After the unlikely attack on Marshall County High School – 23 days into 2018 – it absolutely required an entire community to come together to begin the process of healing. As Patricia Greer (principal) will tell you, it can happen anywhere. The presenter will share some painful and insightful suggestions for consideration of actions to take during the days following an unlikely event, such as what happened in Marshall County and so many other places over the years. Never have we heard a school leader, following one of these events, say, “We saw this and knew it was coming.” These difficult conversations can help you prepare your school/school district if you face similar decisions.
