SCHOOL RESOURCE OFFICER Technical Assistance and Support

The free KCSS School Resource Officer technical assistance and support program is designed to assist law enforcement officers as they transition into working in a school setting. KCSS pairs experienced SROs with law enforcement officers new to working in a school environment. KCSS and KYASRO train these SROs to support SROs in their first years of being assigned to a school.

Technical assistance can include:

- One (1) in-person meeting after regular school hours.
- Experienced SROs will be available for discussion and questions to provide guidance and support on an ongoing basis.
- Overview of recent legislative changes that impact SROs.
- Participants will be provided networking opportunities with other new SROs via Zoom meetings or training. Participants will be given the opportunity to discuss areas of concern.

To recommend a new SRO for this free program, please email Jon Akers at jon.akers@eku.edu.

KCSS has collegial networking relationships with the Kentucky Department of Education, the Kentucky Association of School Administrators, the Kentucky Association of School Superintendents, the Kentucky School Boards Association, the Office of the State Security Marshal, and the Kentucky Association of School Resource Officers
