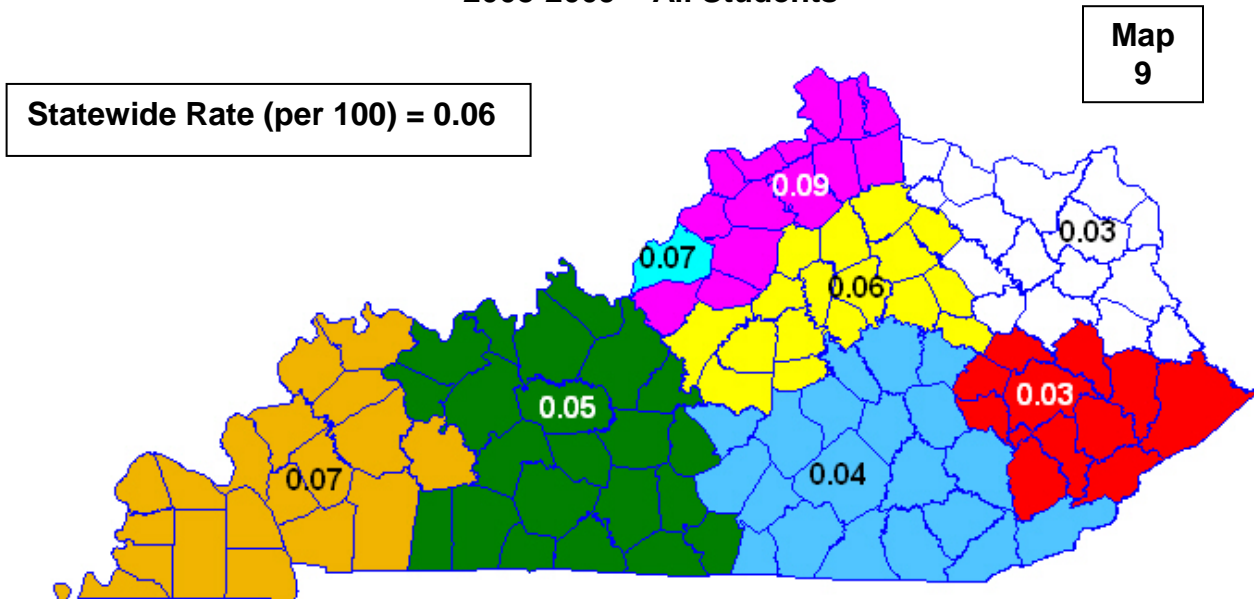

Disciplinary Actions for Drug Possession and Use Violations 2008-2009 – All Students

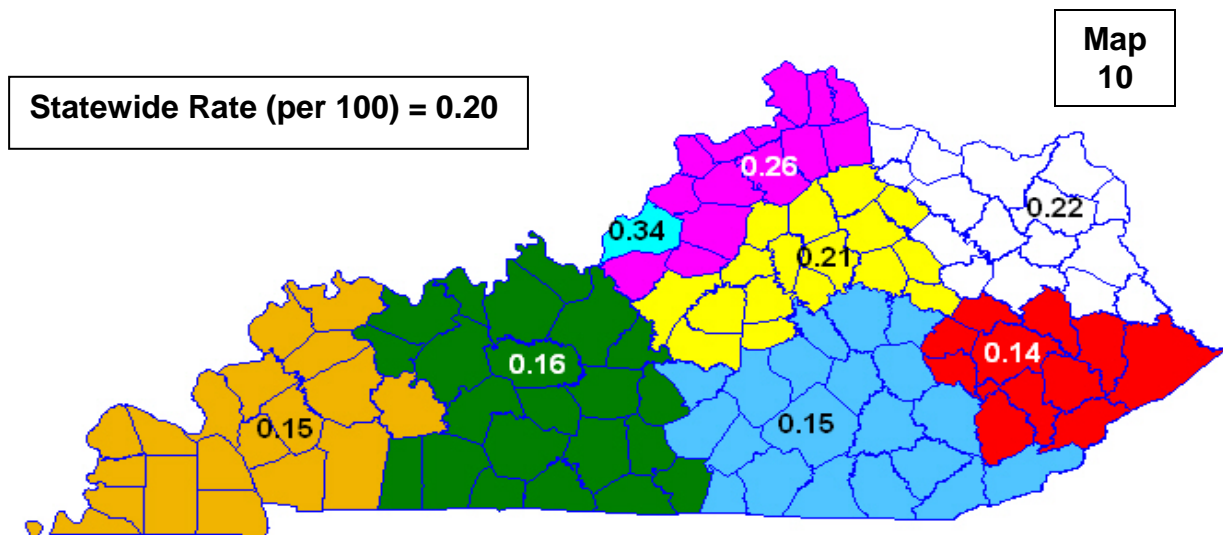

Map 8 depicts the distribution of **disciplinary actions for drug possession and use violations** across the eight regions. The Southeast region reported the lowest rate (0.14) while Jefferson County reported the highest rate (0.35). Note, however, the statewide rate is 0.21 per 100, which is less than 1 disciplinary action per 400 students.

Disciplinary Actions for Drug Distribution Violations 2008-2009 – All Students

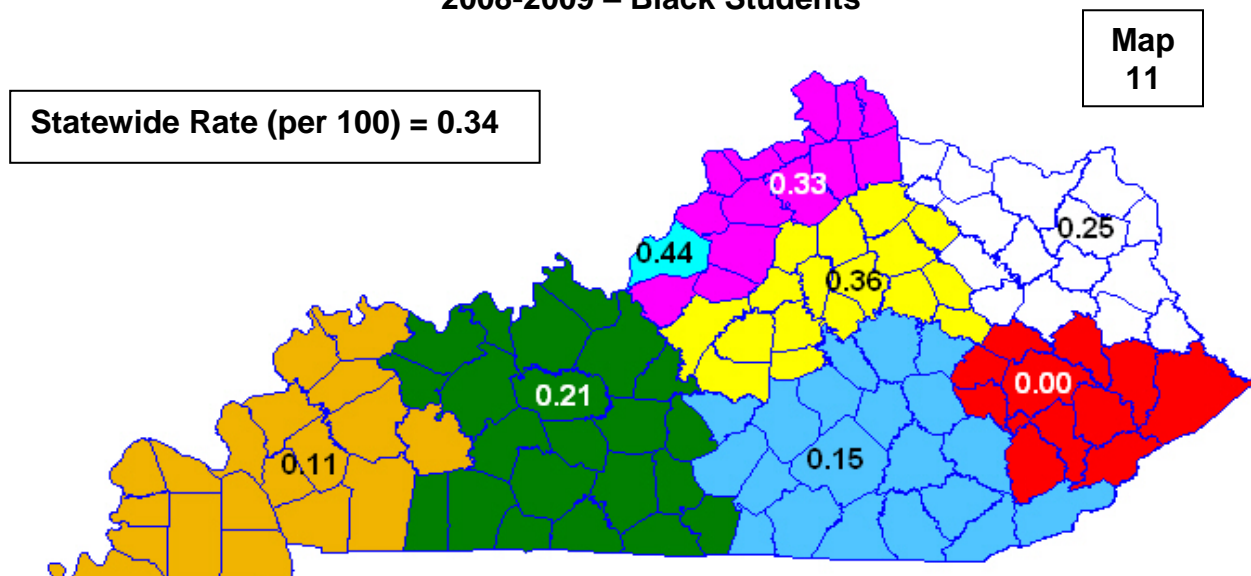

Disciplinary actions for drug distribution violations are depicted in **Map 9**. The North region reported the highest rate (0.09) of drug distribution violations in the state. The rates for the eight regions range from 0.03 to 0.09 with a statewide rate of 0.06 disciplinary actions per 100 students.

Disciplinary Actions for Drug Possession and Use Violations 2008-2009 – White Students

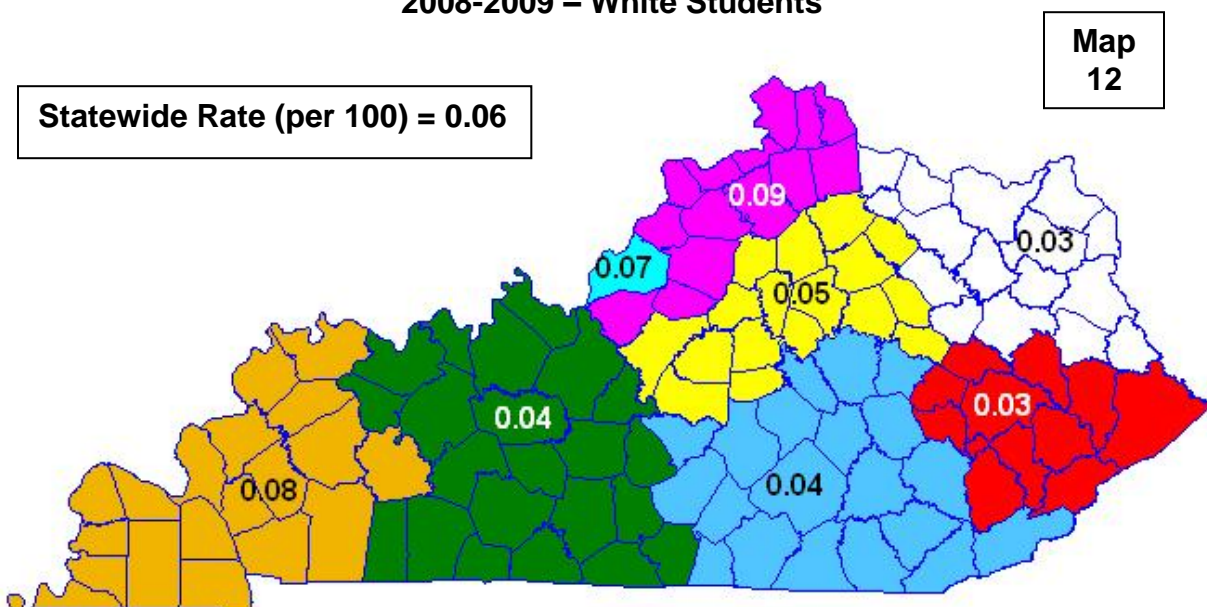

Map 10 depicts the distribution of **disciplinary actions for drug possession and use violations** among White students across the eight regions. The Southeast region reported the lowest rate (0.14) while Jefferson County reported the highest rate (0.34). Note, however, the statewide rate is 0.20 per 100, which is approximately 1 disciplinary action for drug possession and use per 500 White students.

Disciplinary Actions for Drug Possession and Use Violations 2008-2009 – Black Students

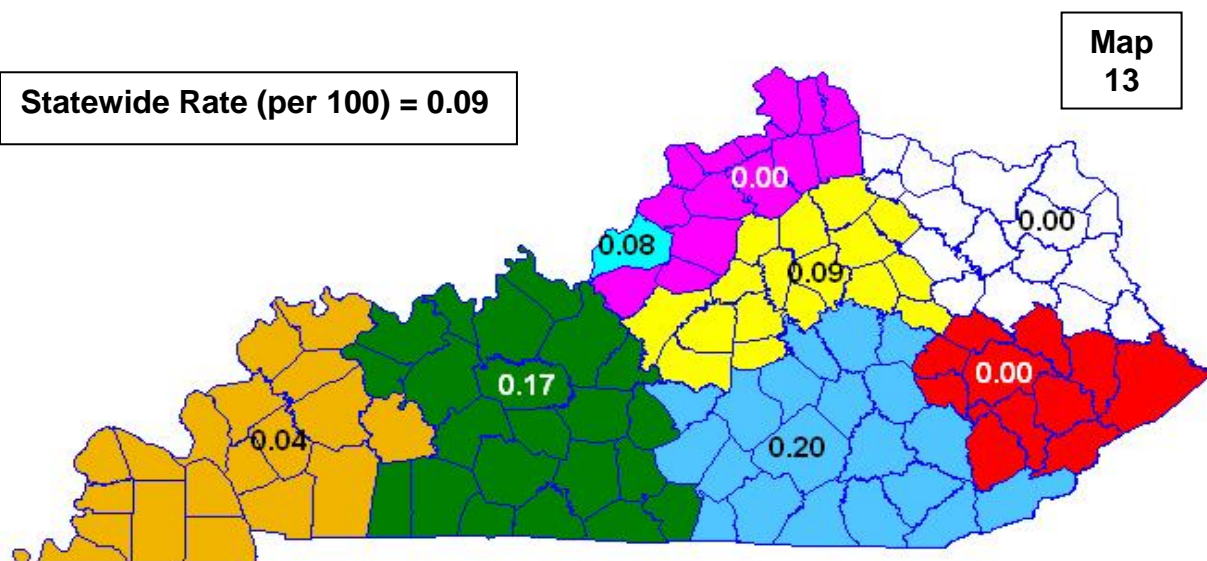

Map 11 depicts the distribution of **disciplinary actions for drug possession and use violations** among Black students across the eight regions. As with the previous map for White students, the Southeast region reported the lowest rate (0.00) of drug possession among Black students while Jefferson County reported the highest rate (0.44). Note that the statewide rate for drug possession and use among Black students was approximately twice that of White students.

Disciplinary Actions for Drug Distribution Violations 2008-2009 – White Students

Map 12 depicts the dispersion of **disciplinary actions for drug distribution violations** among White students across the eight regions. As with drug possession and use, both the Northeast and the Southeast region reported the lowest rate (0.03) while the North region reported the highest rate (0.09). Note, however, the statewide rate is 0.06 per 100, which is approximately 1 disciplinary action for drug distribution per 2,000 White students.

Disciplinary Actions for Drug Distribution Violations 2008-2009 – Black Students

Map 13 depicts the dispersion of **disciplinary actions for drug distribution violations** among Black students across the eight regions. The North region, the Northeast region, and the Southeast region reported the lowest rate (0.00) while South Central region reported the highest rate (0.20). As with drug possession and use, the statewide rate for drug distribution among Black students was almost twice that among White students.

Disciplinary Actions for Board Violations by Region – All Students

Chart
35

We continue with an analysis of five-year trends in disciplinary actions for Board Violations for all students (**Chart 35**). With the exception of Jefferson county (where rates increased (15.0% over the five-year period), rates of disciplinary actions for Board Violations have steadily decreased for the entire state (16.5%) and for all regions over the past five years. The greatest decrease occurred in the West, dropping from 15.09 in 2004-2005 to 9.17 in 2008-2009, a decrease of 39.2%.

Disciplinary Actions for Law Violations by Region– All Students

Chart
36

Five year trends for disciplinary actions for Law Violations for all students are presented in **Chart 36**. The statewide rate for disciplinary actions for Law Violations for all students decreased 9.4% between the 2004-2005 and 2008-2009 school years. While disciplinary actions for Law Violation rates increased in the West, the North, and the Southeast regions (5.3%, 13.1%, and 8.5% respectively), the remaining regions experienced decreased rates from 2004-2005 until 2008-2009. The greatest decrease occurred in the Northeast, where the disciplinary action for Law Violations rate dropped 40.7% over the five-year period.

Disciplinary Actions for Board Violations by Region – White Students

Chart
37

Chart 37 depicts five-year trends in disciplinary actions for Board Violations for white students for each of the eight regions and the state. As with the Board Violation rates for all students, the statewide rates for Board Violations have steadily decreased for white students as well (22.3% over the five-year period). With the exception of Jefferson County (where disciplinary action for Board Violations rates for white students increased 31.1% over the five-year period), all of the regions experienced decreased rates during the five-year period. The greatest decreases occurred in the South Central and Northeast regions, where the rates dropped almost 32% (31.8% in the South Central and 31.5% in the Northeast) between 2004-05 and 2008-09.

Disciplinary Actions for Law Violations by Region – White Students

Chart
38

Chart 38 depicts five-year trends in disciplinary actions for Law Violations for white students for each of the eight regions and the state. As with the Board Violation rates for white students, the statewide rate for disciplinary actions for Law Violations for white students has decreased over the five-year period (13.3%). With the exception of the North and Southeast regions (where disciplinary actions for Law Violation rates for white students increased 11.9% and 8.3%, respectively, over the five-year period), all of the regions experienced decreased rates from the beginning of the time period until 2008-2009. The greatest decrease over the five-year period occurred in the Northeast (a decrease of 38.6%).

Disciplinary Actions for Board Violations by Region – Black Students

Chart
39

Chart 39 depicts five-year trends in disciplinary actions for Board Violations for black students for each of the eight regions and the state. Unlike the Board Violation rates for all students and white students, the statewide rates for Board Violations among black students have, while fluctuating some during that time, remained relatively stable over the five-year period. Although the rate of disciplinary actions for Board Violations for black students decreased in most regions, the rate increased in Jefferson County (32.3%), the South Central region (15.3%), and the Central region (1.0%) over the five-year period. The greatest decrease occurred in the Northeast, where disciplinary actions for Board Violations decreased 61.3% over the five-year period.

Disciplinary Actions for Law Violations by Region – Black Students

Chart
40

Chart 40 depicts five-year trends in disciplinary actions for Law Violations for black students for each of the eight regions and the state. Unlike the disciplinary actions for Law Violation rates for white students, the statewide rates for disciplinary actions for Law Violations have increased for black students (2.8% over the five-year period) although the statewide rate decreased slightly (3.7%) from 2007-2008 to 2008-2009. The rate of disciplinary actions for Law Violations for black students increased in five districts during the five-year period. The greatest increase occurred in the West region, where disciplinary actions for Law Violations rate for black students increased 87.3% over the five-year period. Nevertheless, the rates decreased dramatically in the Northeast (a decrease of 74.5%).

**Disciplinary Actions for Drug Possession and Use Violations by Region
– All Students**

**Chart
41**

Charts 41 and 42 contain five years of data regarding trends in disciplinary actions for drug possession and use and drug distribution. The data presented in **Chart 41** suggest that the statewide rate of disciplinary actions for drug possession and use for all students has decreased slightly (36.4%) over the five-year period. The rate of disciplinary actions for drug possession and use also decreased for each region over the five-year period.

Disciplinary Actions for Drug Distribution Violations by Region – All Students

Chart
42

The data presented in **Chart 42** reflect five-year trends in disciplinary actions for drug distribution. These data suggest that the statewide rate of disciplinary actions for drug distribution for all students has remained stable for the five-year period (between .05 and .06 per 100 students). Only the North region had increases (50.0%) over the five-year period; the rates in the remaining regions remained stable or decreased over the five-year period under study.

Districts are encouraged to examine their data over the three years of reporting. Additionally, districts are encouraged to make comparisons to other districts of similar size, to their region, and to the state. Similar comparisons can be made between building level data to other schools in their district as well as comparisons to their district, region, and the state. Keep in mind that data should be reviewed in context to understand the full meaning of the data and to avoid misinterpretation. The following tables have been included in this report to assist with that comparison.

Section IV District Level Data

Occurrence of School District Disciplinary Consequences for Law and Board Violations

Table I reports the number of disciplinary actions for Law and Board Violations for each Kentucky school district from the 2006-2007 school year until the 2008-2009 school year. County districts (in bold type) are organized alphabetically with independent school districts shown beneath the county school district they adjoin. The data in this table represent the raw number of reported disciplinary consequences associated with specific incidents. Attendance data collected by the Kentucky Department of Education (KDE) are shown in the enrollment column. Membership data are collected once yearly and are the most accurate snapshot of a district's total number of students.

Note: Local school boards are responsible for determining what disciplinary consequences are permissible in their schools. Some school boards have enacted policies prohibiting the use of corporal punishment; therefore, the data contained in the following table under corporal punishment reflect only those districts where it is allowed.

District Totals – Disciplinary Consequences of Law and Board Violations 2006-2009

(School Districts Grouped by County Alphabetically
with Independent Districts Listed Below Their County)

1= Expulsions with educational services
2= Expulsions without educational services
3= Suspensions
4= Corporal Punishment

L = Law Violations
B = Board Violations

School District Name	Year	Enroll.	Law Violations			Board Violations

 L2/B2 – Expulsions without educational services
 L3/B3 – Suspensions
 B4 – Corporal Punishment

Standard Scale of Measurement

The following tables utilize a standard scale of measurement, rate per 100, to facilitate comparison between districts of dissimilar sizes. Therefore, the rate listed indicates how many incidents occurred in relation to every 100 students in the given districts. Districts are grouped by size to allow for more meaningful comparisons and, due to the small number of expulsions across the state,

expulsions with and without services are combined in these tables. District rates for disciplinary actions for all students are shown in **Table 2**. The same data are shown in **Tables 3** and **4**, but have been disaggregated to show the rates for white and African-American students.

Note: A relatively small number of incidents can have a more dramatic effect on the rate per 100 in very small districts and in districts with a small number of African-Americans which may distort interpretation.

Districts **not found** in **Tables 3** and **4** were not reported at the district level because the number of African-American students was so small that reporting the numbers might make them “personally identifiable” in violation of federal privacy laws (Federal Educational Rights and Privacy Act, FERPA). Because their numbers were so small in most counties, the concern for violating the privacy laws also results in the omission entirely of Asian, Hispanic, American Indian, and other racial groups from the tables. We did not include those districts in either table to preclude readers from being able to mathematically calculate how many African-Americans or students of other races received these violations.

1. Expulsion with educational services
2. Expulsion without educational services
3. Suspension
4. Corporal punishment

2006-2009 Disciplinary Consequence Rates for Law and Board Violations
