Of the 655,475 students enrolled in Kentucky public schools the overwhelming majority of students, 649,474 (99.08%), did not have a reported law violation during the 2015 - 2016 school year. Of the 6,001 students who did commit a law violation, the vast majority (5,261, 87.67%) had only one violation. The other 740 (12.33%) were responsible for multiple violations during the school year. With a state rate of less than one student (0.92) per hundred, the commission of law violations is not happening with great frequency in the schools.

However, with the goal to reduce the rate as low as possible, analysis of the current data reveals the following:

1. Marijuana/hashish use and possession is the number one law violation for 2015-16 and accounted for 26.45% of all law violations. While this rate is consistent with previous years, the popularity of marijuana/hashish with teenagers is a major concern for all communities.

2. Alcohol use and possession decreased considerably, 26.19%, in the 2015-16 report. This violation had increased by 46.80% in the previous report.

3. Disorderly conduct violations increased by 192.81% from the previous report. Upon further review of the data, it appears that some districts did not correctly code specific incidences of disorderly conduct in the 2014-15 report. This appears to be the underlying cause for such a great increase in incidences of disorderly conduct in the 2015-16 report.

4. The disproportionality of race, special education and socio-economic status among student violators continues to be a concern and suggests that a thorough analysis of school-level data is warranted.

5. The largest number of law violations occurs with ninth graders. This key transition year is also reported as troublesome in studies of retention, failed subjects and attendance.

6. Although "other" weapon violations, (n=341, 88.80%), predominately involved objects that are capable of being readily used by one person to inflict severe bodily injury upon another person, violations involving a firearm, handgun, or rifle were rare (n=43, 11.20%) in the 2015-16 school year.

7. Violations for terroristic threatening may be under reported. Representatives from the Kentucky Center for School Safety are frequently consulted about anonymous threats that have been uncovered, but cannot be attached to a student. Since only violations that can be assigned to a student are reported, anonymous threats that require school administrators to investigate and respond are not captured in the current data. This may be an area that needs to be addressed in future reporting procedures.
INTRODUCTION

School safety concerns everyone.

A spate of articles lamenting the state of student achievement in Kentucky’s schools implies that schools need to concentrate solely on achievement. This fixation on achievement runs contrary to the reality that teachers and students cannot be expected to perform at higher levels when they feel unsafe at school. Parents need schools to provide a secure place to send their children to learn. Educators need a safe and civil environment to facilitate learning. Businesses need schools to be safe to attract good workers to the community. Government and social agencies need schools to be safe to reinforce the safety and security of the community. As important as school achievement is, the safety of our students must be a top priority.

It also follows that since school safety is a concern for everyone in the community, it must also be everyone’s responsibility. Educators, parents, the business community, government officials and all citizens have a role to play in school safety.

To this end, the Kentucky Center for School Safety (KCSS) provides this report of demographic and contextual data regarding reported law violations involving students in Kentucky’s public schools. Every public school and school district in Kentucky contributed data to this report; ideally, schools, school districts and communities will use this information to maintain and improve the safety for all of Kentucky’s school children.
Section I: Data Collection and Using Your Data

The Kentucky Center for School Safety (KCSS) in partnership with the Kentucky Department of Education (KDE) has developed a database using Infinite Campus data from all school districts in the state. Since 2013-14, KDE and KCSS have had the ability to collaborate on school safety data utilizing unique student identifiers. The availability of unique identifier data enables us to establish a better link between law violations and individual characteristics such as socioeconomic status, special education status and race. Moreover, these data allow for examination of the number of violations reported for each student. These are just two of many significant improvements that have become possible through the availability of unique identifier data.

Public schools in Kentucky are required to report all incidents of in-school removal in addition to incidents of expulsion, suspension and corporal punishment. Schools also were required to report all violations involving assault or violence, bullying or harassment, alcohol, drugs, tobacco, or weapons. Based on the reported data for law and board violations, the KDE publishes an annual safe schools statistical report. The 2015-16 safe schools statistical report provided by KDE can be found at http://education.ky.gov/school/sdfs/Documents/2015-2016%20Safe%20Schools%20Annual%20Statistical%20Report.pdf.

In order to avoid duplication with KDE, the Kentucky Center for School Safety focuses specifically on law violations; board violations are not included in this report. This report provided by KCSS includes an in-depth analysis of reported law violations, and the students associated with the law violations, for the school year 2015-16. The definitions of law violations provided by KDE are included in Appendix A. When considering plans to improve student conduct, school officials are encouraged to use this report, as well as KDE’s statistical report, as they both contain important summaries based on Infinite Campus data.

The Kentucky Center for School Safety is committed to working with schools, districts and the Kentucky Department of Education to enhance the quality of the data report. As we continue to review, assess and improve the data collection process, this report will continue to provide richer data to schools and school districts in order that more effective interventions can be planned and implemented.
Data should always be reviewed in context. For example, a school district with an increase in law violations could be experiencing any or all of the following:

1. An increase in student enrollment, which results in an increase in the number of law violations, but not necessarily an increase in the rate of violations based on student enrollment.
2. A rising level of student misbehavior and school disorder;
3. An administrative emphasis on commission of certain targeted offenses; or
4. A building with physical plant or staffing problems that makes effective supervision of student behavior difficult.

Conversely, a school with a decrease in law violations could be experiencing any of the following:

1. An decrease in student enrollment, which results in an decrease in the number of law violations, but not necessarily an decrease in the rate of violations based on student enrollment.
2. A decrease in the level of student misbehavior and school disorder;
3. The assignment of additional personnel to the school, coupled with a more comprehensive supervision plan.
4. The accuracy of the information contained in this report is contingent on original data entered in the Infinite Campus system. Any deviation from KDE’s established reporting protocol (e.g., omission of incidents that should have been recorded), as well as general data entry errors (e.g., incorrect or inconsistent coding), will affect the reliability of the data.

Additionally, we remind the reader that a slight change in a single or double digit number can have a dramatic impact on percentage changes from one year to the next.

Knowing the context around the data changes is crucial. The context should drive the intervention plan.
Section II: Reported Law Violations

Public schools in Kentucky reported 6,995 law violations during the 2015-16 school year. Predictably, the largest school district again reported the most law violations (n=2,131), while twenty three school districts, 13.3%, reported no law violations for 2015 - 2016. The number of law violations reported for each district for the 2015 - 2016 school year is available in Appendix B.

As shown in Table 1, the most common law violation reported for the past two years was possession or use of marijuana or hashish and accounted for almost a quarter of all law violations reported (n=1,587, 22.69%). Disorderly conduct (n=978, 13.98%) was the second most common law violation. The number of disorderly conduct violations increased by 192.81%. It should be noted that a portion of the sizeable increase in disorderly conduct violations is likely the result of modifications in reporting protocol in some districts.

Fourth degree assault (n=585, 8.36%) was the next most common law violation in the 2015-16 school year, followed by terroristic threatening (n=406, 5.80%), alcohol possession and use (n=389, 5.56%), and other weapons (n=350, 5.00%). Other drug possession and use (n=293) decreased by 2.98% and vandalism (n=255) decreased by 6.95%. The top five categories in the 2015-16 report account for 56.40% of all law violations while the top two violations, marijuana possession and use and disorderly conduct account for more than one-third of all violations, 36.67%. Offenses were not reported for 11 categories of law violations in 2015-16.

Law violations were most frequently reported in the classroom (65.07%, see Figure 1), on campus grounds (6.42%), and in a hallway or stairwell (8.76%). Fewer violations were reported on the bus (2.95%), off-campus (3.14%), in the gymnasium (11.73%), and on athletic fields (60.00%). Unspecified “other” locations accounted for eighty-one violations (1.16%). Four new categories (office, athletic field, playground, and field trip) were added for the 2014-15 school year; thus, no data were available for those categories for 2013-14.

*The Kentucky Department of Education (KDE) added the categories of office, athletic field, playground and field trip for the 2014-15 school year.
Alcohol and Drug Violations

Twenty categories involve alcohol and other drug violations and account for 43.23% (n=3024) of all law violations reported for the 2015-16 school year. Taken together the six alcohol and drug violations illustrated in Figure 2 reflect 40.25% (n=2816) of all law violations. Marijuana/hashish possession or use was again the most common alcohol or drug violation reported (n=1,587) in the 2015 - 2016 school year, and was reported four times more frequently than alcohol possession and use (n=389), the second most common violation. However, alcohol possession and use (n=389) decreased by 26.18%, “other drug possession and use” (n=293) decreased by 2.98%, marijuana distribution (n=134) decreased by 17.79%, and alcohol distribution (n=36) decreased by 14.29%. Under influence (n=220) did increase by 11.10% and prescription drug possession and use (n=193) increased by 14.20%. Prescription drug distribution (n=78) had a significant increase of 34.48% and “other” drug distribution (n=63) had a slight increase of 5.00%. There were 31 total reports for violations involving amphetamines, inhalants, heroin, barbiturates, and cocaine or crack, which account for one percent (1.02%) of all alcohol and drug violations.
Table 2 shows a comparison of alcohol and drug violations over the past three school years. With the exception of six categories: marijuana/hashish possession and use; under influence; prescription drugs possession and use; prescription drugs distribution; “other” drugs distribution; and amphetamines possession and use, all other alcohol/drug violations decreased or stayed the same from 2014-15 to the 2015-16 school year. The three-year report shows a consistent increase with marijuana/hashish violations, under influence violations, and prescription drug possession and use violations.

Weapons Violations

Weapons violations (n=384) accounted for 5.49% percent of all reported law violations in 2015 - 2016. The vast majority (n=341) of weapons violations were related to “other” weapons, defined as any object that is capable of being readily used by one person to inflict severe bodily injury upon another person. “Other” weapon is frequently a pocketknife. Fifty two violations involved firearms, specifically, 33 handguns, 2 rifles, and 17 other firearm violations were reported (see Figure 3).

Other Violations

There were 3,587 (51.28%) reported law violations during 2015-16 that were not related to weapons or drugs and alcohol. Of these violations, the most commonly reported law violations were disorderly conduct (n=978, 13.98%), terroristic threatening (n=406, 5.80%), and 4th degree assault (n=585, 8.36%) (see Figure 4). Violations for disorderly conduct show a significant increase of 192.81% from the 2014 – 2015 school year. As noted previously, part of this increase is explained by adjustments in the way disorderly conduct law violations are reported in some districts.

*This increase may be due to adjustments in the way some districts reported this violation.*
Section III: Characteristics of Students Involved in Reported Law Violations

During the 2015-16 school year 6,001 students committed 6,995 law violations. These 6,001 students comprise \textit{less than one percent (0.92\%)} of the student population (n=655,475), indicating that 99.08\% of students in Kentucky’s public schools did not commit a reported law violation (Figure 5). Rates for the number of students with law violations per 100 students enrolled were calculated for each school district and are available in Appendix B. The average rate for the entire state indicates that school districts had less than one (0.92) student with at least one reported law violation per 100 students enrolled. The rates of the two districts with the largest rates of students per 100 with reported law violations were 5.78 and 2.18.

![Figure 5: Student Population for 2015-16 Reported Law Violators](image-url)
Figure 6 shows the grade levels for students who had reported law violations. During the 2015-16 school year, almost a quarter (23.23%) of these students were in ninth grade, 17.71 percent were in tenth grade, 14.30 percent were in eleventh grade, and 13.78 percent were in eighth grade. In general, most of the students with reported law violations were in grades nine through 12 (65.44%), followed by students in grades six through eight (28.23%), and students in kindergarten through fifth grade (6.33%). A list of violations by grade level and category can be found in Appendix C (page 52).
For reference purposes, Figure 7 depicts the same categories of race for the entire student population while Figure 8 shows the race of student violators. Of the 655,475 students enrolled during 2015-16 school year, 78.26 percent (n=512,975) were white, 10.55 percent (n=69,137) were black, and 11.19 percent (n=73,363) were classified as a race other than white or black. Most of the students with reported law violations were white (60.86%, n=3,652) and black (30.31%, n=1,819). Less than 10 percent (8.83%, n=530) of students with reported law violations were classified as a race other than white or black (Table 2). Statistically, there were significant (p<.01) differences between each category of race when comparing the percentages of students with reported law violations to the percentages of enrolled students in each category. Specifically, there was a significantly (p<.01) higher percentage of black students with reported law violations (30.31%) as compared to black students enrolled (10.5%) for the 2015-2016 school year, and there were significantly (p<.01) lower percentages of white (6.57%) and other race (8.67%) students who had reported law violations when compared to white and other race enrollments (79.05% and 10.41%).
Table 3 contains the number of violations per student broken down by gender and race for the last three school years. In 2015-16, the vast majority of violators (72.72%) were male. Also, 9.37 percent of male violators had multiple violations as compared to 2.97 percent of female violators. Both males and females had as many as six reported law violations. Black males with one violation comprised 18.18 percent of the violators and 32.83 percent of students with multiple violations.

As shown in Figure 9, 55.40% of all enrolled students were on free/reduced lunch while 39.70% were on paid lunch for 2015 - 2016. More than three quarters (75.43%) of students with reported law violations were on free or reduced lunch while a quarter of students (24.56%) were in the paid lunch category (Figure 10). A breakdown of the number of law violations reported for students by socioeconomic status is presented in Table 4. There were significant (p<.01) differences in percentages of students with reported law violations in each category of lunch when compared to the percentages of all students enrolled in the state. Particularly, there was a significantly (p<.01) higher percentage of students with reported law violations on free lunch (71.86%) as compared to the percentage of enrolled students on free lunch (55.40%), and there were significantly (p<.01) lower percentages of students with reported law violations on reduced (3.58%) or paid lunch (24.56%) as compared to the state student population on reduced (4.90%) or paid lunch (39.70%).

A comparison of the special education status of all students in the state (Figure 11) indicates that the percentage of student law violators with special education status (21.01%, Figure 12) is significantly (p<.01) greater than the percentage of the overall student population with special education status (13.46%). Similarly, a significantly (p<.01) lower percentage of student violators did not have special education status (78.99%) as compared to percentage of enrolled students without special education status (86.54%). A summary of the number of violations per student by special education status is presented in Table 5.

Of those 6,001 students who committed a law violation, most students (n=5,261, 87.70%) had only one violation reported; the 740 (12.33%) of students with law violations had multiple law violations reported during the school year. As referenced on page 18, when analyzing the 740 students with multiple violations by gender and race (Table 3), most (69.46%) of these students were white males (n=271, 36.62%) and black males (n= 243, 32.84%). The fewest number of students with multiple violations were in the other females category (n=19, 2.57%). An examination of the same students by lunch type indicates that more than three quarters (n=562, 75.95%) of them received free lunch, 3.24% (n=24) reduced lunch, and the other 20.81% (n=154) had paid lunch status (Table 4), as shown on page 20. Additionally, 73.51% (n=544) of the 740 students with more than one reported law violation did not have special education status, while the other 26.49% (n=196) were listed as special education students.
Appendix A –
Definitions of Law Violations

Important:
This law violation guide was developed in 2005 by a collaboration of EKU law enforcement educators, local law enforcement officers, School Resource Officers, and lawyers and staff from the Kentucky Department of Education and the Kentucky Center for School Safety. It is intended to serve as clarification for school personnel when coding law violations upon school property. These definitions are not legally binding and should only be used to assist school personnel in coding law violations at their school for safe schools data collection purposes.

For any questions that arise regarding the legal definition of a student action, please consult with your school board attorney or local law enforcement representative.

*For purposes of the school setting, an individual who intentionally uses a deadly weapon, dangerous instrument, or other means to cause serious physical injury to another is guilty of Assault in the first degree. This is the most serious assault; its code should be reserved for situations when the intent of the offender is to cause death or serious injury. To meet these criteria, the victim has to incur potential life threatening injury, serious disfigurement, or prolonged loss of the use of a body part from the incident.
